Buist's Famous Gold Medal Zinnias

DAHLIA-FLOWERED ZINNIA
"EXQUISITE"

*Light rose with a
deep rose center*

Dahlia-Flowered Zinnias THE POPULAR GIANT FLOWERING TYPE

EVER since the great improvement by hybridizers Zinnias are seen everywhere. They are adapted to our hot summers, are easy to grow and succeed anywhere.

Of the many new types and varieties of the now extremely popular Zinnias, the Dahlia-Flowered is one of the largest and best, by reason of its distinctive depth of bloom.

Notice the character of the gorgeous flower illustrated. Large Zinnias attract immediate attention and comments in any garden. You can grow large flowers by planting Buist's Dahlia-Flowered Zinnias. They produce robust plants, with mammoth flowers averaging 6 inches across by 3 to 4 inches in depth, with a wide range of colors including many shades and unusual tones.

WE OFFER 9 DISTINCT COLORS including "Exquisite" as well as mixed on Page 119
DAHLIA-FLOWERED ZINNIAS, Any Variety—Pkt., 10c.

For a Complete List and Cultural Directions on Zinnias, refer to Page 118
SPECIALTIES continued on Page 3

New Black-Seeded Iceberg Lettuce

HOT WEATHER STRAIN

BLACK-SEEDED ICEBERG LETTUCE is a new strain bred to withstand heat during warm weather. It shows high resistance to brown blight and tip-burn, and is slow to bolt to seed. The plants are hardy and rugged, with large, solid, round heads, light to medium green in color. Deliciously crisp and sweet in flavor. The outstanding merit of this new lettuce for Spring, Summer and Fall should not be overlooked by any home or market gardener. Try this new Hot Weather Strain of Iceberg.

Pkt., 15c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.00

Buist's Seeds - - Dependable since 1828

BUIST'S GARDEN SEEDS

*Buist's Seeds are grown from the Finest Selected Stocks
Those who sow them will not be disappointed*

Suggestions to Customers in Ordering from this Catalogue, which, if followed, will be of mutual aid

HOW TO ORDER.—Please write your name, postoffice and state plainly; if your express or freight office is different from your postoffice don't fail to mention it.

HOW TO SEND MONEY.—Send cash with order by express or registered mail, by check, or by Postal Money-order. Postage stamps will be an acceptable and convenient method of remitting for small amounts. Foreign stamps not acceptable.

WE PAY POSTAGE EXCEPT AS NOTED.

FREE DELIVERY.—To any Express or Postoffice in the United States:

Flower and Vegetable Seeds quoted in this catalogue by the Packet, Ounce, Quarter-pound or Pound, (*except Beans, Corn, Peas in 1/2 lbs. or over*).

Bulbs and Roots quoted singly or by the doz.

Plants and Books.

NOT PREPAID.

Beans, Corn, Peas, Onion Sets, Potatoes, Grass and Field Seeds, Fertilizers and Insecticides. *These items are closely priced at their actual value, not including delivery.*

If wanted by mail please add postage to cover cost of Parcel Post according to the Zone scale tabulated below. Express charges are, as a rule, cheaper than Parcel Post on large packages.

QUICK SERVICE. We ship promptly.

OUR SERVICE DEPARTMENT will take pleasure in advising any of our customers desiring assistance or advice in connection with the Garden or Farm.

WHOLESALE PRICES to Market Gardeners and all other large purchasers of Seeds.—If you purchase seeds largely or grow Vegetables for Market, send for our Market Gardeners' Quarterly, which gives our wholesale prices to which you are entitled.

NO CHARGE is made for boxes, packing or bags, except for 2-bushel seamless sacks at 35c each.

NON-WARRANTY.—Seeds of the best quality will often fail through improper treatment. This may be due to one or more of several reasons, such as covering too deeply or not deeply enough, too much or too little water, too cold weather or a baking sun which forms a crust too hard for the tender shoots to penetrate. Sometimes insects destroy plants at the surface before they are seen by the gardener. We cannot personally direct the use of our goods after they leave our hands; neither can we fully control anywhere or at any time the operation of natural law as it affects seeds; therefore we give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds or bulbs we send out, and we will not be in any way responsible for the crop.

Morning Glory

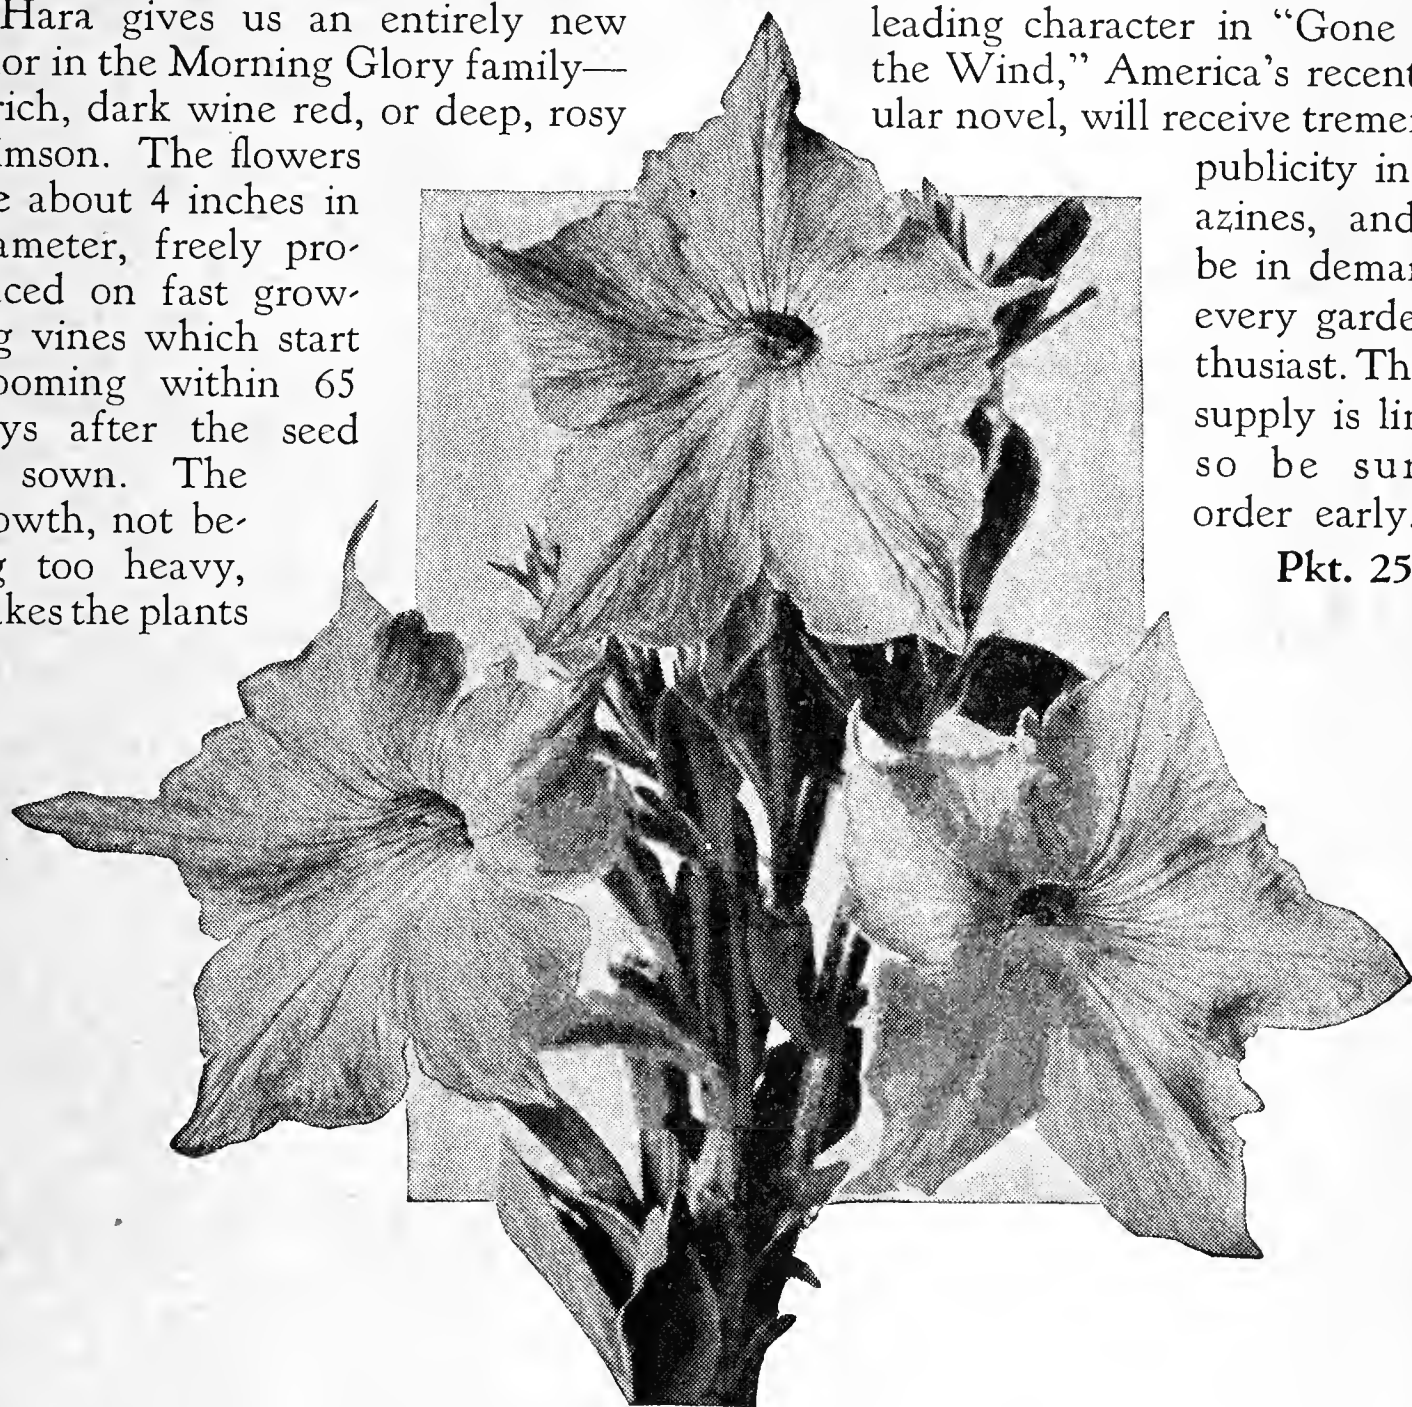

SCARLET O'HARA

4699 *The Gold Medal Winner* for 1939—a well merited honor granted for the first time in two years. Scarlet O'Hara gives us an entirely new color in the Morning Glory family—a rich, dark wine red, or deep, rosy crimson. The flowers are about 4 inches in diameter, freely produced on fast growing vines which start blooming within 65 days after the seed is sown. The growth, not being too heavy, makes the plants

very graceful in appearance. The character of the vine with its beautiful red flowers will present a sightly covering for fence or trellis. It will grow and bloom under a wide variety of conditions. Scarlet O'Hara, named for the leading character in "Gone With the Wind," America's recent popular novel, will receive tremendous

publicity in magazines, and will be in demand by every garden enthusiast. The seed supply is limited, so be sure to order early.

Pkt. 25c

PETUNIA HYBRIDA—Hollywood Star

Petunia Hybrida

HOLLYWOOD STAR

5912 *Awarded a Silver Medal*, this distinctive, lovely Petunia shaped like a five-pointed star is a charming shade of rich rose with a creamy yellow throat. The strong, vigorous plants, with narrow and elongated leaves, are so smothered with blooms that hardly any foliage shows. This variety is absolutely new and distinctive, and it will prove popular for pots, boxes, cutting or bedding. Height 1 ft.Pkt. 25c

Phlox Drummondii Gigantea

SALMON GLORY

6040 *A Silver Medal Winner*, outstanding for its huge flowers, each floret the size of a half-dollar. The color is a pure salmon pink with a distinct creamy-white eye, a most beautiful color combination. It is a prolific bloomer with enormous florets and trusses. Every garden should have a planting of this grand Phlox. It is very worthy for bedding, boxes and cutting. Height 1 ft.Pkt. 25c

Buist's Vegetable Specialties

Buist's Truckers "Early Money" Radish

Buist's Truckers "Early Money" Radish

THIS BUIST Introduction is our own special strain, famous for earliness, shape and fine color. Many varieties have since come into prominence, but this fine, pure strain of "Early Money" introduced by us some time ago continues to be a favorite radish and a standard of perfection. In fact, we have never come across a radish of such unusual merit. Since so many of our truckers insist that our strain is the finest of all forcing varieties we are listing it among our specialties, for it should also be included in every home garden. Striking appearance, with a glow all its own, the roots are a fiery scarlet-red, globular, small, with medium top and threadlike tap root. Flesh white, brittle, very sweet and tender. Ready to pull in three weeks. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

Buist's Super Bonnie Best Tomato

An Improved Big Bonnie

BONNIE BEST was at one time the outstanding tomato of Nationally known varieties. Its popularity waned with the more modern introductions, but realizing its value as a desirable sort, we introduce this year for the first time Super Bonnie Best—a cross with color and flavor of the Bonnie parent, but 25% larger, highly bred, and with deeper, smoother, thicker walls, remarkably free from cracks. The new variety is a second early tomato maturing seventy-five days from plants, and we can recommend it highly as a profitable all-purpose type for market or for canning. It produces high tonnage to the acre, a uniform crop with a heavy crown set, besides the outstanding points of beauty,

quality of flavor and interior color. Fruits bright red, large and perfectly oval in shape, ripening uniformly to the stem. The home gardener likes a nicely shaped tomato with great depth for slicing. You can have it by trying Buist's Super Bonnie Best. Pkt., 10c; $\frac{1}{2}$ oz., 20c; oz., 35c; $\frac{1}{4}$ lb., \$1.15; lb., \$4.00.

Sixty-Day Early Yellow Corn

AS THE name implies, this is the earliest of our yellow sweet corns, producing Bantam quality two weeks earlier. A fine variety for the early gardener to try. In size it is equal to the Golden Bantam and every bit as fine in flavor. Stalks 3 ft. Ears slightly pointed 6 to 7 ins. long with 10 to 12 rows of golden kernels; tender, sweet and delicious if picked just after it turns yellow when in the milk stage. Pkt., 10c; $\frac{1}{2}$ lb., 15c; lb., 30c; 10 lb., \$2.20.

COMPLETE DESCRIPTIVE LIST OF BUIST'S Dependable Seeds

BUIST'S seeds have been giving satisfaction for over a century . . . they are selected with the greatest of care, assuring you a garden of charming beauty and an abundant and most profitable crop.

In addition to detailed planting instructions listed under each variety, we also refer you to the valuable planting chart on Page 143, and the monthly gardening suggestions immediately preceding the chart on Pages 133 to 142, inclusive.

Asparagus Seed

One Ounce for 800 Plants; 4 Lbs. per Acre

Culture—Sow early in the Spring, 1 in. deep in rows 1½ ft. apart and 3 to 6 ins. apart in the row in light rich soil. Cultivate frequently. Transplant to their permanent bed the following Spring, setting the plants as described under Asparagus Roots.

MARY WASHINGTON

3 Years—The most satisfactory strain. Highly resistant to rust and blight, very productive. Plants produce long, thick, heavy shoots with tips firm and tightly folded. The stalks are a dark green, delicious in flavor.

Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00.

PALMETTO

3 Years—A very early and prolific variety producing an abundance of large, deep green shoots delicious in flavor.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

Asparagus Roots

50 Roots Required for 100 Ft.

Culture—Deep loamy soil, thoroughly cultivated and heavily manured is required for a permanent bed. Dig furrows 15 ins. deep, 4 ft. apart, using plenty of manure with 2 ins. of earth on top of the manure. Set the plants 2 ft. apart in the rows, taking care to spread the roots out evenly and level. Cover with 3 ins. of earth and as the plants grow, gradually fill to the surface. Each Spring work in a heavy dressing of well-rotted manure and follow with a light application of salt and wood ashes.

MARY WASHINGTON

Postpaid	\$1.25 per	50 roots;	\$2.00 per	100 roots
Not Prepaid	\$1.75 "	100 "	\$12.00 "	1000 "

PALMETTO

Postpaid	\$0.90 per	50 roots;	\$1.75 per	100 roots
Not Prepaid	\$1.50 "	100 "	\$10.00 "	1000 "

Artichoke

One Ounce for 500 Plants

Culture—A tasty vegetable grown for its edible flower heads which are cooked like asparagus. Sow early in Spring in light, rich and rather moist soil in rows 8 ins. apart. Transplant the seedlings or sets 4 ins. deep in rows 4 ft. apart and 1½ ft. apart in the rows. A perennial not hardy in the North and requires renewing every three years.

LARGE GREEN GLOBE

1 Year—Spiny plants with deep green, globe-shaped edible flower heads. Perennial, maturing second year.

Pkt., 10c; oz., 45c; ¼ lb., \$1.50.

Mary Washington Asparagus

Buist's Garden Beans

Produce Snappy Tender Pods of the Best Quality

AMONG our specialties are our own grown Beans of Northwestern and California origin, all produced from the best stock seeds on irrigated, disease and pest free land of high elevation that makes the hardiest and finest seed available.

Dwarf or Bush Beans

2 Lbs. per 100 Feet; 90 Lbs. per Acre

Culture—Plant when the ground is warm, as Beans are very sensitive to cold and wet weather. Sow in well prepared soil, in rows 2 to 2½ ft. apart, covering the seed 1½ to 2 ins. deep, and thin the plants to stand about 2 to 3 ins. apart in the rows. Give frequent but shallow cultivation till blossoming time, but only when the plants are dry. If cultivated when wet, they will be damaged by rust. For a constant supply of fresh beans sow every 2 weeks up to August 1st.

Green Podded Varieties

BUIST'S PROLIFIC STRINGLESS

54 Days—A superior stringless variety unsurpassed for home or market garden. Plant large, sturdy and very productive. Pods round, dark green, 6 ins. long, straight, tender, brittle and stringless. Quite fleshy and a delicious flavor.

BOUNTIFUL

50 Days—The best flat podded green bean, early and very popular among market gardeners and shippers; likewise for home gardens. The plant is large, stocky and prolific, practically immune to rust and mildew. Pods flat, light green, 6 to 7 ins. long, broad, stringless, very slightly fibrous, but tender and tasty.

STRINGLESS GREEN POD

52 Days—A favorite and one of the finest pod varieties for the home garden, market gardener and canner. Plant is large, hardy and a heavy yielder. Pods round, medium green, 5½ ins. long, slightly curved, thick, meaty and juicy, perfectly stringless and fiberless. Brittle, tender and tasty. Seeds coffee brown.

GIANT STRINGLESS GREEN POD

54 Days—An excellent variety for both early and late planting, very desirable for home, market gardeners, canning and shipping. Pods round, medium green, 6 ins. long, fairly straight, brittle, very fleshy and entirely stringless. Seeds light brown.

Stringless Green Pod Beans

TENDERGREEN

54 Days—A bean of unusual merit, bearing a heavy crop of early beans and remarkable for both heavy yield and delicious quality. Valuable for home and market gardeners. Plant strong, vigorous, with growth well branched. Pods round, light green, 5½ ins. long, straight, fleshy, tender and strictly stringless.

STRINGLESS BLACK VALENTINE

50 Days—A wonderful improvement over the old Black Valentine. Early, prolific, hardy and productive, ideal for truckers and early shippers. Pods oval, dark green, 6 ins. long, slightly curved and entirely stringless.

Dwarf Green Pods

(Continued)

FULL MEASURE

54 Days—A high quality, well-known variety for home, market garden and canning, recommended for second and late planting. Bears continuously throughout a long season. Plant large, erect and prolific. Pods round, medium green, 6 ins. long, straight, very fleshy, stringless, fine grained and tender.

EARLY RED VALENTINE

52 Days—A very early standard variety used extensively in the South for home garden. Plant medium, erect, very hardy, resistant to disease and will thrive on any kind of soil. The seed will germinate in cold ground when other varieties would rot. Pods round, crease-backed, 4½ ins., long, curved, slightly stringy, meaty and have distinctive flavor.

TENNESSEE GREEN POD

54 Days—Very popular in some sections of the South and sometimes called Dwarf Kentucky Wonder. Plant medium large, spreading, hardy and productive. Pods flat, broad and quite irregular in shape, medium green, 6 to 7 ins. long, curved, slightly stringy, but of good flavor.

STRINGLESS GREEN REFUGEE

70 Days—A decided improvement over the old Refugee or 1000 to 1 bean, being stringless and more tender. Very desirable for home, market gardeners and especially canning. Ideal for fall planting. Pods round, medium green, 5 ins. long, absolutely stringless, without fiber, very fleshy, brittle and fine grained.

DWARF HORTICULTURAL OR SPECKLED CRANBERRY

54 Days—A desirable sort for home and market gardener. Plant of medium height and prolific. Pods semi-round, green when young, changing to greenish yellow splashed with carmine, at maturity; 5 ins. long, stringless and while somewhat fibrous, it is popular in many markets and can be used either as snaps in the green state or shelled green or dry.

FRENCH'S HORTICULTURAL

65 Days—A prolific green shell variety. Plant erect and compact with short runners. Pods semi-round, 7 ins. long, slightly curved, green with a splashing of deep carmine. Fibrous and stringy.

Tendergreen Beans

Shell Beans

For Winter Use—Ripe in 90 to 100 Days

LARGE WHITE MARROW

The standard dry shell bean used for baking and soup. Vine large, slender, spreading with short runners, hardy and productive.

WHITE NAVY OR BOSTON PEA BEAN

This small shell bean will out-yield all others. Excellent for use as baked beans. Plant large, spreading with many runners.

WHITE KIDNEY

An excellent dry shell bean used for baking and soup. Plant bushy, vigorous and productive. Seed large, white, kidney-shaped.

RED KIDNEY

Same habit as White Kidney, except the bean is red in color. Used for baking.

Dwarf Horticultural, French's Horticultural, Davis Kidney Wax, Pole Horticultural and Lazy Wife Pole besides being splendid green shell and snap-shorts are also used for dry shell beans.

Wax Podded Bush Beans

ROUND POD KIDNEY OR BRITTLE WAX

52 Days—This variety has the highest table quality and is recommended for the home garden and for canning. Plant is erect and a prolific bearer. Pods handsome in appearance, round and thick, waxy light yellow, 5½ to 6 ins. long, slightly curved, extremely brittle, fleshy, absolutely stringless and fiberless.

SURE CROP STRINGLESS

53 Days—This variety is well adapted for market garden purposes because of its vigorous growth, productiveness and hardiness. Pods are thick and flat, rich yellow, 6 ins. long, slightly curved, brittle, entirely stringless, very little fibre, fine texture and quality. Also called Bountiful Wax.

PROLIFIC BLACK WAX

51 Days—A good early variety for home and market garden use. Plant small, heavily productive over a long period. Pods round, deep yellow, 5 ins. long, somewhat curved, fleshy, entirely stringless, free from fibre, tender and of fine quality.

NEW STRINGLESS KIDNEY WAX

52 Days—A long-podded wax bean, excellent for home, market garden and canning. Plant large, erect and highly productive. Pods semi-round and broad, clear yellow, 6 ins. long, straight, stringless, brittle, fleshy and of fine flavor.

Best of All
Wax Beans

"BEST OF ALL" STRINGLESS WAX

53 Days—We recommend this variety to shippers and market gardeners as the best flat podded wax bean. Very early and entirely free from rust and blight and will withstand cold, wet weather to a remarkable degree. Plant large, sturdy; very productive. Pods golden yellow, 6 ins. long, straight, brittle, strictly stringless, fine texture and delicate flavor.

PENCIL POD BLACK WAX

52 Days—The best black-seeded round podded Wax Bean for home use, the market gardener and shipping. Plant stocky, vigorous and strongly productive. Pods golden yellow, 6 ins. long, slightly curved, absolutely stringless, without fibre, brittle, very tender and excellent quality.

Round Pod Kidney or Brittle Wax Beans

Unrivalled Wax Beans

RUST PROOF GOLDEN WAX

50 Days—Highly disease-resistant and a splendid home garden variety. Plant compact and strongly productive. Pods are thick and flat, golden yellow, 4½ to 5 ins. long, straight, brittle, stringless, fleshy, nearly fiberless and a rich butter flavor.

DAVIS KIDNEY WAX

52 Days—Considered one of the most attractive early wax beans. Plants large, hardy, vigorous and very productive. Pods thick and flat, light yellow, 6 ins. long, slightly curved; brittle, fleshy and tender when young, but become somewhat fibrous and stringy. Seeds white and kidney shaped; excellent for baking.

WARDWELL'S KIDNEY WAX

53 Days—Valuable for home and market garden use. Plant medium and sturdy. Pods flat, deep, golden yellow, 6 ins. long, almost straight, brittle, stringless, of fine texture. The attractive pods find a ready sale in the market.

CURRIES RUST PROOF WAX

50 Days—Popular with market gardeners because of its earliness and productiveness. Plant dwarf, compact and hardy. Pods flat, light yellow, 6 ins. long, almost straight, stringy and somewhat fibrous.

Wax Podded Bush Beans

UNRIVALLED WAX

50 Days—An extremely prolific and early variety, particularly desirable for truckers and shippers. Plant dwarf, stocky, highly productive and quite free from rust. Pods light yellow, flat and slender, 5 ins. long, slightly curved, stringless when young, brittle and tender.

HODSON WAX

65 Days—A late shipping variety. Plant large, of sprawling habit, vigorous and very productive. Pods flat, light waxy yellow, 6½ ins. long, slightly curved and slender, tender when young, but stringy and fibrous later.

CRACKER JACK OR WEBBER WAX

54 Days—Early and productive, free from blight and rust proof. Popular for either private or market gardeners. Plant medium, erect and compact. Pods thick and flat, bright yellow, 6 ins. long, curved, stringless when young and somewhat fibrous.

Pencil Pod Wax Beans

Bush Lima Beans

Fordhook Bush Lima Beans

2 Lbs. Will Plant 100 Ft.; 60 Lbs. per Acre

Culture—The dwarf lima bears much earlier than the pole lima and does not require any support. Plant when the ground has become thoroughly warm, as the seeds will rot in cold ground. Sow 1½ to 2 ins. deep on well-enriched land in rows 3 ft. apart, dropping the beans 6 ins. apart with eye down. Cultivate frequently, but only when the leaves are dry.

IMPROVED BUSH LIMA

75 Days—An improvement over the Burpee's Bush, slightly earlier and larger. Plant sturdy, vigorous and very productive. Pods 5 ins. long, contain 3 to 4 beans, flat but thicker than Burpee's Bush.

BURPEE'S BUSH LIMA

77 Days—Produces beans as large as the Pole Lima. Plant about 20 ins. high, of stout growth, erect and branching into a bush from 2 to 3 ft. in diameter, very productive. Pods 4½ ins. long, contain 3 to 4 flat, large beans of splendid quality.

JACKSON WONDER OR CALICO BUSH

65 Days—Resembles Henderson's Bush in character and growth. Very early, prolific and drought-resisting. Seed is rust brown, dappled or streaked with dark purplish markings.

FORDHOOK BUSH LIMA

75 Days—The most popular variety for the home gardener and used extensively by market gardeners and shippers. Plant large, upright, vigorous and very productive. Pods are 4 to 4½ ins. long, contain 3 to 4 thick-seeded beans which are of a delicious nut-like flavor.

BUIST'S SUPERBA GIANT PODDED

75 Days—The largest podded Bush Lima. Very prolific, maturing 15 days earlier than any large podded pole limas. Possesses all the good qualities of pole limas and similar in flavor. Plant large, upright and vigorous, about 2 ft. in height. Pods 5 ins. long, contain 4 to 5 thick, flat beans.

HENDERSON'S BUSH LIMA

65 Days—The original Bush Lima, known through the South as the "Dwarf Butter Bean," where it is used in every home garden. The popular Baby Lima used by canners and also commercially as a dry shell bean. Plant small, erect, bushy, very early. Pods 3 ins. long, contain 3 to 4 flat, small beans.

WOOD'S PROLIFIC BUSH LIMA

69 Days—Similar to Henderson except that the plant, pod and seed are somewhat larger.

Pole or Running Snap Beans

1 Lb. for 100 Poles; 30 Lbs. per Acre

Culture—Pole Beans are rank growers and they yield heavily on fertile, well-enriched ground. Start planting about a week later than the bush varieties, since they are less hardy.

Wax Podded Varieties

KENTUCKY WONDER WAX

68 Days—The popular wax podded pole bean. Plant vigorous and productive. Pods flat, waxy-yellow, 8 ins. long, slightly curved, nearly stringless, somewhat fibrous, meaty and of excellent quality. Seeds chocolate brown.

GOLDEN CLUSTER WAX

74 Days—A good bean for snap or shelling, both green or dry. Plant prolific. Pods flat, waxy-yellow, 7 ins. long, stringless and fiberless.

Set the poles 3 to 4 ft. apart and plant six to eight beans 1½ to 2 ins. deep, thinning when well started to the four strongest. They may be planted in rows 6 ins. apart and supported by wire fences or trellises. So popular in the South that most growers use one or more of these varieties in their garden. The cornfield varieties are planted in the corn and allowed to run up the stalks.

Green Podded Pole or Running Snap Beans

KENTUCKY WONDER

65 Days—The best of all and most popular of the green podded running beans. Unexcelled for home, market garden and for canning. Plant a hardy, strong climber that continues to bear until frost. Pods round, 8 to 10 ins. long, curved and saddle-backed; stringless when young, very fleshy, fiberless, brittle and of superb flavor when cooked.

Kentucky Wonder Pole Beans

IDEAL MARKET OR BLACK VALENTINE POLE

58 Days—Particularly desirable for home garden and truckers, being a week earlier than Kentucky Wonder. Plant hardy and vigorous. Pods round, 6 ins. long, slightly curved, meaty, tender and stringless when young. Seeds solid black.

LAZY WIFE

72 Days—Excellent for the home garden as a snap, green or dry shell bean. Medium late, but very productive. Pods thick and broad, glossy green, 6 ins. long, straight, fleshy, little fibre, stringless when young, fine texture and quality.

BROWN SICKLE

70 Days—An attractive large variety bearing handsome beans. Plant medium, good climber and moderately productive. Pods round, light green, 8 ins. long, curved, twisted and stringless when young.

WHITE CREASEBACK OR CORNFIELD

62 Days—An early, vigorous bean moderately productive. A good snap bean and fine for canning. Small white seed, excellent for baking. Pods round, dull green, 5½ ins. long, curved, fleshy, quite stringless, brittle and tender.

TENNESSEE WONDER OR EGG HARBOR

70 Days—The largest and handsomest of the vining varieties. Plant medium, good climber and moderately productive. Pods round, light green, 8 ins. long, straight crease-backed, fleshy, brittle and tender, stringless when young.

McCASLAN

65 Days—An early maturing, prolific bean, excellent for home and market garden as a snap or dry shell bean. Pods thick and flat, deep green, 8 ins. long, curved, very meaty, stringless, tender and of good quality.

WHITE SEEDED KENTUCKY WONDER

64 Days—Bears continuously. A snap bean of excellent flavor and quality and good for dry shell use. Pods round, silvery green, 7 ins. long, almost straight, tender, fleshy, fiberless and stringless.

NANCY DAVIS OR STRIPED CREASEBACK

72 Days—A splendid type to plant in the cornfield. Very prolific and vigorous in growth. Pods round, medium green, 6 ins. long, straight, fleshy, tender, somewhat stringy and good quality.

HORTICULTURAL POLE

70 Days—Also known as Wren's Egg, Cranberry and October Beans. Well known and used as a snap and green or dry shell bean. Plant hardy and vigorous. Pods flat, oval, 6 ins. long, straight, slightly fibrous, fleshy and of good quality.

RED SPECKLED CUT SHORT

72 Days—A later variety used largely in the South for planting amongst corn. Pods round, dark green, 4 ins. long, straight and productive.

BUIST'S SOUTHERN CORNFIELD

62 Days—An excellent early snap for home or market garden. Seeds small, oval, white and fine for baking. Plant extremely productive. Pods round, light green, 5½ ins. long, curved, tender, brittle and nearly stringless.

Pole Lima Beans

1 Lb. for 100 Hills; 30 Lbs. per Acre

Culture—Pole Limas require rich loamy soil and, being less hardy than the Bush type, should not be planted until the ground is thoroughly warm. They are vigorous growers and require 8 to 10 ft. strong poles set 4 ft. apart each way. Plant 4 to 6 beans around each pole, placing with eyes down and cover with 1½ to 2 ins. of soil. When well started, thin to 3 plants to a pole. Use rich, well-rotted compost to each hill and cultivate often.

BUIST'S MAMMOTH PODDED IDEAL

90 Days—The largest pod and most valuable for home and market garden, outyielding any other variety. Vine vigorous and productive, bearing large clusters of broad pods 6 to 8 in a bunch. The beans are easily shelled and of handsome appearance. Pods broad, 7 ins. long, well filled with 5 to 6 large flat beans, pale green in color and of a rich buttery flavor. Be sure to plant Buist's Ideal.

KING OF THE GARDEN

88 Days—A very popular variety and the most widely used of all Pole Limas, retaining their green color when cooked. Vine vigorous and heavily productive. Pods 6 ins. long, contain 4 to 5 flat beans.

CARPINTERIA

88 Days—Another green seeded variety, very productive and highly recommended. Pods 5 ins. long, contain 4 large, flat beans.

EARLY LEVIATHAN

80 Days—The best of all early sorts equal to the main crop varieties in productiveness. Vine tall, vigorous and prolific. Pods 5 ins. long, contain 5 flat beans.

EXTRA EARLY JERSEY

80 Days—An early and productive variety frequently ready for picking by the middle of July. Pods 4 to 4½ ins. long, contain 4 to 5 flat beans.

SALEM MAMMOTH

80 Days—Remarkable for the large size of both pods and beans, as well as for its earliness. Pod 5 ins. long, contain 5 flat beans.

FORD'S MAMMOTH

88 Days—A heavy yielding variety with a prolific vine and large beans. Pods 5 to 6 ins. long, contain 4 to 5 flat beans.

DREER'S OR CHALLENGER

80 Days—Also known as the Potato Lima, entirely distinct. Vine vigorous, hardy, a good climber and very productive. Pods 4 ins. long, contain 3 to 4 thick-seeded beans which are similar in shape and flavor to the Fordhook Bush Lima.

CAROLINA SIEVA OR SMALL WHITE

77 Days—Very similar in form and size to the Hendersons Bush Lima. Well known in the South, where it is cultivated extensively as the Pole Butter Bean. This variety is a continuous bearer, very early and more prolific than the large lima sorts. Pods 3 ins. long, borne in clusters, contain 3 to 4 small flat beans.

FLORIDA BUTTER SPECKLED

78 Days—A popular variety for the South. Has all the characteristics of the Carolina or Sieva in size and productiveness, except the seeds are creamy white with variegated markings of brown and black.

Buist's
Mammoth
Podded Ideal
Pole Lima Beans

Table Beets

Grown from Selected and Transplanted Roots

2 Ozs. per 100 Ft.; 8 to 12 Lbs. per Acre

Culture—Little skill is necessary for the cultivation of this root vegetable. For an early crop dig or plough deep and manure well. Plant seed as early in the Spring as the soil will permit working. Sow in rows $1\frac{1}{2}$ to 2 ft. apart, $\frac{1}{2}$ to 1 in. deep, pressing the soil firmly over the seed. As soon as the beets have formed a few leaves, thin out to 3 to 4 ins. apart in the row. Cultivate and weed frequently. To enjoy delicious beets, pull quite young when about 2 ins. in diameter. Successive sowings can be made until late July. The roots will continue to develop until the end of October. Early beets become too tough to carry over the Winter and we recommend planting main crop varieties if intended for Winter storing, such as Detroit, Buist's Ideal Dark Red and Half Long Blood, 2 months after the early sowings. On the approach of frost, take up the roots and cut the leaves off 2 ins. above the crown, store them in pits secure from frost, or cover with earth or sand in a cool, dry cellar.

CROSBY'S EARLY EGYPTIAN

55 Days—An improved strain of the Early Egyptian, but producing a deeper or thicker root. More globular in shape, with small tap roots, flesh bright blood with some light zoning; sweet, smooth, tender and of exceptionally fine quality. An early variety recommended for home and market garden use.

BUIST'S SPECIAL CROSBY'S EGYPTIAN

55 Days—A very fine selection of the Crosby's Egyptian that will please the most critical. Tops erect and medium small. Roots semi-globular, flesh dark vermilion red with zones a trifle lighter in shade. Very tender and uniformly sweet quality. It is a rapid grower, attaining a salable size quicker than most sorts.

LENTZ EXTRA EARLY RED TURNIP

50 Days—This variety is a very rapid grower, forming marketable-sized roots in six weeks from sowing. Tops medium, leaves green. Roots turnip-shaped; flesh purplish red, zoned almost white. Very sweet in flavor and retains a bright blood red color when cooked.

EXTRA EARLY EGYPTIAN

50 Days—A very early variety. Tops small and erect. Roots flat on bottom, rounded on top, flesh bright blood red with lighter zones. Fine for forcing or early table use.

BUIST'S EXTRA EARLY TURNIP

50 Days—A profitable beet to grow for the early market, forces well in frames. Tops medium size, leaves bright green. Roots thick, slightly top shape; flesh light purplish red, zoned almost white, crisp, tender and very sweet.

EXTRA EARLY TURNIP OR BASSANO

50 Days—This variety when young is very sweet and tender. The roots attain a large size and are light red in color; flesh is white circled with bright pink.

Buist's Perfect Model Beet

BUIST'S PERFECT MODEL

55 Days—This famous variety is an improved strain of our "Shull's Model Beet," introduced by us in 1886 and by careful comparison has proven to be the best early variety for market gardeners. For the home garden it is especially desirable because of its exquisite quality, being sweet and finely grained. It is a good keeper and may be used all Winter. Its uniformity in shape and medium size makes it a very desirable market beet. Tops are small and growth upright. Excellent for bunching. Roots nearly globe-shaped, blood red with small tap root, flesh rich, blood-red with zones of somewhat lighter shade.

EARLY WONDER

55 Days—One of the earliest bunch beets in cultivation, a splendid variety for truckers and shippers as a first early variety; also for late planting. Roots semi-globular with a small tap root; flesh blood red with zoning of a lighter red; tender, smooth and deliciously sweet.

EARLY ECLIPSE

55 Days—A valuable early variety for either market or private gardeners; remarkable for its rapid growth, perfect form and delicious flavor. Foliage dwarf, roots globular of medium size and a bright, glossy red; flesh bright red with lighter zones.

Detroit
Dark Red

DETROIT DARK RED

55 Days—This splendid second early beet we highly recommend as the outstanding variety for home and market garden use. Tops small and upright in growth. Fine for market bunching. Roots globular, very smooth, with small tap roots; flesh deep ox-blood with inconspicuous zoning of slightly lighter hue. Used by canners because of its good deep red color.

LUTZ'S GREEN LEAF

70 Days—An excellent late variety for Fall and Winter use. Leaves glossy green suitable for "greens." Roots half long, top-shaped; flesh rich, dark red without zones. Always a tender, sweet and delicious beet whether pulled young or old. A splendid winter keeper.

EARLY DARK BLOOD TURNIP

55 Days—A popular variety for all-around use. Roots round, slightly flattened; flesh dark red. Very sweet and delicious in flavor. It is adapted for Summer or Winter use.

GOOD FOR ALL

55 Days—A selection of Detroit especially desirable for the home garden. Can be pulled when 1½ ins. in diameter; fine for canning or pickling. Roots almost globular, smooth and even; flesh deep crimson-vermilion; free from light zones.

Table Beets (Continued)

BUIST'S IDEAL DARK RED

55 Days—An ideal beet because of its dark-red color, which is the outstanding feature in a good beet for either the market, canning or home garden; very sweet and tender. Sow in late July for a Winter crop.

WINTER KEEPER

65 Days—A long season beet remaining solid and tender until late Fall and one of the best for a Winter supply. Roots almost globular, flesh a rich, dark red without light zones.

HALF LONG BLOOD

70 Days—A beautiful half-long variety, maturing earlier than other long beets and very desirable for both Fall and Winter use. Foliage rich crimson, roots tapering, flesh a very dark blood-red.

BUIST'S IMPROVED LONG BLOOD

80 Days—An excellent late variety, resisting drought better than any other sort and well suited for Winter storage. Tops large; roots 10 to 15 ins. long, dark purplish red. Flesh deep blood red, tender and sweet.

Swiss Chard or Spinach Beet

2 Ozs. per 100 Ft.; 8 to 10 Lbs. per Acre

This beet produces tops only and is used for greens, the leaves cooked and served the same as spinach and the stalks or midribs prepared in the same way as Asparagus.

Culture—Sow ½ to 1 in. deep early in the Spring in rows 1½ to 2 ft. apart and thin out to 6 ins. apart in the row. Cultivate frequently and cut the leaves when large. New leaves will continue to grow and repeated cuttings can be made.

GIANT LUCULLUS

50 Days—The largest and most popular variety desirable for home and market garden use. The plants grow 2½ ft. high, very erect; leaves yellowish-green, heavily crumpled, stems thick, broad and light green.

LARGE RIBBED, DARK GREEN

50 Days—A very strong grower with dark glossy green, smooth leaves; stems and midribs light green, broad and fairly thick.

Mangel Wurzel Beets

for Stock Feeding

2 Ozs. per 100 Ft.; 8 to 10 Lbs. per Acre

MANGEL WURZEL, also called Mangel or Stock Beet, is very valuable for stock feed. The roots excel as a Winter keeper, giving an im-

mense yield of food at small cost for cattle, hogs, sheep and poultry. They keep cattle in a healthy condition, increase the yield of milk and save fodder. In feeding stock, they should be sliced and are even better if steamed and mixed with bran. Sugar beets are desirable not only for sugar making but for stock feeding the same as Mangels.

Culture—Plant the same as for table beets except that the rows should be 2½ ft. apart and thinned to 6 ins. apart. Cultivate frequently.

GOLDEN TANKARD

100 Days—A distinct type of Mangel, largely grown by dairymen and sheep raisers; the former prize it, not only for its great yield, but for the rich character of the milk it produces. Roots large, nearly cylindrical, deep orange, grows partly above ground; flesh yellow with white zones.

GOLDEN GLOBE

100 Days—If your soil is inclined to be shallow, grow this variety to produce the largest yield. Roots are round, beautiful shape, color light yellow. Grows partly above ground, flesh yellow and of immense size.

KLEIN WANZLEBEN SUGAR

90 Days—Grown in many sections for sugar, as it contains a high percentage of sugar; is also good for stock feeding. Roots long with thick shoulder, tapered; skin grey-white; flesh solid white. A heavy yielder.

GIANT HALF SUGAR

90 Days—A variety combining the best qualities of Sugar Beets and Mangels. A heavy yielder, used largely for stock feeding. Roots long, oval, tapered; skin white with rose tinted shoulder; flesh white, rich in sugar.

Buist's Chirk Castle Mangel

Buist's Golden Globe Mangel

CHIRK CASTLE

110 Days—A selection of the Mammoth Long Red which originated in Scotland. Its size is enormous and the productiveness unequalled. Specimen roots have been grown weighing 56 lbs. and a whole crop averaged 38 lbs. per root. It requires no more labor or care in its cultivation than other mangels, but its yield is heavier than any other variety. Skin light red; flesh white with rose tinge.

MAMMOTH LONG RED

110 Days—This famous variety is the result of continuous and careful selection. The characteristic of our stock is the broad shoulder and massiveness of the root, by which a greater weight is obtained without the coarseness which appears to be inherent in many stocks of Long Mangel. It is especially adapted to deep, rich soil. The production is enormous, a single root weighing from 25 to 30 pounds with yields of 30 to 50 tons per acre. Roots long and tapering, grow half above ground; color light red; flesh white with rose tinge.

Buist's Seeds Sure to Grow

Early Green
Calabrese Broccoli

Broccoli

THERE are several strains of Broccoli, principal distinction being in the edible formation. Some varieties produce large heads, some small heads or sprouts; others only edible leaves or what is known as salad types.

EARLY ITALIAN GREEN SPROUTING OR CALABRESE

1 Oz. for 2000 Plants; 4 Oz. per Acre

90 Days—The leading and popular variety used by market gardeners, shippers and in home gardens. This true type produces a bluish, green head at the center of the plant. After this head is cut many branches and smaller lateral heads appear which are as desirable as the first head. Continues to bear until frost. Can be cooked and served like either Asparagus or Cauliflower. It has a distinctive flavor; very tasty and palatable.

Culture—Sow seed $\frac{1}{2}$ in. deep in frames early in the spring or outdoors in the open ground in May and transplant like Cabbage, $1\frac{1}{2}$ to 2 ft. apart in rows 2 to 3 ft. apart.

ST. VALENTINE

1 Oz. for 2,000 Plants; 4 Ozs. per Acre

150 Days—A Cauliflower type of Broccoli. Forms heads almost the equal of Cauliflower; creamy white, very compact, firm and of excellent quality. Prefers a warm climate and requires a long growing season.

Culture—Same as for Cauliflower.

BROCCOLI RAPA

An early type of Sprouting Broccoli producing numerous, small green heads which are cut while green with 10 inches of stalk. Also known as 40 Day Spring Broccoli Raab.

SALAD or TURNIP LEAF BROCCOLI

This is the variety grown extensively on the Eastern Shore of Virginia called "Broccoli." It does not produce sprouts like the Calabrese, but yields an abundance of leaves which are cooked and served as salad greens. It bears yellow blossoms before going to seed.

Culture—1 oz. per 100 ft., 2 lbs. per acre. For Fall and early Spring planting cultivate the same as turnips.

Brussels Sprouts

1 Oz. for 3,000 Plants; 4 Ozs. per Acre

ONE of the most popular Winter vegetables, resembling cabbage in taste, but more delicate and delicious in flavor. The sprouts form like miniature cabbages clustered around the stalk of the plant. Grow where conditions are favorable for late cabbage. Requiring the same method of culture, the heads, from 1 to $1\frac{1}{2}$ ins. in diameter, mature best in the Autumn and are ready for use as soon as they have had a touch of frost.

LONG ISLAND IMPROVED

125 Days—The leading variety for home and market gardener. Plants 2 ft. tall of dwarf, robust habit. Stems thickly set with large, solid sprouts.

DALKEITH

125 Days—Of dwarf habit, forming compact, heavy sprouts of fine quality.

PARIS MARKET

125 Days—A half dwarf variety producing a heavy crop of tasty and tender sprouts.

Buist's American Grown Cabbage Seed

First Early Varieties

Buist's Early Jersey Wakefield

1 Oz. for 2,000
Plants; 4 Ozs.
per Acre

OUR Cabbage seeds are all grown from seed stock of finest quality, carefully inspected while growing. The choicest heads are selected for storing over Winter and replanted the following season for seed. Constant re-selection from the seed growing stock is required to maintain quality. No finer or purer strains of cabbage can be found anywhere than the Buist's high bred "Prize Medal" American-grown stocks.

Culture—For early Cabbage sow 1/2 in. deep under glass toward the end of February and as the plants grow, harden them to the full exposure of the air, protecting them from frost until the early Spring, when they should be transplanted into rows 2 to 3 ft. apart and 18 ins. in the row.

For late Cabbage sow in the open ground from the middle to the end of Spring and set the plants out in June or July during moist weather, giving them a thorough watering at time of removal. Plant 3 ft. apart and 2 ft. in the row. Seedlings from late sowings are often destroyed by the cabbage fly, which necessitates sowing sufficient seed for surplus plants.

For Fall-grown plants sow the seed in September. In mild climates they should be planted out late in Autumn, to remain for heading. In cold latitudes they must be protected in cold frames and transplanted in the open ground early in Spring. Good heads, of course, can only be obtained when the ground has been well worked and highly fertilized. In setting out, cover to the first leaf-stems so that the stem is all under ground. Cultivate frequently to maintain moisture.

BUIST'S SELECTED EARLY JERSEY WAKEFIELD

70 Days from Plants—The finest strain of this most popular and extensively used early Cabbage. The demand is great in all markets and it is more largely grown than all the other first early cabbages combined. Plants small with short stems permitting close setting in the row. Heads of medium size, conical in shape, extremely solid with little outside foliage, and excellent in quality. Its exceeding hardiness and assurance of always forming a fine solid head, makes it the most profitable early variety to grow. This special stock or strain is famous everywhere with market gardeners, shippers and home gardeners. It is sold only in sealed packages.

CHARLESTON OR LARGE WAKEFIELD

75 Days from Plants—This famous variety has all the fine qualities of the Early Jersey Wakefield, with heads much larger, less pointed and remarkably uniform in size and shape. About a week later than Jersey Wakefield and very popular with market gardeners and shippers. Used extensively in the South.

EARLY WINNINGSTADT

75 Days from Plants—A very dependable cropper of excellent quality, valuable for shipping as well as for home and market garden. A sure header, very solid, fine grained, conical shape, broad at the base with a distinct twist at point of the head.

EXTRA EARLY JERSEY WAKEFIELD

63 Days from Plants—Identical with Early Jersey Wakefield except that it will cut a week earlier and has a slightly smaller head. Try this variety for earliness, it is profitable for either market or family use.

First Early Varieties of Cabbage

Copenhagen Early Market Cabbage

GOLDEN ACRE

65 Days from Plants—A real money cabbage that spells prosperity for the market gardener. Its excellent quality and uniformity commands a price. Recommended highly by all who have grown it. An extra early Copenhagen Market Type, ten days earlier, and used by truckers for the earliest markets. The heads are not quite so large as the Copenhagen, but more uniformly round, maturing with Early Jersey Wakefield.

SPECIAL GOLDEN ACRE

60 Days from Plants—This special strain is selected to produce earlier and somewhat smaller heads than the regular stock of Golden Acre. Superior in quality, earliness, uniformity of size and time of maturity and should be used by truckers for the earliest markets. The heads are round, solid, with few outer leaves.

COPENHAGEN EARLY MARKET

75 Days from Plants—It is one of the earliest and largest of all the early round-headed varieties. It matures so uniformly that the entire crop is ready for cutting at one time and it is as early as the Charleston Wakefield. The plants are short-stemmed, producing heads close to the ground that average eight pounds. The dish-shaped leaves are light green and round, and fold tightly together which allows the plants to be set closer together than other early varieties. The round heads are of a very solid, superior quality. An excellent variety for early shippers, market and home gardeners.

Yellows-Resistant Cabbage

If you are in localities infested with "cabbage yellows," where non-resistant strains fail, use these varieties.

JERSEY QUEEN

75 Days from Plants—An early yellows-resistant strain which can be used in place of Early Jersey Wakefield. It is similar in shape, but slightly later and smaller.

MARION MARKET

85 Days from Plants—A mid-season yellows-resistant strain of Copenhagen Market, maturing about 10 days later. Heads solid and excellent in quality.

WISCONSIN HOLLANDER

110 Days from Plants—A late yellows-resistant strain of Danish Ball Head with the same characteristics. Splendid late cabbage for storage, shipping or kraut manufacturers.

Plant Buist's Reliable Seeds

19

Second Early Varieties of Cabbage

BUIST'S PRIZE SUCCESSION

88 Days from Plants—A thoroughbred second early Cabbage, pronounced by experts as the most perfect type grown. Especially recommended for uniform size and shape, about a week later than Early Summer, but much larger heads, averaging 10 to 12 ins. across and 10 to 12 pounds in weight. Heads large, flat and thick; 8 ins. deep and stem short. A cropper under all conditions, doing well in all seasons, no matter when planted.

ALL HEAD EARLY

80 Days from Plants—One of the earliest of the large heading Summer varieties and we recommend it highly for home and market garden. Equally good for Summer as well as Winter keeper. Its uniformity in size and color make it valuable for kraut.

BUIST'S EARLY FLAT DUTCH

90 Days from Plants—Our stock of this popular variety is sold in sealed packages only. Similar to Late Flat Dutch, but earlier with heads averaging a little smaller. A sure header and heat-resistant. The heads are large and flat, 6 ins. deep, firm and keep well. Extensively planted, especially in the South.

BUIST'S EARLY DRUMHEAD

90 Days from Plants—A popular variety, especially for the South as it withstands the heat remarkably well. Sold in sealed packages only. It is 2 to 3 weeks earlier than the Late Drumhead and forms a large, solid, flat but deep head.

GLORY OF ENKHUIZEN

85 Days from Plants—A hard heading variety used largely for kraut, but also popular for home and market gardener. Heads large, round, 8 to 9 ins. in diameter, weighing 8 to 10 pounds. Very solid, with few outer leaves. Exceedingly tender and fine flavor.

ALL SEASONS

90 Days from Plants—One of the best general purpose cabbages that can be raised either for an early, intermediate or late crop. Remarkably thrifty in hot dry weather and a sure header. Excellent quality, a good keeper and very popular with makers of kraut. Heads are large; very solid; 7 ins. deep, fine grain and remain perfect a long time without bursting.

EARLY SUMMER

76 Days from Plants—A very popular, quick heading, second early variety of excellent quality. Valuable for home and market garden use since its heading season is between Jersey Wakefield and Early Flat Dutch. Medium sized heads; globular, with flattened top; solid and compact. Leaves turn into the heads almost as soon as formed, which permits close planting.

SUCCESSION

88 Days from Plants—A well-known, desirable variety noted for its ability to thrive under all weather conditions. A sure header and a good keeper of excellent quality. Heads large, flat, and thick; 7 ins. deep, short stem.

Buist's Prize Succession Cabbage

Cabbage—Late or Winter Varieties

Buist's Late Flat Dutch Cabbage

BUIST'S FLORIDA HEADER

100 Days from Plants—This variety, which we introduced has become famous throughout the South and has met every demand for a first-class, sure-heading variety. The Southern growers say they have never had any variety to equal it. Plants large, compact and not spreading. Heads are very large, flat, solid, 7 ins. deep, and weigh 10 to 15 pounds. It is much earlier than Late Flat Dutch and Drumhead. It is a good keeper and shipper. Sold only in sealed packages

BUIST'S PRIZE MEDAL LATE FLAT DUTCH

105 Days from Plants—This celebrated variety has been grown by us for many years and is the result of continued care to develop and maintain the good qualities which have made it the most popular variety for a main crop. The beautiful heads are extremely large, flat and solid, 12 to 14 ins. across and 7 ins. deep, weighing 12 to 15 pounds or more. Our strain has no equal and is esteemed one of the best late Fall and Winter cabbages. A good keeper and shipper, excellent for home and market garden. It is sold only in sealed packages.

BUIST'S PRIZE MEDAL LATE DRUMHEAD

105 Days from Plants—A perfected strain similar in every respect to Late Flat Dutch in growth and general habits, except the heads have a more rounded top. Sold only in sealed packages.

SUREHEAD

100 Days from Plants—This variety is appropriately named, as it certainly is a sure header and one of the best for a main crop. Extremely popular with market gardeners. Heads are large, round, slightly flattened and weighing from 10 to 15 pounds each. Excellent quality.

PREMIUM LATE FLAT DUTCH

105 Days from Plants—One of the oldest varieties in existence. Remarkably large, solid heads of bluish green with a broad, flat surface and interior of fine quality being white, crisp and tender; a good keeper.

PREMIUM LATE DRUMHEAD

105 Days from Plants—A dependable header and a good Winter keeper. Quite similar to Premium Late Flat Dutch. Plants large, spreading, dark green leaves, with short stem.

VOLGA

90 Days from Plants—A distinct, quick growing, large, late variety; two weeks earlier than any other large kind. Plants are short stemmed and grow close to the ground. Solid heads, round as a ball, 9 to 10 ins. across, weigh 10 pounds, and are of fine quality, being very white, crisp and tender.

THE HOUSER

115 Days from Plants—A strong, vigorous grower that will withstand drought better than most varieties. About two weeks later than the Late Flat Dutch and Drumhead. A good keeper and a sure header. Excellent in quality and valuable for kraut. Heads large, solid, round and deep, averaging 12 pounds

Late or Winter Varieties—Cabbage

DANISH BALL HEAD

110 Days from Plants—The famous cabbage of Denmark is now the leading and most widely used of late Cabbages. It is well known by every trucker, private gardener, shipper and kraut manufacturer. The outstanding merit of this Ball Head type is its wonderful keeping quality in storage. A supply can be had until Spring as fine and solid as when put away. Although not adapted for growing in all parts of the South, it is widely used in the mountain districts. Our stock is the same strain that we have furnished for years, very uniform and dependable. Heads very attractive, deep round, extremely solid, fine growing, medium size, weighing 7 to 9 pounds. It is unsurpassed for boiling, slaw or sauerkraut.

DANISH ROUND HEAD

100 Days from Plants—This variety is a short-stemmed type of the famous Danish Ball Head and just as popular. In fact, it is much preferred since it is slightly earlier and the hard heads grow closer to the ground. Likewise, it is highly esteemed for winter, having great solidity and excellent keeping qualities.

PENN STATE BALL HEAD

110 Days from Plants—A special strain developed by Dr. C. E. Myers of Pennsylvania State College. Experimental check-up shows this strain to be superior in productivity and uniformity. It has a record of 20 tons per acre against an average yield of 12 tons per acre from other strains of the Ball Head type.

Red Cabbage

MAMMOTH RED ROCK

100 Days from Plants—The largest and best red cabbage and a splendid Winter keeper. Heads round, solid as a rock, 7 ins. in diameter, weighing 8 to 10 lbs. Color a deep purplish red. It is interesting to know that the red cabbage is the only vegetable that produces red leaves from the time the seed germinates to maturity.

RED DANISH STONEHEAD

100 Days from Plants—Splendid for "slaw" and pickling, having an excellent flavor and attractive color. Heads ball shaped, solid and crisp texture.

Savoy Cabbage

PERFECTION DRUMHEAD SAVOY

90 Days from Plants—One of the best cabbages to grow for a table delicacy, producing beautiful curled leaves, very tender and delicious in flavor when touched by frost. Plants short-stemmed and compact. Heads nearly round, full and hard, leaves large, coarsely crimped, dark bluish green.

Buist's Perfection Drumhead Savoy Cabbage

Chinese or Celery Cabbage

1 Ounce Will Plant 500 Ft.

CHINESE CABBAGE is distinct in flavor, being very pleasing to the taste and palatable. The nearest likeness is Cos Lettuce. It is served as a salad the same as any lettuce or like cole slaw. Cooked, it can be served like Spinach, using the green portion of the leaves; the midribs are very palatable cooked like Asparagus.

Culture—Sow about the same time as turnips and other Fall vegetables in rows 2½ ft. apart, thinning to 12 ins. in the rows. Too early plantings shoot to seed.

CHIH LI

60 Days—The earliest and surest heading variety. Torpedo-shaped heads 18 ins. tall, 4 ins. thick, tapering near the top. Well blanched, solid and compact.

PE-TSAI

70 Days—An open heading type comparing with Cos Lettuce in appearance and forming a tender, thick, pure white heart.

WONG BOK

70 Days—A good market variety forming heads heavier and more solid than Pe-Tsai; shorter, thicker and well blanched.

**BUIST'S
IMPROVED
EARLY
HALF-LONG
SCARLET**

**Buist's
Improved
Early Half-Long
Scarlet Carrot**

70 Days—An ideal variety of superior quality for the home garden. Roots are 7 ins. long, very broad at the neck and 2 ins. through, with beautiful tapering form. The quality is most excellent, being very crisp, tender and of an extra fine flavor, free from any coarseness, even at maturity.

DANVERS HALF-LONG

75 Days—One of the favorite main crop varieties known by all. Very productive and used extensively by market gardeners, shippers and home gardeners. Roots bright deep orange, 6 to 7 ins. long, 1¾ ins. thick, broad shoulders tapering to a blunt point. Flesh bright orange, tender, rich in flavor and very sweet.

BUIST'S SPECIAL DANVERS

75 Days—A very select stock grown especially for the critical market gardener. The roots are very uniform in shape and size and not so apt to split in wet weather. The characteristics are the same as the Danvers, but the yield is greater.

Carrot

Grown from Selected and Transplanted Roots

1 Oz. per 100 Ft.; 3 to 5 Lbs. per Acre

Culture—Carrots require a deep, rich, light, friable soil, well-manured. If the ground is not in this condition it should be dug deep and well broken the year previous, being sure to well pulverize the soil as in all shallow or hard soils the roots fork or divide, injuring both their size and quality. For an early crop, sow the seeds early in the spring as soon as the soil can be prepared. Plant ½ an in. deep in rows, 1 to 2 ft. apart and thinning out seedlings to stand 1 to 3 ins. apart in the row. Make repeated sowings every two weeks until the middle of June. Frequent stirring of the soil is very essential to the growth of the roots. Carrot is slow to germinate and should the surface of the soil become baked before the young plants appear, loosen it by gentle raking. May to June is the period to sow for a main crop. In the Southern states they can be sown in the Fall and will continue growing all Winter. Use the late plantings for Winter storage. Cut off the tops to within an inch of the crown and pack the roots in dry earth or sand in the cellar or they may be pitted out of doors, covered with 2 ins. of straw and a foot of earth to keep them from frost. They can then be used until Spring.

HALF-LONG CHANTENAY

72 Days—Market gardeners know this to be the perfect carrot and one of the most salable market varieties. An excellent, all-purpose sort earlier than the Danvers and a heavy cropper. Desirable for home and market gardeners and shippers. Roots deep orange, smooth, 5 to 6 ins. long, 2¼ ins. thick, broad shoulders gradually tapering and stump-rooted at the lower end. Flesh deep orange with distinct core.

RED CORED CHANTENAY

72 Days—An improved Chantenay with interior color a rich red-orange throughout. A fine strain for the market gardener. Roots are a darker more attractive color; same size and shape as the Chantenay. Flesh reddish orange with an indistinct core of nearly the same color as the flesh, fine grained, tender and sweet.

Buist's Improved Rubicon Carrot

Sow Buist's Carrot

BUIST'S IMPROVED RUBICON

72 Days—A good keeper and a strong cropper, about the same length as Danvers, but heavier and thicker at the shoulders. One of the best bunch carrots for the gardener. Roots smooth, orange red, nearly cylindrical, tapered and stump-rooted. Flesh bright orange, fine grained and sweet.

IMPERATOR

77 Days—A fine flavored variety bred for market gardeners and shippers to meet the demand for a long shipping carrot. Roots deep, rich orange, smooth, 7 to 8 ins. long, 1½ ins. in diameter, with sloping shoulders uniformly tapered to a semi-blunt end. Flesh rich orange color throughout, fine grained and tender.

NEW BUNCHING

77 Days—To home and market gardeners who demand a longer and better colored bunching carrot, try this variety. Tops short, foliage coarsely cut, stems medium size and strong. Roots almost cylindrical; 8 ins. long, 1½ ins. thick with rounded shoulders and fairly stump rooted. Flesh rich orange.

SAINT VALLERY

77 Days—Splendid for the table or suitable for stock feeding. Very productive on light soil. Roots bright red orange, 10 ins. long, 2 to 2½ ins. at the shoulder tapering to a point. Flesh red-orange, crisp and tender.

HALF LONG SCARLET NANTES

68 Days—An excellent bunching carrot and one of the best for home garden, early market and forcing. Roots a beautiful scarlet-orange, cylindrical, 7 ins. long, 1¼ ins. thick, blunt ended. Flesh reddish orange, core inconspicuous, crisp, tender and a mild, delicate flavor.

EARLY SCARLET HORN

63 Days—Popular for early market. Tops small. Roots tapered, blunt, 3 ins. long, 1½ ins. thick. Flesh reddish-orange, crisp and sweet.

BUIST'S IMPROVED LONG ORANGE

88 Days—A well known, heavy yielder and much used for a general crop. Useful for both table and stock feeding. Roots red-orange, 12 ins. long, 2 ins. thick, tapered to a point. Flesh red orange with core of a lighter shade.

OXHEART OR GUERANDE

72 Days—A very excellent variety on heavy soils too hard or stiff for longer growing sorts. Roots bright orange, broad, blunt, heart-shaped, 4 to 5 ins. long, 2½ ins. thick. Flesh deep orange, small tops, easily harvested. Most tasty eaten young.

Stock Feeding Carrots

Carrots make an excellent feed for horses and dairy cattle used with corn and fodder. They are highly nutritious and will keep the stock in good condition. The Belgian carrots are used exclusively for stock. The Long Orange and St. Vallery table varieties are large in size and also useful for stock feeding.

LARGE WHITE BELGIAN

100 Days—The finest carrot for stock feeding. A heavy yielder. Roots 12 ins. long, 3 to 4 ins. thick at top, tapering slightly downward. Flesh white with tinge of cream.

LARGE YELLOW BELGIAN

100 Days—Similar to White Belgian except color a pale orange. Flesh light yellow.

SHORT WHITE

100 Days—A heavy cropper. Roots 7 ins. long, 3 ins. thick at the top tapering to a point. Flesh solid, white and sweet.

Cauliflower—Buist's Snowball is a Sure Header

Buist's Prize Early
Snowball Cauliflower

1 Ounce Will Produce 2,000 Plants

OUR Danish growers take great pride in selections of stock seed to insure a high standard in the crop you will grow. Buist's strains are reliable.

Culture—Grow the same as Cabbage, being sure to have a deep rich soil, well drained and an abundance of moisture. For an early crop sow seed $\frac{1}{2}$ in. deep in the hot bed in January or February and set out early when frost is out of the ground, placing plants $1\frac{1}{2}$ to 2 ft. apart in $2\frac{1}{2}$ ft. rows. For a fall crop sow seed June first and transplant about July 15th. After the head reaches a diameter of 4 ins. gather the leaves together loosely and tie them at the top to blanch heads and prevent injury from sunlight.

BUIST'S SELECTED EARLY SNOWBALL

55 Days from Plants—Snowball is famous throughout the world and Buist's strain is superb. It is, without a doubt, the best and most widely used for market and home growing. Extra early and a dependable header, well adapted to forcing or Winter use. Plants dwarf in growth, compact in habit which allows for closer planting. Heads are large, 6 to 8 ins. across, beautifully formed, solid, pure white and of finest quality.

EXTRA EARLY PARIS

52 Days from Plants—This early variety produces a small but very white head, tender and delicious.

DANISH DRY WEATHER

67 Days from Plants—The best variety for localities subject to long dry seasons, producing heads of fine quality under these conditions, when other sorts are total failures. Later but larger than Early Snowball and heads white with tinge of cream.

EXTRA EARLY DWARF ERFURT

57 Days from Plants—A favorite early market variety, very desirable for forcing for either the home or market gardener. Plants dwarf, short stemmed. Heads medium, firm, compact, snow white, of excellent quality.

ALGIERS

70 Days from Plants—This late variety is a strong grower and a sure header. Heads large, solid and pure white.

LENORMAND'S SHORT STEM

80 Days from Plants—A strong growing late variety, producing well formed, large, handsome, white heads.

VEITCH'S AUTUMN GIANT

90 Days from Plants—A valuable and distinct late variety, very vigorous and long-stalked. Heads large, firm, white. Well protected by the foliage.

Celery

1 Oz. for 6,000 Plants;
4 Ozs. per Acre

25

Culture—As soon as the ground is workable, sow $\frac{1}{4}$ in. deep in open seed beds richly prepared and finely pulverized.

Celery seed germinates slowly and will sprout at low temperatures, but it needs constant and abundant moisture. Thin seedlings to an inch apart and trim tops before transplanting so as to have nice stocky plants. Transplant June or July, using rich well-manured soil and plant in rows 3 to 4 ft. apart and 6 ins. apart in the row. Firm the soil around the young roots, keep free from weeds and provide liberal water in dry weather throughout the growing season. To blanch, earth up gradually in the Fall, taking care that no earth falls into the hearts and never hoe while wet, as it will cause rust. Repeat until only the tops can be seen. Boards, celery paper or paper cylinders are other methods of blanching the stalks.

WONDERFUL OR GOLDEN PLUME

110 Days—As the name applies, this is a really wonderful celery with unquestionable merit in quality, flavor, sweetness and size. The ideal variety for home and market garden planting. Very profitable for nearby markets and a perfect shipper to distant markets. It resembles the Golden Self-Blanching, but is much larger and heavier in growth, blanches more quickly, matures earlier and is more resistant to attacks of blight and rust. It grows well on muck and upland and is absolutely the earliest celery grown. Plants medium height with compact, full heart. Stalks solid, thick and broad, free from strings and blanches readily to golden yellow.

GOLDEN SELF-BLANCHING

Finest French Grown Seed

110 Days—The well-known French strain has been a favorite for many years and still is the standard market and shipping variety. We secure our seed from the introducer, a noted grower of France. The quality in color, flavor and habit of growth of this strain is superb. Plants medium size, uniform in height, with yellowish green foliage. Hearts large and solid, blanching a beautiful rich golden yellow. Stalks crisp, brittle, and of a delicious nutty flavor, free from stringiness.

AMERICAN GOLDEN SELF-BLANCHING

118 Days—This seed is grown from the best selected French stock seed and is the best obtainable in this country. Repeated trials have proven it to be equal to the French and less expensive. However, many market gardeners prefer to pay the price and insist on having the renowned French grown stocks.

BUIST'S EASY BLANCHING

125 Days—A very special strain of Easy Blanching. A second early, desirable for home or market gardeners. The longest keeping variety grown, excelling in this respect every other sort. Plants vigorous and compact in habit of growth, blanching early and quickly to an attractive white. Stalks are taller than Golden Self-Blanching; thick, solid, tender, brittle and a rich nutty flavor.

Wonderful or Golden Plume Celery

WHITE PLUME

112 Days—Very early and the most easily blanched of all celeries, highly valuable to home and market gardeners. Not recommended as a long keeper, but is best right after digging. It is a favorite with customers because of its crisp, tender and desirable eating qualities. The stalks and portions of its inner leaves and heart are white so that by drawing the soil up against the plant and pressing together with the hands, the work of blanching is complete without the necessity of banking or earthing up.

Celery

(Continued)

BUIST'S GOLDEN YELLOW

110 Days—The finest large early Celery resembling Golden Self Blanching, but earlier, larger and of more vigorous growth. We consider it unsurpassed in its rich, nutty, sweet flavor. A splendid early Celery for the home garden and highly recommended to the commercial grower for early Winter use. Plants of medium height, stocky, compact and full hearted. Stalks thick and solid, free from stringiness, crisp and brittle and blanch readily to a golden yellow. Resists blight and is a good keeper.

COLUMBIA

120 Days—An early and valuable variety for early Winter market. Plant medium height, very stocky and heavy. Foliage is a distinct light shade of green with a tinge of yellow. Stalks thick, almost round, resembling in shape the Giant Pascal.

WINTER KING

120 Days—The best green celery on the market. An exceptionally fine Winter variety recommended to market and home gardeners. Its long-keeping qualities cannot be equalled, coming into use about the last of November, it maintains its firmness until late in March. Stalks medium height, light green, solid, crisp, good flavor and blanching to a creamy white.

EMPEROR OR FORDHOOK

130 Days—One of the finest and largest Winter varieties for home garden and nearby markets. Plants dwarf, stocky and much easier to blanch than the taller growing varieties. Foliage dark green, resistant to disease and insect attacks. Stalks smooth, solid, thick and broad. When blanched are a pure white, the hearts showing a tinge of light buttery yellow with a distinct rich, nutty flavor.

GIANT WHITE PASCAL

135 Days—Considered by many the late standard variety for Winter use. Plants large, stocky with rich dark green leaves. Stalks long, thick and solid, tender, brittle and a very rich nutty flavor. The stalks are green, but after earthing up they become an attractive creamy white. It is a perfect Winter keeper.

WINTER QUEEN

120 Days—A desirable long keeping winter celery, earlier and more dwarf than Giant Pascal. Plants have rich green leaves, extra heavy stalks with very large, tightly folded hearts. Stalks pale green, broad solid and crisp, blanching readily to a creamy white.

Golden Self-Blanching Celery

GOLDEN PHENOMENAL

110 Days—An early shipping variety, very desirable in some sections. Similar to Wonderful or Golden Plume, but has longer edible stalks that are thick, solid, blanch readily and of a rich nutty flavor.

Celeriac

Turnip Rooted or German Celery

1 Ounce Will Produce 6,000 Plants

GIANT PRAGUE

120 Days—This vegetable is grown exclusively for its roots which are turnip-shaped; very smooth and tender, good winter keeper. Culture is the same as celery except it does not require blanching, the tops being of no use except for flavoring. Boiled and prepared as a salad, it has a rich celery flavor. Also used in soups, stews and raw salads.

Collards

1 Oz. for 2,000 Plants; 4 Ozs. per Acre

THE collard is better known in the South where it originated and where it is cultivated very extensively for "greens." It is well adapted to that country and is always a sure crop. It is a species of cabbage producing a mass of leaves and a loose head. The leaves are stripped off and used as they form. The plant continues growing and finally heads. It is hardier and easier to grow than cabbage.

Culture—From Spring to Fall sow the seed ½ in. deep in rows, transplanting 1½ to 2 ft. apart in 2½ ft. rows; or sow where the plants are to remain and when well started thin out. Cultivate like cabbage. The crop is much improved by a touch of frost.

BUIST'S CABBAGE OR HEADING

80 Days—An improved type producing compact plants 1½ to 2 ft. high with large clusters of loose leaves forming a small head, which can be left on the plants all winter and used as needed. Flavor is fine.

NORTH CAROLINA BUNCOMBE

80 Days—A short-stem variety with large spreading leaves. Very hardy. Withstands drought and cold.

GEORGIA OR SOUTHERN

80 Days—This variety grows 2 to 3 ft. high and forms a cluster of tender light green leaves on a long stem. Withstands heat and cold weather and will grow on land too poor to make a crop of cabbage.

Chervil

1 Oz. for 100 Ft.

Culture—Sow in well-prepared ground during the Spring, placing rows a foot apart and cultivate like parsley. Seed slow to germinate. The aromatic leaves are similar to parsley and used for seasoning.

CURLED—Double Curled Leaves

PLAIN—Smooth Leaves

Corn Salad Or Lamb's Lettuce

LARGE SEEDED

45 Days—A very distinct salad served like lettuce. Leaves oval of grey-green.

Culture—4 ozs. per 100 ft.; 10 lbs. per acre—Sow early in the Spring ½ in. deep in rows a foot apart and thin to 3 ins. apart in row. If sown in September, protect the leaves with straw or hay when cold weather arrives. The leaves should be picked, not cut, and are ready in 6 weeks.

Chives

A hardy perennial plant of the onion family. The leaves have a mild onion flavor and are used in salads and for flavoring soups and stews.

Chicory

27

½ Oz. per 100 Ft.; 4 Lbs. per Acre

WITLOOF OR FRENCH ENDIVE

110 Days—This European delicacy has become very popular for Winter salads. The tender stalks make a delicious salad served like endive or cos lettuce.

Culture—Sow the seed in Spring and grow the roots like parsnips. Lift in the Fall, cut off tops within an inch of the crown and trim the roots to a uniform length of 9 ins. They are then replanted closely together in boxes and covered with sand or soil. Water once a week and keep in a warm room or cellar. The new leaf growth forms, a compact head, similar in shape to cos lettuce. The leaves and heart bleach like celery.

LARGE ROOTED MAGDEBURG

100 Days—The roots when matured are dried and used as a substitute for coffee or for flavoring same. They can also be boiled and served like parsnips. The young leaves are sometimes used for salad.

Culture—Sow seed ½ in. deep early in the Spring in light, moderately rich soil in rows 2 to 2½ ft. apart and thin to 3 ins. apart in row.

ASPARAGUS OR CICORIA

CATALOGNA

The greens of this variety of chicory are relished by Italians, commonly known as Italian Dandelion listed on page 34.

Cress

CURLED OR PEPPER GRASS

40 Days—Small, deep green, curly leaves with a pungent taste. Used for garnishing and as a salad.

Culture—Sow in the Spring ¼ in. deep in rows a foot apart, and thin to 3 ins. apart. Frequent sowings should be made, as it quickly turns to seed.

UPLAND

60 Days—Resembles and has the flavor of water cress. It will grow in any good moist soil and produce an abundance of leaves even in dry weather.

WATER CRESS

50 Days—An aquatic plant with long stems and small oval leaves with a delicious pungent flavor. The leaves and stems are highly esteemed for salads or garnishing.

Culture—Sow the seed in gravelly, mucky lands along the edges of shallow running streams. Once established, they increase rapidly by root extension and self-sown seed.

White Sugar or Sweet Corn

1 Lb. Will Plant 100 Hills or 200 Ft. of Row; 12 Lbs. per Acre

BUIST'S Sugar Corn is grown from selected stocks, carefully inspected while growing. Our reputation for quality strains is universal.

Culture—Plant about the middle of May when the ground is warm; otherwise it is likely to rot in cold ground. Prepare the soil deeply and thoroughly before planting, then plant in hills three feet apart each way. Dwarf varieties can be planted closer.

Place a shovelful of manure or a handful of phosphate in each hill, drop 5 or 6 grains to a hill. Cover about 1 in. deep and when up thin out to three of the strongest plants. If planted in rows, have the rows 3 to 4 ft. apart, dropping the seed 6 ins. apart in the row. Thorough cultivation is necessary until the tassels appear.

Delicious tender corn served shortly after picking is one of the home gardener's delight.

Stowell's Evergreen Sugar Corn

HOWLING MOB

85 Days—A fine second early corn delicious in flavor. It grows 6 to 7 ft.; prolific, producing two ears to the stalk. Ears large, 12 to 16 rowed, 7 to 8 ins. long, thick butts and strong husks. Kernels clear white and plump.

MAMMOTH WHITE CORY

78 Days—An attractive, medium early variety. Excellent for market garden and home use. Stalks 4½ to 5 ft. Ears thick, 10 to 12 rows, 6½ to 7 ins. long. Kernels white and a fine sweet flavor.

WHITE EVERGREEN

95 Days—This resembles Stowell's, but is earlier and larger and a heavy yielder. Kernels pure white; luscious flavor.

WHIPPLE'S EARLY WHITE

87 Days—A mid-season variety with deep grains like the Evergreen. Stalks 5½ to 7 ft. Ears 14 to 18 rowed, 7 to 8 ins. long. Kernels deep, medium narrow, pure white, sugary and tender.

BLACK MEXICAN

88 Days—This variety when young, cooks white, but the dry seed is a bluish-black. It is unsurpassed for delicious sweetness and fine quality. Stalks 6 ft. Ears 8-rowed, 7 to 7½ ins. long.

EARLY EVERGREEN

90 Days—This variety resembles the Stowell's Evergreen, but is 5 to 10 days earlier. It is a splendid sort for the home and is grown extensively for market. Kernels deep, ivory-white, sweet and tender.

THE VANGUARD

75 Days—A selection from the Howling Mob, about ten days earlier. A favorite and very profitable variety with New Jersey truckers for a first early sweet corn. Stalks 5 to 5½ ft. Ears short-pointed, 7 to 8 ins. long with 10 to 14 rows of medium deep, white, tender and sweet kernels.

CROSBY'S EARLY

88 Days—An excellent second early variety very productive and luscious in quality. Well-known by canners in sections that have a short growing season. Stalks 6 ft. Ears 14 to 16 rowed, 6½ ins. long with snowy white narrow kernels set compactly.

White Sugar or Sweet Corn

29

STOWELL'S EVERGREEN

95 Days—This is the most popular and reliable of all varieties. Although not an early sort, it is considered the standard for table use. Used extensively for home, market garden and canning. Stalks very sturdy, 8 to 10 ft. Ears $2\frac{1}{2}$ ins. thick, 8 to $9\frac{1}{2}$ ins. long, 16 to 20 rowed with kernels white, deep, medium in width, sweet and tender. Our stock is carefully grown and selected to avoid the tendency to a shorter grain and deterioration of the evergreen character of this best of all late sorts.

LONG ISLAND BEAUTY

100 Days—A cross between Stowell's Evergreen and Late Mammoth. A very profitable sort for the market gardener who prefers an extremely late, large ear. Stalks 9 to 10 ft. Ears 14 to 16 rowed, 9 to 12 ins. long with large, fairly deep, white kernels and good flavor.

COUNTRY GENTLEMAN OR SHOE PEG

93 Days—This delicious and popular late variety is especially recommended for canning and the home garden. No variety equals it for sweetness or delicacy of flavor. Stalks 7 to 8 ft.; often with two ears. Ears 7 to 8 ins. long set with deep, narrow, pure white kernels irregularly arranged on the cob.

EARLY MAMMOTH

92 Days—A medium late, large-eared corn. Stalks 7 to 8 ft. Ears 12 to 16 rowed, 8 to 10 ins. long. Kernels pure white, plump, sweet, tender and good flavor.

Yellow Sugar or Sweet Corn

GOLDEN BANTAM

80 Days—The most popular and best known of all the yellow sugar corns and has made a reputation for its earliness and delicious quality. It is used extensively for home gardeners, truckers and canners. Stalks dwarf, $4\frac{1}{2}$ to 5 ft. Ears 6 to 7 ins. long, uniformly 8-rowed. Kernels broad, tender, sweet and fine flavor. Many varieties of yellow corn have been bred since the introduction of Golden Bantam, but many customers still believe that this variety surpasses all in sweetness and distinct buttery flavor.

SIXTY DAY EARLY YELLOW

57 to 60 Days—Our earliest yellow variety. Especially desirable for the early gardener. In size and flavor it is equal to the Golden Bantam. Stalks 3 ft. Ears slightly pointed 6 to 7 ins. long with 10 to 12 rows of golden kernels; tender, sweet and delicious.

SPANISH GOLD

72 Days—An extra early variety of good quality and an asset to the early gardener. Stalks slender, 5 to 6 ft., often bearing two and three ears. Ears well filled, 6 to 7 ins. long with 8 to 12 rows of bright golden yellow, plump, sweet tender kernels.

WONDER BANTAM

82 Days—A selection of the Golden Bantam having all the fine qualities, but with larger ears. It is just as early and is more vigorous and productive. Very desirable for canners and market gardeners. Stalks 5 to 6 ft. Ears 8 to 10 ins. long, 10 to 14 rowed. Kernels golden yellow, medium wide, deep, sweet and fine flavor.

GOLDEN SUNSHINE

76 Days—An early variety popular for market gardeners and a good home garden sugar corn 3 to 4 days earlier than Golden Bantam. Ears 6 to 7 ins. long with 10 to 12 rows of bright golden kernels; tender, sweet and delicious.

WHIPPLE'S EARLY YELLOW

84 Days—The best large eared second early variety for home and particularly profitable for the market gardener. Stalks $6\frac{1}{2}$ ft. Ears 7 to 8 ins. set with 12 to 14 rows of golden yellow, fairly deep, sweet kernels.

BUIST'S GOLDEN GIANT

88 Days—A mid-season variety, the result of crossing Golden Bantam and Howling Mob. Well liked and much in demand for home and market garden planting. Stalks 7 ft. Ears rather thick at the butt, 12 to 16 rowed, 8 ins. long. Kernels deep creamy yellow, flavor rich and delicious.

BANTAM EVERGREEN

89 Days—A cross between the Stowell's Evergreen and Golden Bantam, producing a medium late type that combines the size of the Evergreen ear with the rich golden yellow and delicious quality of the Bantam. Stalk 7 to 8 ft. Ears 14 to 18 rowed, 8 ins. long.

Golden Cross Bantam Corn

WHIPCROSS

84 Days—Superior to Whipple's in color, quality and uniformity and developed particularly for home and market garden use. Stalks 7 ft. Ears $7\frac{1}{2}$ ins. long with 12 to 14 rows of golden-yellow, sweet, tender kernels.

MARCCROSS

78 Days—An extremely early hybrid about 10 days earlier than Golden Cross Bantam. The quality is superb. Stalks 6 ft. Ears 7 to 8 ins. long with 10 to 14 rows of creamy golden yellow kernels of sweet flavor.

Hybrid Sweet Corn

IMPROVED breeding methods have made possible Hybrids which are substantially superior to the standard yellow varieties and highly resistant to disease.

We caution our customers, however, not to save their own seed, as Hybrids must be produced by yearly crossing and will not otherwise give satisfactory results.

GOLDEN CROSS BANTAM

86 Days—Excellent for market gardeners and well adapted to canners' use. Stalks 6 ft. Ears very uniform, 8 ins. long with 10 to 14 rows of lighter yellow kernels than Golden Bantam with delicious, sweet pulp.

TENDERGOLD

80 Days—Or Top Cross Golden Sunshine. Outyields either Golden Bantam or Sunshine. Stalks 6 ft. Ears uniform, $7\frac{1}{2}$ ins. long with 12 to 16 rows of delicious, golden yellow kernels of fine quality.

Garden Corn

Not So Sweet as Real Sugar Corn, But Earlier and Hardier

PERKINS EARLY MARKET OR BLAND'S EXTRA EARLY

68 Days—Those who follow trucking for market should not overlook planting this profitable early money maker. The earliest of all garden corns and always a popular variety with the New Jersey farmer where it originated. Our sales each year show a growing demand in the South, under the name Bland's Extra Early. Although not a true sweet corn, it is remarkably sweet and delicious. An important advantage is hardiness. It can be planted earlier than any other variety with perfect safety. Ears 7 to 8 ins. long with 8 to 10 rows of medium deep, white kernels. Also known as First Early Table.

TRUCKERS FAVORITE

70 to 75 Days—This is a favorite in the South and grown more extensively than any other garden corn for roasting ears. It can be planted very early or late with good results. Our very particular trade in the South demands our stock of Truckers Favorite. It is true to type and name. Stalks 6 to 7 ft. Ears 10 ins. long with 12 to 16 rows of white kernels, sweet and tender. Excellent foliage for early fodder. Also valuable for second planting where the first crop has failed.

ADAMS LARGE EARLY OR IDEAL

70 Days—Very hardy for early planting and much used in the South. Stalks $6\frac{1}{2}$ ft. Ears thick, 7 to 8 ins. long, 12 to 14 rowed. Kernels white, sweet and tender if eaten young, but become smooth and hard when ripe.

ADAMS EXTRA EARLY

65 Days—This variety resembles the Adams Large Early except it is smaller and earlier. Stalks 4 to 5 ft. Ears short and thick, 5 to 6 ins. long, 12 rowed.

Pop Corn WHITE RICE

110 Days—A prolific early variety. Stalks 5 to 6 ft. Ears 6 ins. with long pointed pearly white kernels.

GOLDEN QUEEN

115 Days—Golden yellow kernels popping a creamy white. Stalks 5 ft. Ears 6 ins.

Either variety: Postpaid: Pkt., 10c; lb., 25c.

Not Prepaid: Lb., 15c; 10 lbs., \$1.20.

White Varieties

BUIST'S SNOWFLAKE

120 Days—In sections where white varieties are preferred, plant "Buist's Snowflake." It has no equal for earliness and productiveness. Stalks 9 to 10 ft., producing two large ears. Ears 12 ins., 14 to 18 rowed; grains very deep. Cob white and very thin. Excellent for meal, feeding and makes splendid roasting ears, tender and fine flavor.

WHITE HICKORY KING

125 Days—This variety produces a large grain and small cob. Dependable to produce a crop on poor, thin land. Good for roasting ears, for stock feeding or corn meal. Stalks 10 ft., frequently bearing two ears. Ears 8 to 10 ins., 8 to 10 rowed; grain broad as it is deep.

WHITE ENSILAGE

130 Days—The best ensilage or fodder variety. Stalks very tall and leafy, 12 to 15 ft., with an enormous growth of fodder. Ears 9 to 12 ins., 10 to 14 rows.

Yellow Varieties

BUIST'S IMPROVED GOLDEN DENT

110 Days—The standard yellow corn popular in all localities. Our stock is well bred, the strain of which we introduced some years ago and which now outsells any other variety. Select this variety to plant for the best all-purpose corn. Early, productive, deep grained and small cob. A beautiful corn either on the cob or shelled, and it makes meal of superior quality. Stalks 9 to 10 ft., one to two ears with excellent foliage for fodder. Ears 8 to 10 ins., 14 to 18 rows of deep grains.

EARLY LEAMING

100 Days—The earliest Yellow Dent Corn, popular in localities where the seasons are short. Productive and of fine quality. Stalks 10 to 12 ft.; ears 9 to 12 ins., 14 to 18 rows of deep yellow kernels.

LANCASTER COUNTY SURE CROP

100 Days—This large, deep grain corn is now grown very extensively in Pennsylvania. A heavy yielder on either good or poor land, with plenty of foliage; excellent for silos. Stalks 9 to 10 ft. Ears are long and slim, 14 ins., with 12 to 14 rows set closely on a red cob.

PENNSYLVANIA EARLY YELLOW, 8-ROW

90 Days—One of the most valuable and productive varieties for late planting. Stalks 7 to 8 ft., ears 12 to 15 ins., 8 rowed with hard, broad, rich amber kernels thickly set. A highly glazed flint corn.

Buist's
Golden Dent

EARLY YELLOW CANADA

90 Days—Resembles the Pennsylvania 8 rowed, ripens very early and generally used for secondary crop planted later in the season. It is well adapted to sections where the season is short or ground poor.

Selected
for

Crispness
and
Greenness

Buist's Special
Dark Green Cucumber

OUR stock of cucumbers is re-selected and improved to meet the present-day truckers' demand for uniform, profitable market varieties.

Culture—The cucumber delights in rich, light sandy or loamy soil. Delay planting until the weather becomes warm. Drop 10 to 12 seeds per raised hill, 1/2 in. deep, 4 to 5 ft. apart each way. When the plants begin to crowd and danger from the striped beetle is over, thin to three of the strongest plants per hill. Dust the plants as soon as they form leaves, with land plaster, tobacco dust, or slug shot to protect them from bugs. Give frequent but shallow cultivation up to the time they begin to run. For a succession plant at intervals up to July. They are usually planted during mid-summer for 2 to 3 inch pickles. The cucumber should be gathered when large enough to use; for if left to ripen, the plant stops bearing. Reduce the time for gathering small pickles and increase for full-grown fruits. Cut the stem instead of pulling the fruit to avoid injuring either vine or fruit.

DAVIS PERFECT

65 Days—An outstanding and dependable variety of the white spine type for the home, market gardener and shipper. The vines are healthy and vigorous, bearing smooth, glossy dark green fruits 9 to 10 ins. long, 2 1/2 ins. thick and tapered at both ends. Flesh crisp and solid, very few seeds and its apparent freshness remains a long time after being cut.

EARLY FORTUNE

64 Days—This is a splendid white spine variety for general use and shipping. Fruits a rich green, color holds for many days after picking. 8 ins. long, 2 1/2 ins. thick, slightly tapered and uniform in shape. Flesh firm and crisp.

BUIST'S SPECIAL DARK GREEN

65 Days—The ideal cucumber that meets the approval of all home and market gardeners, and especially shippers who demand firmness when shipped long distances. Retains a rich, dark green color and will remain edible for a long time. A white spine type; early, immensely productive, uniform, 8 to 10 ins. long, 2 1/2 ins. thick; smooth, slightly tapered at both ends. Excellent for slicing, flesh crisp, very few seeds and a delicate flavor. Sold only in sealed packages.

STAYS GREEN

60 Days—The earliest strain of White Spine that will stay green and hold its dark color and firmness for a long period after shipping. It is very popular with truckers and commercial growers, especially in the South, as it is less affected by the hot sun than any other sort. Fruits a very dark green from stem to blossom end, shape symmetrical, nearly square ended, 6 to 8 ins. long, 2 3/8 ins. thick, very uniform and bears a tremendous crop.

IMPROVED EARLY WHITE SPINE

60 Days—One of the earliest and best known sorts used extensively for the home garden. Vines are vigorous and produce an abundance of attractive fruits, slightly tapered, semi-blunt ended, bright medium green 8 to 9 ins. long, 2 1/2 ins. thick. Flesh crisp, tender and excellent quality.

Perfection Early White Spine Cucumber

BUIST'S

PERFECTION EARLY WHITE SPINE

Genuine Stock Sold Only in Sealed Packages

58 Days—The Buist's Perfection Cucumber, introduced by us years ago, continues to be our largest seller. Many white spine varieties have since come into prominence, but this fine, pure strain retains its popularity. It is extra early, prolific and produces a continuous crop of large, uniform fruit almost cylindrical in shape 7 to 8 ins. long, 2½ ins. thick. The skin is smooth, very deep green retaining its color and fresh appearance for a long time. Flesh is crisp, fine grained, sparkling white, delicious flavor, excellent for slicing and pickling. Vines are hardy, prolific and mildew-proof. Always reliable and one of the market gardener's favorites. Plant this variety for the home garden. We know it is the best.

STRAIGHT - 8

62 Days—A new variety having the characteristics that make it an ideal shipping variety. Also equally desirable for the home or local market gardener. The vines produce a heavy crop of uniform fruit deep green in color, 8 ins. long, 2 ins. thick, which thickness is equal throughout. Very straight, well rounded at the ends. The color holds and it makes an attractive cucumber in any market. The shape of the fruit is just right for slicing.

LONGFELLOW

70 Days—An attractive, exceptionally long green cucumber of the white spine variety. An ideal slicing variety for the private garden as well as the trucker and shipper. Fruits, a dark green which color holds well, 12 to 15 ins. long, 2½ ins. thick, uniform, straight and very crisp, tasty flesh.

WHITE WONDER

60 Days—This is a novelty, distinct inasmuch as the fruits are white at all stages of growth. It is very prolific with fruits produced in clusters, 7 ins. long, 2½ ins. thick, white spined and chunky with rounded ends.

A. & C. CUKE

60 Days—A recent introduction that has met the approval of shippers to distant or local markets. The vines are robust, producing an abundance of fancy fruits of a vivid dark green, which color it retains almost to full size. White spine type, 10 ins. long, 2½ ins. thick; straight and slender, slightly tapered at both ends; smooth and has few seeds.

THE KLONDIKE

70 Days—A medium early variety of White Spine family, very popular with market gardeners who like the uniform shape and handsome dark green color and excellent slicing qualities. Fruits slightly tapered, blocky, 7 to 7½ ins. long, 2½ ins. thick. Very prolific.

EARLY FRAME OR SHORT GREEN

58 Days—A popular variety for home gardens. Excellent for table use and pickling. Vigorous, productive and unexcelled for hardiness. Fruits bright medium green, black spined, 6 to 7 ins. long, 2½ ins. thick, straight with blunt ends. Flesh crisp and tender.

EXTRA EARLY GREEN PROLIFIC

55 Days—An extremely early and productive pickling type much in demand. Fruits bright green, black spined, 5 ins. long, 2 ins. thick, uniform and smooth with blunt ends.

BOSTON PICKLE OR GREEN PROLIFIC

58 Days—A splendid pickler reselected with great care. Early and a prolific bearer. Fruits bright green, black spined, 6 ins. long, 2½ ins. thick, smooth and slightly tapered with blunt ends. An excellent pickling variety.

Cucumber (Continued)

BUIST'S LONG GREEN

70 Days—This is the largest cucumber belonging to the black spine types, a selection of the Long Green, improved and developed by continued reselection. A heavy yielder desirable for pickling or slicing. The characteristics are the same as the Improved Long Green but the fruits are choicer, larger, tapering at both ends. A truly splendid variety, often 12 ins. long, $3\frac{1}{2}$ ins. thick. This is the late variety to plant in the home garden.

IMPROVED LONG GREEN

70 Days—The standard cucumber for either slicing or pickling is the Long Green, the favorite variety for home garden. A very heavy cropper and hardy. The small pickles are all well shaped. While in the slicing stage, the fruits are very attractive, 10 to 12 ins. long, $2\frac{1}{2}$ to 3 ins. thick, straight and slightly tapered, with few seeds. The skin is deep green, black spined; flesh very white, crisp and tasty.

EVERBEARING

55 Days—The merits of this variety is that the vines, by keeping the fruits picked, will continue to bear until killed by frost. It is small, very early, enormously productive and used mostly for pickles. Fruit deep green, black spined, 4 to $4\frac{1}{2}$ ins. long, 2 ins. thick and chunky.

CHICAGO PICKLING

59 Days—A productive type for early uniform pickles, valuable for slicing and pickling. Fruits medium green, black spined, $6\frac{1}{2}$ ins. long, $2\frac{1}{2}$ ins. thick, square ended.

NATIONAL PICKLE

56 Days—A heavy yielder very valuable for the production of small pickles and popular with the pickle industry. Fruits dark green, black spined, $5\frac{1}{2}$ ins. long, $2\frac{1}{2}$ ins. thick and rather blocky in form.

JAPANESE CLIMBING

60 Days—A distinct climbing variety used to cover fences, poles and trellises. Fruit deep green, black spined, 9 ins. long, $2\frac{1}{2}$ ins. thick, uniform and attractive.

WEST INDIA GHERKIN OR BURR

60 Days—Distinct from cucumber and used for very small pickles. Pick while young and tender and put in salt water until required for pickling. Fruits pale green, covered with prickly spines, oval and uniform, $1\frac{1}{2}$ ins. long.

Plant Buist's Long Green Cuke

JERSEY PICKLE

55 Days—This standard pickling variety produces smooth fruit uniform in size, shape and color. A deep medium green, black spined, 6 ins. long, $2\frac{1}{2}$ ins. thick, with tapering ends. Flesh crisp and tender at all stages.

EARLY CLUSTER

55 Days—One of the most popular pickling sorts. Very prolific and early, producing small fruits in clusters. Pale green in color, black spined, $5\frac{1}{2}$ to 6 ins. long, $2\frac{1}{2}$ ins. thick; chunky, uniform and very tasty.

Dandelion

1 Oz. per 100 Ft.; 5 Lbs. per Acre

Culture—Seed planted in July and allowed to winter over will yield an early crop of tender leaves the following Spring. Can also be sown in the Spring. Sow in rich soil in drills 12 to 18 ins. apart. Thin to 8 ins. in the rows and cultivate well.

IMPROVED THICK LEAVED

60 Days—The most profitable variety to grow. The plant is compact and upright, forming a rosette of large, broad, thick leaves 20 ins. across, dark green in color and easily blanched.

CULTIVATED OR FRENCH GARDEN

55 Days—Plant low growing, spreading 16 to 20 ins. with a compactly formed center; leaves long and broad.

ITALIAN (Ciccoria, Catalogna)

Although a member of the chicory family listed as Asparagus Chicory, it is better known as Italian Dandelion. A favorite salad of the Italians and grown extensively by market gardeners. Cut the main stalk, then numerous young, tender sprouts grow which can be cut several times in a season as new shoots grow after each cutting. Serve like Dandelion or cook the green shoots like Asparagus and serve hot or cold.

Egg Plant

Buist's

**Northern Grown Seed
Is The Best**

35

1 Oz. for 1,000 Plants; 4 Ozs. per Acre

Culture—Egg Plant seed germinates slowly and requires a higher temperature than any other vegetable. Sow the seed early in the Spring $\frac{1}{2}$ in. deep in prepared soil, using a hot bed or a seed pan placed indoors at a sunny window. To produce strong, healthy plants, transplant when 2 to 3 ins. high in small pots and plunge them in a frame admitting fresh air in mild weather. Cover the frame at night, providing adequate protection against frost. For best re-

sults the plants require continuous warm temperature without any checking in growth. Set out in the open ground the middle of May, if the ground is warm, 2 ft. apart in rows $2\frac{1}{2}$ to 3 ft. apart. They thrive and produce the best fruit planted in rich, loamy soil. Cultivate frequently, keeping the soil loose and fine.

The plants are often injured by insect pests and blight. Control by spraying with Nicotine Pyrox.

BUIST'S IMPROVED LARGE PURPLE

83 Days from plants—Our perfected variety producing the largest fruits in great quantities, is recommended for home and

market garden. The spreading, spineless plants bear 6 to 8 fruits. The broad, oval fruits are a handsome, glossy, black-purple, slightly larger than Black Beauty.

EARLY LONG PURPLE

78 Days from plants—The earliest and most productive of all. Fruits dark purple, oval in shape, 7 to 8 ins. long, $2\frac{1}{2}$ to 3 ins. thick.

NEW ORLEANS MARKET

83 Days from plants—A heavy yielder and attractive shipping variety producing larger and shorter fruits than Florida High Bush. Plants spineless, bearing all its fruit well off the ground. Highly resistant to blight, drought and heat. Fruits oval and dark purple.

BLACK BEAUTY

81 Days from plants—The most popular home garden sort and the earliest of the large fruited varieties, very desirable for early markets, retaining its color and quality a long time. Plants low and bushy, spineless, with 4 to 5 fruits. The large egg-shaped fruits are smooth and a very attractive rich, purplish-black.

Black Beauty Egg Plant

FLORIDA HIGH BUSH

85 Days from plants—A very vigorous, disease- and drought-resistant variety tall and upright in growth, bearing the fruit well off the ground. Plants spineless; fruits purple and slightly longer than thick in shape.

MANATEE SPECIAL

81 Days from plants—This excellent shipper and very desirable market strain is adapted to Florida and the South. The plants are of high bush character, spineless, sturdy and upright, holding the fruits well off the ground. Very early, hardy and productive, withstanding blight, drought and heat. The fruits are similar to Black Beauty, oval in shape, smooth and a very glossy, rich black.

Endive

1/2 Oz. per 100 Ft.; 4 Lbs. per Acre

A VERY wholesome vegetable which can be used as a salad, a garnish or boiled for greens or as a flavor for soups.

Culture—For an early supply sow April 15th; for main crop, from the beginning to the middle of Summer. Plant the seed 1/2 in. deep in rows 18 ins. apart and when well started thin the plants to 8 to 12 ins. apart. When the leaves are 8 ins. long they are ready for blanching. Select a dry day, gather the outer leaves in the hand and tie closely together over the center. Excluding the light makes the inside leaves crisp, tender, tasty and white. In 3 to 4 weeks they will be blanched ready for use. To provide for a Winter salad, dig the plants before killing frosts, allowing plenty of soil with the roots. Pack closely together, store in a cellar and keep dark as possible.

GREEN CURLED

95 Days—The most popular variety 16 to 18 ins. in diameter, finely cut, feathery leaves, rich green in color which blanch a creamy white. Fine for Fall and Winter use.

BATAVIAN BROAD LEAVED OR ESCAROLLE

90 Days—A favorite variety 16 ins. in diameter with broad leaves, twisted and waved, of a bright green color. Forms a very compact heart which blanches to creamy white.

FULL HEART BATAVIAN

90 Days—An improved Batavian of very fine quality, recommended for market gardeners and shippers. Larger and broader leaves with deep, full compact well blanched hearts of buttery texture.

WHITE CURLED

100 Days—A small sort 12 to 13 ins. in diameter with finely curled pale green leaves. Very tender and almost white when blanched.

FRENCH ENDIVE

This European delicacy known as Witloof Chicory is listed on Page 27.

Fennel or Finocchio

1 Oz. per 100 Ft.; 4 Lbs. per Acre

An Italian vegetable which is now grown extensively in this country. Agreeable aromatic flavor, somewhat resembling celery, but with sweet taste like the flavor of anise. The stalks, resembling celery, form a bulb at the base. Eat the stalks the same as celery or as a salad, sliced raw, or served boiled with a cream dressing.

Culture—Sow in June or July 1/2 in. deep in rows 18 ins. apart and thin to 6 ins. in the row. The plant should be earthed up when half grown in order to blanch it. Cultivate like celery.

FLORENCE (Italian or Messina)

The variety used for home, market gardeners and shipping. Plants grow 36 ins. high, branching habit with dense feathery foliage. Bulb firm and oval.

Green Curled Endive

Kohl Rabi

1/2 Oz. per 100 Ft.; 4 Lbs. per Acre

This plant forms a turnip-shaped bulb above the ground on a cabbage-like root. Use when the bulbs are young and tender, 2 to 2 1/2 ins. in diameter. Remove the outer skin before boiling and prepare the same way as turnips. Kohl Rabi combines a mild flavor of both cabbage and turnip. Properly prepared, it is almost equal to cauliflower.

Culture—Plant in early Spring and at intervals of 10 days for a succession until hot weather. Sow in light rich soil, 1/2 in. deep in rows 18 ins. apart. When established, thin to 3 to 6 ins. in the row. Cultivate like cabbage. Early crops are forced in hotbeds and treated the same as directed for early cabbage. For Fall crops, plant the last of July.

EARLY WHITE VIENNA

55 to 60 Days—The best variety for either forcing or garden culture. Plants dwarf, short-leaved with slender stems. Bulbs 2 to 3 ins. in diameter, globular, very light green. Flesh white, tender and crisp.

EARLY PURPLE VIENNA

60 Days—Same characteristics as the Early White Vienna except color. Leaves dark green, stained purple. Bulbs purple with white flesh, very mild, crisp and tender.

LARGE GREEN OR WHITE

80 Days—This variety is generally grown for feeding cattle. They are edible only if pulled when young. Bulbs mature 6 to 8 ins. in diameter.

Kale or Borecole

1/2 Oz. per 100 Ft.;
3 Lbs. per Acre

THIS vegetable produces excellent "greens" for Spring and Winter. The leaves are boiled the same as spinach. It is the hardiest of all Winter greens, frost improving the quality rather than injuring it.

Culture—Kale will succeed in almost any soil. Sow April to June, 1/2 in. deep in rows 24 ins. apart and for large plants thin to 18 ins. apart in the row. For Spring use, sow in August or September, as it will winter over if protected by a light covering of hay. Cultivate like cabbage.

DWARF BLUE CURLED SCOTCH

55 Days—This improved strain has the same characteristics as the Green Curled Scotch but is hardier and very dark blue-green in color. It will stand over the Winter in any locality where the temperature does not go below zero.

DWARF GREEN CURLED SCOTCH

55 Days—Our strain of this popular variety is exceptionally fine. Plants low, 9 to 12 ins. high, with wide spreading, deeply curled bright deep green leaves hugging the ground. A hardy and attractive sort.

TALL GREEN CURLED SCOTCH

60 Days—A strain 3 ft. tall and producing an abundance of light green, densely curled leaves. Very hardy and tender after exposure to frost.

DWARF SIBERIAN CURLED

65 Days—A hardy, vigorous, spreading variety of dwarf habit 12 to 16 ins. tall. Leaves large and heavy in texture, plain at center with edges curled. Color deep bluish green.

DWARF GERMAN GREENS

65 Days—This hardy variety will stand the Winter well and is popular with market gardeners. Spreading and dwarf in habit, it produces dark green leaves not as curly as the Scotch greens.

SPRING OR SMOOTH

30 Days—A hardy quick-growing variety with smooth, dark green leaves, 8 ins. high. Tender and sweet when young.

Dwarf Green Curled Scotch Kale

Culture—Use rich soil and sow early in the Spring 1/2 in. deep in rows 18 ins. apart and thin to 2 to 3 ins. in the row. Cultivate and draw the earth to them as they grow. This gradual earthing up will make very white and tender leeks. Transplant Fall sown seed in the Spring.

BUIST'S MAMMOTH

85 Days—An extra large, vigorous variety, mild and tender in flavor; especially adapted for market gardeners. Large green leaves with long, thick stems blanching white.

LARGE AMERICAN FLAG

85 Days—A well known variety of quick, strong growth. Stems 10 ins. long, 1 1/2 ins. thick; leaves large, broad and dark green.

MONSTROUS CARENTAN

85 Days—A giant variety, hardy, prolific and desirable for Fall use. Stems 8 to 10 ins. long, 2 to 3 ins. thick, leaves very dark green.

GIANT ITALIAN

85 Days—A popular variety among the Italian market gardeners. It is very hardy with large, broad, dark green leaves and stocky stems bleaching 10 to 12 ins. high and 3 ins. thick. Attractive in appearance; mild and tender.

Leek 37

1 Oz. per 100 Ft.;
5 Lbs. per Acre

THIS species of the onion family has a mild, sweet flavor and is often used for green onions in the Fall and Winter. The long thick, blanched stem is boiled and served with a butter or cream dressing. Also used for flavoring soups and stews.

Lettuce—Plant Buist's

$\frac{1}{2}$ Oz. per 100 Ft.; 3 Lbs. per Acre

Culture—Head lettuce is most tender and crisp when quickly grown and thus requires a well enriched soil, plenty of moisture, thorough cultivation and cool weather. A check in growth from lack of nourishment or moisture usually prevents heading. Lettuce is quite hardy and can be planted outdoors on the approach of Spring as soon as soil and weather conditions permit. Sow $\frac{1}{2}$ in. deep in rows 18 ins. apart and thin out to stand 6 to 10 ins. apart in the row. If the larger heads crowd, thin out again and use as required. After the plants have made some growth, a light application of fertilizer such as nitrate of soda will give that vigor necessary to prevent any check in growth.

Lettuce seldom heads well in hot weather. It is best not to plant after May unless special care such as irrigation or artificial shading can be provided. For Fall use, sowings can again be made in August.

Buist's White Boston Lettuce

BUIST'S WHITE BOSTON

70 Days—Our strain of this handsome early Butterhead type is the best in existence. An excellent garden lettuce either for forcing or sowing in the open ground early in the season. A very desirable shipping variety for nearby markets. Many complimentary reports come from New Jersey truckers insisting that our stock is the finest. Popular wherever lettuce is grown and a very valuable kind for growing on muck land. Leaves light green without a brown tint, smooth and straight on the edges, forming a closely folded head with golden hearts. Deliciously tender and buttery.

BUIST'S SELECTED BIG BOSTON

75 Days—Our strain of this very popular lettuce is unsurpassed. Market and home gardeners who use it agree that Buist's stock is supreme. This variety is more extensively grown than any other in the butter head class. Always reliable, it produces a quality head attractive for market and home use. A standard for cold frame forcing and for Spring and Fall outside planting; excellent for shipping limited distances. Leaves glossy, smooth, wavy at the edge and slightly tinged with reddish brown. Plants are large and vigorous, producing creamy yellow, compact heads of medium size. Stands very long before shooting to seed.

BUIST'S "VERIBEST" CABBAGE HEAD

65 Days—This is the best early cabbage butter lettuce on the market and is excellent for general home use or market gardening, either for forcing, or sowing in the open ground early in the season. It forms a beautiful solid head with crumpled golden-yellow leaves inside; very tender, soft in texture, rich buttery flavor and free from any bitterness. Outer leaves light green and will not turn red from cold. It can be sown broadcast in September and transplanted in frames to cut early in the Spring. An excellent shipper and keeps well.

HUBBARD MARKET OR WHITE SUMMER CABBAGE

70 Days—Here is one of the best cabbage butter varieties listed, beautiful while growing and always tempting to the taste. The quality is excellent, soft in texture, sweet and very buttery in flavor. One of the best for the home or market garden. Good for forcing, for early Spring, Summer or late Fall. It is a splendid cabbage lettuce for the South, standing extreme heat and is slow shooting to seed. Plant compact, forming a round, solid, well balanced, creamy heart. Leaves medium green, crumpled, with straight edges.

BLACK SEEDED BIG BOSTON

75 Days—Similar to the Big Boston with larger outer leaves. The heads are large and will stand a few days longer before shooting to seed.

Heading Varieties—Lettuce

New York No. 12
Lettuce

MAY KING

63 Days—An extra early butter variety for the earliest Spring planting in the open ground and for greenhouse forcing. Rapid in growth and quick heading. Leaves light green, tinged slightly at edges with brown. A quality head; small, compact, golden yellow.

SALAMANDER

72 Days—One of the most popular and reliable butter varieties, standing heat and drought remarkably well. A sure header, hardy, and an excellent shipper. The heads are a light yellowish green, round and solid. Also called Black Seeded Tennisball.

CRISP AS ICE

74 Days—A compact, medium-sized butter-head variety. Yellow interior and a nice flavor. Leaves thick and crumpled; deep green overlaid with bronze. Black seed.

ALL HEART

72 Days—A variety that will head during hot weather. A butter lettuce similar in shape and habit to the Salamander. Seed black.

ICEBERG

87 Days—A crisp heading late variety for home garden or market gardeners serving local markets. It will not stand long distance shipping and should not be confused with the shipping variety, New York, which is commonly called Iceberg by shippers and the produce trade. True Iceberg is large with wavy, fringed light green leaves tinged with brown at the edges. Heads compact, crumpled, white inside, crisp and sweet.

NEW YORK

80 Days—Also known as Wonderful and Los Angeles. This is the crisp heading variety grown in immense quantities on the Pacific coast and shipped to eastern markets as Iceberg. The plants are large, 12 to 15 ins. across with dark green leaves only slightly curled on the edges. Heads are solid, well blanched, sweet and tender.

NEW YORK No. 12

75 Days—An improved early strain which does well for a Mid-summer crop, and is particularly adapted to the Eastern climate. It is a lighter green than New York with fewer outer leaves, large, robust growing and resisting hot, dry weather. A sure header, slow to run to seed.

EARLY HANSON

80 Days—A sure header. Heat resisting and fine for Mid-summer planting. Leaves light green, curled and twisted, heavily veined with fringed edges. Heads large, solid, with white heart, tender and sweet.

Lettuce (Head Varieties Continued)

BUIST'S NEW SENSATION

72 Days—An ideal Hot Weather Lettuce, withstanding heat and drought better than any other sort. Plant is compact, forming a globular firm, well blanchd head. Leaves medium green crumpled but straight on the edges. A butter variety always tender and excellent in flavor. Seed black.

CALIFORNIA CREAM BUTTER

75 Days—One of the best all-around Summer lettuces desirable for shipping to nearby markets. Heads large, globular, solid, with golden yellow heart. Leaves large, thick, dark green, tinged and spotted with brown. Flavor rich and buttery. Black seed.

Romaine or Cos Lettuce

Culture—A distinct type of lettuce with torpedo shaped heads, upright and having long, narrow, spoon-shaped leaves, brittle and distinctively mild in flavor. Sown at the same time and manner as head lettuce, it does not require as much room in the row. 6 to 8 ins. is sufficient. An excellent type for outdoor planting, hardy, and stands the heat well.

WHITE PARIS OR TRIANON COS

65 Days—The best known and most popular Cos variety for home and market gardens. A medium large lettuce with fairly dark green, long and narrow, smooth concave leaves forming a well-folded head of fine quality. Head compact, 8 ins. tall, elongated or loaf shaped with inside leaves bleaching a greenish white. Crisp as celery, sweet, tender and of excellent flavor.

DARK GREEN COS

65 Days—Same characteristics as the White Paris with the outside leaves a darker green color. It folds well, forming a good firm head and when fully blanchd the leaves are light green with mid ribs as white as the heart. A favorite with the market gardener.

Chicken Lettuce

60 Days—Distinct from any other lettuce. It will yield more chicken feed than any other plant grown for greens. Plants 3 to 4 ft., with an abundance of loose leaves. Cut or pull leaves as needed.

Grand Rapids Lettuce

Loose Leaf Lettuce

*Cut or Pull When a Few Inches Tall
If you want a Salad that really melts in your Mouth*

Culture—Leaf lettuce thrives on any good garden soil and is edible before the heading varieties are available. They produce a loose head of heavily curled and crumpled leaves, brittle, tasty and tender. Sow the same as head lettuce, but thin to an inch in the row, and when large enough for salad continue to thin as used. The tender soft leaves at this stage are delicious.

GRAND RAPIDS

50 Days—A very popular non-heading variety for greenhouse forcing or outdoors early in the season. Plants are large, compact and upright, forming a cluster of light green leaves, broad, wavy, fringed and very curly. It is handsome in appearance, very desirable for garnishing and the tasty eating quality of the soft leaf is sweet and tender. Seed black.

EARLY CURLED SIMPSON

50 Days—Also known as Silesia. One of the oldest known and most generally used varieties for home gardens. Plants are early, hardy and quick growing; non-heading, forming a tight bunch of broad yellowish-green leaves crumpled and frilled on the edges. Crisp, sweet and very tender.

BLACK SEEDED CURLED SIMPSON

50 Days—Our big seller in Pennsylvania. It grows quickly, is early, hardy, crisp, tender and deliciously flavored. The plant is large and compact with broad yellowish-green leaves crumpled and frilled on the edges.

EARLY PRIZE HEAD

50 Days—The name is misleading for this is a non-heading type. One of the best home garden varieties; early, quick growing and making a lot of good eating leaves, sweet and tender. Plants medium, with outside leaves shaded brown and inner leaves bright green, broad, frilled and not very curly.

Buist's Muskmelons—Cantaloupes

1 Oz. to 50 Hills; 3 Lbs. per Acre

Culture—Muskmelons require warm soil, either light sandy or a well-drained loam, enriched with manure or fertilizer. Do not plant until the weather becomes real warm. In preparing the soil we recommend making the hills 4 to 5 ft. apart each way, using two shovelfuls of well-rotted manure mixed with the soil under each hill. Drop 8 seeds per raised hill $\frac{3}{4}$ in. deep, and thin by cutting off the surplus plants just below the surface, instead of pulling them, allowing the three strongest seedlings to remain. Where Summers are short, seed can be planted indoors in hotbeds and transplanted when

weather permits. Until runners interfere, frequent but shallow cultivation is necessary. It is important not to disturb the roots. When a foot long, pinch off the ends of the vines to throw increased strength into the roots and thus make them bear better. To retain a real melon flavor, do not plant near cucumber, pumpkin, or squash. Beetle attacks should be met by dusting sparingly with air-slacked lime, soot or wood ashes. To prevent blight, spray with Bordeaux Mixture every ten days after the plants have attained 5 or 6 leaves. Add Arsenate of Lead for eating insects or use Pyrox, a combination spray, for all leaf-eating insects, blight, and fungus troubles.

Selected
Hale's Best

Orange or Salmon Fleshed Varieties

HALE'S BEST

80 Days—This variety originated in the Imperial Valley of California. Hale's Best is now outstanding as the popular choice for truckers and shippers for all season shipping. Possesses earliness, sweetness, and an attractive shape ideal for packing in containers. It is a money maker for all since it meets the approval of the consumer. Fruits oval, $6\frac{1}{2}$ ins. long, 5 ins. in diameter, densely covered with medium heavy netting and almost entirely without ribs. The small seed cavity is surrounded by thick salmon orange flesh, firm, fine grained, and richly flavored.

SELECTED HALE'S BEST

80 Days—The fact that Hale's Best is the best seller for the market garden and shipping trade led us to grow a re-selected stock from very fancy hand-selected fruits. "Just a little bit better." Try this superior strain.

Muskmelons—Cantaloupes

Orange or Salmon Fleshed Varieties

EARLY JERSEY GEM

88 Days—An improvement in size and quality over the Fordhook and just as early. The characteristics are the same, but the fruit is heavier, weighing about 3½ pounds. The flesh is that same bright orange, fine grained, juicy, sweet and spicy. A dandy melon for the home garden and local market.

EMERALD GEM

85 Days—A well named variety with a dark green emerald colored skin when ripe. It should be used as soon as picked and for this reason it is recommended only for home use. Fruits globular, slightly flattened, 4½ ins. long, 5½ ins. in diameter slightly netted, but distinctly ribbed. Very small seed cavity, and thick pink flesh, luscious and sweet.

TIP TOP

90 Days—This is an excellent variety for home and market garden use for nearby markets. Fruits large, slightly oblong, 8 ins. long, 7 ins. in diameter, indistinct ribs with slight netting. Flesh bright salmon, sweet and spicy.

PEARL PINK MEAT

94 Days—An exceptionally high quality, prolific melon excellent for shipping. Fruit oval, 5 ins. long, 4½ ins. in diameter with hard, dark green skin, faintly ribbed and heavily netted. Flesh thick, salmon-pink, juicy, sweet and ripens close to the rind.

Pride of Wisconsin—85 Days

A NEW variety in demand among home gardeners, road-side markets, truckers and shippers. It is one of the sweetest melons grown and under favorable conditions it will produce 5 to 7 perfect fruits on one vine. The rind is tough, the deep salmon flesh is firm and it stands handling and shipping well. The fruits are medium size, almost round, 6½ ins. long, 6 ins. in diameter and very heavy due to the thickness of the flesh and the small triangular seed cavity. Skin a pearly gray color with a faint rib, heavily covered with a distinctive netting.

Pride of Wisconsin Muskmelon

FORDHOOK

87 Days—Well known and one of the best small melons for home garden and nearby markets. It is one of the very early varieties of seed that New Jersey truckers never fail to buy. They can rely on it to produce a good crop of attractive, delicious sweet, spicy fruits. Flat in shape, 5 ins. long, 6½ ins. in diameter with broad ribs, heavily netted. Flesh thick, orange-yellow and very juicy.

Cantaloupes—Muskmelons

Orange or Salmon Fleshed Varieties

HONEY OR SUGAR ROCK

85 Days—This variety is one of the most popular today, liked by both home gardeners and truckers. Striking in appearance and solid as a rock, this melon, when cut, will give off a distinctly rich aroma and taste as sweet as sugar. A very heavy yielder. Fruits medium size, nearly round, 6 ins. long, 5½ ins. in diameter, skin grey-green covered with a coarse netting making a tough rind. Flesh extra thick, firm, deep orange-salmon and juicy. Commands top prices.

BENDER'S SURPRISE

85 Days—Similar to Tip Top and increasing in popularity because of its earliness and productiveness. It has a remarkably strong rind, and is a splendid keeper of delicious quality, the requisites for a home grown or shipping melon. Fruits oblong 8 ins. long, 6 ins. in diameter, ribbed and coarse netted; skin greenish-yellow when ripe. Flesh is a beautiful bright salmon, sweet and spicy.

HEARTS OF GOLD OR IMPROVED HOODOO

92 Days—A medium-sized melon, very vigorous and a heavy cropper with a tough rind which is ideal for shipping and used extensively for that purpose. It is also a home garden favorite. Fruits uniform, round, 6 ins. long, 6 ins. in diameter, slightly ribbed, covered with a fine, dense grey netting. Small seed cavity with flesh thick, deep salmon pink, juicy and sweet, ripening close to the rind.

BANANA

94 Days—A novel variety having both the shape and fragrance of the banana with really delicious eating qualities. Fruits long, tapering, 14 ins. long, 4 ins. in diameter with smooth lemon colored skin and salmon flesh. Very vigorous and hardy.

LONG YELLOW CANTALOUPE

100 Days—The largest of the pink fleshed sorts. Fruits thick, long, oval, and exceptionally sweet.

Hearts of Gold or Improved Hoodoo Muskmelon

OSAGE OR MILLER'S CREAM

95 Days—This large melon possesses a distinctive, luscious sweet flavor popular for home and market garden use for local market. Fruits oval, 7 ins. long, 6 ins. in diameter, slightly netted and dark green with thick orange-salmon flesh.

Buist's Muskmelons—Cantaloupes

Green Fleshed Varieties

BUIST'S SELECTED ROCKY FORD

92 Days—This reliable variety continues to be our largest seller for home gardens. It is a splendid type of the green fleshed Rocky Ford possessing the same characteristics, but having a pronounced golden tint next to the small seed cavity. The flesh is very thick and the flavor deliciously sweet and spicy.

ROCKY FORD

92 Days—The most widely known of all cantaloupes, reselected from the famous Netted Gem introduced from Pennsylvania to Colorado where it attained perfection in shape and netting. It became famous as a shipping variety and is now more generally known as the Rocky Ford. Very productive, uniform in size and shape. A favorite for home gardens, market and shipping. Fruits almost round, small, 5½ to 6 ins. in diameter with no ribs and completely covered with hard, gray netting. Flesh green, thick, juicy, and of a sweet, spicy flavor.

IMPROVED EARLY JENNY LIND

82 Days—An old favorite and a dandy home garden melon considered one of the best and sweetest grown. Very early with small, flat fruits 4 ins. long, 3 ins. in diameter with heavy netting on the ribs, and a knob or button on the blossom end.

EXTRA EARLY HACKENSACK

80 Days—An old standard variety exceedingly early for a large melon, highly recommended for the home garden and truckers shipping to local markets. Fruits nearly round with somewhat flattened ends, 6 ins. long, 7 ins. in diameter, broadly ribbed with very coarse netting. Flesh green, thick and delightful in flavor.

LARGE HACKENSACK OR TURK'S CAP

90 Days—A very large, productive type used mostly for the home garden. Similar to the Extra Early Hackensack, but later and larger. Fruits 6½ ins. long, 8 ins. in diameter, flesh green, rich and sugar sweet.

MONTREAL MARKET OR NUTMEG

94 Days—An excellent variety with very large fruits weighing from 7 to 8 pounds. Almost round, 7 to 8 ins. long; 8 to 9 ins. in diameter, flattened at the ends, heavily netted and deeply ribbed. Flesh very thick, green, juicy and sweet.

Plant Buist's Selected Rocky Ford Always Popular

EARLY KNIGHT OR SUGAR SWEET

82 Days—We recommend this variety for either the home or market gardener, particularly the latter whose profits depend upon being first in the market. It is ready fully 10 days ahead of Rocky Ford and larger in size. Fruits oval, 6 ins. long, 4½ ins. in diameter. Skin light golden yellow when ripe, with gray netting and distinct ribs. Flesh thick, bright green shading to light pink at center. Famous for its sweet, juicy flavor.

BOTTOMLY

84 Days—A variety similar to Early Knight, but maturing a trifle later. Very popular in the Baltimore and Washington markets. Fruit oblong, 6 ins. long, 4½ ins. in diameter, heavily netted and distinctly ribbed. Flesh green and very sweet.

POLLOCK 10-25

93 Days—This variety is identical to Rocky Ford except the flesh is salmon tinted shading to green near the rind. Growers like it because of its resistance to blight and rust, and its long distance shipping qualities.

HONEY DEW

112 Days—This fine melon is entirely distinct and has taken front rank at all produce stands where it is recognized, bought and served by name, "Honey Dew." It requires a long season to mature and if grown in a northern latitude it must be started indoors or in frames and transplanted outdoors at the proper time. Fruits are large, perfectly round, 9 ins. long, 8½ ins. in diameter. An excellent shipper and keeper with skin smooth and a light cream when ripe. Flesh light green, thick, ripening to the rind; juicy and mellow with the distinctive sweetness of honey.

Buist's Watermelons

45

Stone Mountain
Universally
Proclaimed

As the Best
Round
Melon

1 Oz. to 30 Hills;
4 Lbs. per Acre

Stone Mountain
Watermelon

Culture—In every respect as to soil, planting time, cultivation and destruction of pests, the watermelon is treated the same as muskmelon. The vines, however, are more spreading and the seed should be dropped in hills 5 ft. apart and 8 ft. between the rows.

STONE MOUNTAIN

90 Days—Stone Mountain is now the most popular home garden and shipping melon grown. It is the best round melon outselling any other variety on the market, either in the North or South. The rind is tender but this is not a handicap with present day quick transportation facilities. Fruits very large, 30 to 50 lbs. when grown in the sunny south, but smaller in northerly climate; oval or nearly round with blunt ends, medium dark green with ribs shading to a darker green. Flesh brilliant rich scarlet throughout, fine grain, firm, deliciously sweet to the rind and very few seeds. Seeds white with black tips.

IMPROVED KLECKLEY'S SWEET

85 Days—The Kleckley's Sweet outsells all other varieties for home and local market gardeners. The improved strain has the same delicious sweetness, the earliness and retains all the other fine qualities that made Kleckley's Sweet the favorite. The improvement consists of slightly larger size and better shipping qualities. The rind is thin but much tougher and stronger qualifying as a shipper for reasonable distances. Fruits large, 30 to 50 lbs., long with round ends, very dark green with faint ribbing. Flesh deep red, sparkling and crisp, juicy and very sweet to the rind. Seeds white.

Watermelons — ROBERT BUIST CO.

Tom Watson Watermelon

TOM WATSON

90 Days—The ideal shipping melon and the most popular of the long varieties possessing quality, productiveness and stability for safe transportation to distant markets. Fruits very large, 30 to 40 lbs. measuring 20 ins. long, 10 ins. in diameter with round ends; rich, deep green, indistinctively veined; rind elastic and tough. Flesh rich red, firm sweet and luscious, ripening close to the rind. Seeds brown, spotted with white.

KLECKLEY'S SWEET OR MONTE CRISTO

85 Days—Always popular and a favorite with all. Excellent for home use and nearby markets. Fruits large, 30 to 40 lbs., long and oval, dark green; rind thin and brittle. Flesh deep red, juicy and very sweet. Seeds white.

COLE'S EARLY OR HARRIS' EARLIEST

80 Days—An extra early variety and a great favorite in the North and one of the finest for family use or the home market. Fruits small size, 15 lbs., short, nearly round, dark green striped irregularly with a lighter shade; rind tender. Flesh light red, sweet and delicious. Seeds black.

ALL HEART

85 Days—A distinct variety, well worth trying. The seed is about the size of an apple seed. Fruit medium size, 20 lbs., long, dark green. Luscious, sweet, red flesh without any white hearts. Seed brown.

SCHOCHLER

90 Days—A very large melon used extensively in the South, having outstanding shipping requisites for size, tough rind and quality. Fruits very long, 40 to 50 lbs., rich dark green with faint stripes. Flesh bright crimson, fine grained and very sugary.

DIXIE QUEEN OR WHITE-SEEDED CUBAN QUEEN

90 Days—This new melon is becoming quite popular with home gardeners, roadside markets, truckers and shippers. Fruits oblong or nearly round, fair size averaging 35 lbs. or more, light green, striped and blotched with dark green; rind thin but tough. Flesh rich scarlet, crisp and extremely sweet with very few seeds. Seeds white and small.

HALBERT HONEY

85 Days—A fine, large prolific melon second in popularity to the Kleckley's Sweet and just as luscious and sweet in flavor. Splendid for home use and nearby markets. Fruits 30 to 35 lbs., cylindrical with blunt ends, dark glossy green with fine veins. Rind tender; flesh rich red, extending clear to the rind. Seeds white with black tips.

IRISH GRAY

90 Days—One of the finest melons to grow anywhere. It is quite productive, very sweet and tender, a trifle earlier than Tom Watson and compares equally with that variety in shipping quality. Fruits large, 25 to 30 lbs., oblong, smooth, a distinct mottled greenish gray; rind tough and hard. Flesh bright red, firm and sweet. Seeds white.

Georgia Rattlesnake Watermelon

GEORGIA RATTLESNAKE

90 Days—An excellent shipping melon popular in the South for its size, productiveness and eating qualities. Fruits very long, fairly large, 25 to 30 lbs., light green, irregularly mottled with dark green stripes. Its striking appearance has helped its popularity. A ready seller, for, once seen, it is always remembered. Rind very tough. Flesh bright scarlet, crisp and sweet. Seeds dull white with black tips.

THURMOND GRAY

90 Days—A splendid shipping variety similar to Irish Gray, but having fruits much larger. Fruits 30 to 40 lbs., cylindrical, grayish-green with faint veining; rind hard as a rock. Flesh deep red, crisp and sweet. Seeds brown.

CUBAN QUEEN

90 Days—A fine shipper. Fruits mostly round, 30 lbs., alternately striped dark and light green. Flesh scarlet, sweet and tender. Seeds black.

CAROLINA BRADFORD

85 Days—An excellent shipping variety having a very tough, elastic rind. Fruits large, 25 lbs., oblong, deep green irregularly striped with a darker shading. Flesh dark red, fine grained and sweet. Seeds creamy white with some slightly mottled.

THE DIXIE

85 Days—A splendid shipper. Very prolific, with fruits large, 25 lbs., oblong, very dark green with lighter green stripes; rind thin but strong. Flesh scarlet and sweet. Seeds black.

LONG LIGHT ICING OR
GRAY MONARCH

85 Days—A large melon mostly adapted for home gardens. Fruits 25 lbs., cylindrical with blunt ends, a beautiful light gray green faintly mottled darker. Rind thin and tender. Flesh red, sweet and delicious. Seeds white.

BUIST'S LITTLE GEM

75 Days—Many watermelons grow so large that the average housewife can not, as a rule, use one. A smaller size is more suitable, easier to store in a refrigerator and can be eaten at one meal without annoying leftovers. Buist's Little Gem meets this essential condition. The earliest melon that grows. Fruits nearly round, small in size, 12 to 15 lbs., a convenient family size. Skin dark green striped with gray green. Flesh a pinkish red, very firm, sweet and about as delicious eating as any melon could be.

FLORIDA FAVORITE

85 Days—A hybrid of the Rattlesnake and Pearson excellent for the home or home market trade, but not adapted to long distance shipping. Fruits large, 25 lbs., long with round ends. Light green with mottled stripes of dark green; rind fairly tough. Flesh dark red, crisp and sweet. Seeds white.

MOUNTAIN SWEET

90 Days—For home and local markets. Fruit large, 25 lbs.; oblong, dark green; with sweet, juicy, light crimson flesh. Seeds brown.

GREEN SEEDED CITRON

95 Days—Used exclusively for preserving. Fruits round, 10 lbs., striped alternately with dark and light green. Flesh clear white and very solid. Seeds glossy olive green.

Mustard

1 Oz. per 100 Ft.;
4 Lbs. per Acre

The leaves are used as a salad or cooked as spinach and turnip tops. They are pungent, rich in flavor, tender and one of the most healthful and nourishing type of "greens." Tender when the leaves are 5 to 6 ins. long about 5 to 6 weeks after sowing.

Culture—Sow seed $\frac{1}{2}$ in. deep in rows 1 ft. apart and thin to 4 to 6 ins. in the row. Mustard runs to seed quickly, it is advisable to plant very early in the Spring followed by successive plantings every two weeks until hot weather. For Fall use plant the latter part of August.

MAMMOTH SOUTHERN CURLED

35 Days—This beautiful curled variety is the most popular and used more than any other especially in the South. Vigorous, hardy and good quality. Leaves long and wide, light green with a yellowish tinge, crumpled and frilled on the edges.

TENDERGREEN OR MUSTARD SPINACH

25 Days—An Oriental type which is very popular. It has a pleasant flavor, more like that of spinach but with a sweet and pungent taste. It is exceedingly early, ready for cutting in 3 to 4 weeks. The plants are slow to seed and resist hot dry weather as well as cold. Upright growth with broad, flat, smooth leaves; spoon-shaped and dark green.

OSTRICH PLUME

35 Days—A handsome, strong growing variety, slow to shoot to seed. Leaves bright green, plume-like, curled and fringed.

Florida Broad Leaf Mustard

Mammoth Southern Curled
Mustard

Healthful
"Greens"

FLORIDA BROAD LEAF

40 Days—This is a smooth leaf variety growing upright with bright green leaves, broad and thick, with cut edges and white midribs.

CHINESE BROAD LEAF

40 Days—A hardy variety having immense broad, rich green leaves thick and deeply savoyed with a white midrib.

WHITE OR YELLOW LONDON

40 Days—This variety is distinctly pungent and used when quite young for salad or garnishing. Seeds are large, cream colored, used for seasoning and the manufacture of ground mustard.

Mushroom Spawn

MUSHROOMS can be grown easily in a cellar, shed or greenhouse provided the moisture and temperature are uniform. Full directions in our "Buist's Mushroom Culture." Write for a copy, sent free on request.

LAMBERT'S PURE CULTURE SPAWN

The finest spawn prepared in brick form which produces large creamy white mushrooms of excellent quality. Full cultural directions included with each order.

Not Prepaid: Per brick, 35c; 5 bricks, \$1.50; 10 bricks, \$2.75; 25 bricks, \$6.50.

Postpaid: By mail add 10c per brick, 15c per 5 bricks, 25c per 10 bricks.

Buist's Okra or Gumbo

49

2 Ozs. per 100 Ft.; 8 Lbs. per Acre

THIS tasty vegetable is used throughout the entire country. It is a highly important vegetable in the canning industry, used to give body and impart a tang to soups, tomato catsup and other relishes. For home use boil the young pods the same as you would green beans; serve plain with butter or cut up in soups or stews. Very tender when 2 to 3 ins. long.

Culture—Plant the seed late in the Spring, about corn planting time, observing that the ground is warm, for if cold and moist the seeds will invariably rot. Sow 1 in. deep in

rows 3 ft. apart and thin to 1½ ft. apart in the row. Cultivate like corn.

Perkin's Mammoth Green Pod Okra

BUIST'S

DWARF PROLIFIC LONG GREEN POD

50 Days—This is the most popular dwarf Okra, very early, strong and vigorous, sending out many branches bearing pods in great abundance from an in. above the ground to the top. These characteristics have established this variety as a profitable sort for growers and it is well adapted to home garden use. Plant 3 ft. with dark green, corrugated, pointed pods, 5 to 6 ins. long, 1¼ ins. in diameter at the bottom. Very tender and of excellent quality.

PERKIN'S MAMMOTH GREEN POD

60 Days—This variety is the most productive known, forming enormous sized pods, highly prized by growers and preferred for its tenderness by canners who preserve it hermetically for Winter use. Plant 4 to 5 ft., producing 20 to 30 pods, 7 to 8 ins. long. Beautiful deep green in color; thin, slightly ridged, pointed and tender.

TALL OR LONG GREEN

60 Days—A tall-growing variety producing an abundance of long, thin, ridged pods; bright deep green in color.

WHITE VELVET OR CREOLE

55 Days—A distinct variety without ridges, having round smooth pods of a greenish white, covered with a fine fibre resembling velvet. Plants prolific, 3 to 3½ ft., producing pods 6 to 7 ins. long; meaty and tender.

Onion Sets

Buist's Selected Onion Sets

2 Qts. per 100 Ft.; 10 Bus. per Acre

WE ARE extensive growers of Onion Sets, taking great care to plant the very best strain of stock seed. Our reputation is established for supplying choice sets; clean, small and uniform.

Culture—Plant in the Spring as soon as the ground can be worked, or in the South, set out in either Fall or Spring. The richer the soil, the better. Firm the sets in drills about ½ or an inch deep, 1½ ft. apart and 3 ins. apart in the row, but do not cover them entirely. If desired plant closer and thin out the green onions in a few weeks for use as scallions. Keep the ground free of weeds by frequent hoeing. The tops begin to die and fall over in July at which time the onions are ready for lifting. For Fall and Winter keeping, store the bulbs in a dry, cool, airy place.

Egyptian Top Sets or Winter Onions are planted only in the Fall. They do not form a bulb and are grown as a green onion or scallion ready to eat early in the Spring.

Buist's Pedigree Onion Seed

How to Grow Onions

To produce large Onions sow 1 Oz. per 100 Ft.,
4 Lbs. per Acre—For "Picklers" sow 25 Lbs. per Acre

Buist's
Yellow Globe
Danvers Onion

How to Grow Onion Sets

60 to 70 Lbs. per Acre

Culture—Onion Sets are small undergrown onions, made so by sowing the seed very thickly in shallow drills early in the Spring. The same culture as for large onions is necessary. The best varieties to use are Japanese, Yellow Strasburg, Red Wethersfield and White Silver Skin. The young plants form sets about the size of marbles by Midsummer. When the foliage becomes brown and dry they are ready for harvest. Cure and store in shallow racks placed in a dry, cool, airy place. Freezing will not hurt them if they are not handled while in that condition.

BUIST'S YELLOW GLOBE DANVERS

110 Days—Outstanding in popularity, this variety is the most extensively grown main crop Yellow Onion, both for the market and the home garden. A leader with large producing onion growers. A sure cropper, highly productive, maturing earlier than the Southport Yellow Globe; hardy and excellent Winter keeping qualities. Bulbs medium size, uniformly globe-shaped, pure yellow, solid, with tough adhering skin. Flesh white, crisp and rich in flavor.

Culture—Big crops and large onions require extra good soil and lots of water. They are heavy feeding plants with numerous spreading roots that absorb nourishment from every part of the soil.

They thrive best in muck or a deep peat, but any good soil will grow onions if a liberal use of manure or other suitable high grade commercial fertilizer is applied. Onions may be cultivated in the same land for a succession of years if the ground is renewed with fertilizer for every crop. After the soil is plowed, work the fertilizer with the top soil. Rake or harrow until level, being sure the soil is thoroughly mixed and pulverized. Onion Seed is hardy and can be planted $\frac{1}{4}$ to $\frac{1}{2}$ in. deep, as early as the ground can be prepared in rows $1\frac{1}{2}$ ft. apart. When 3 ins. high thin out to 3 ins. apart in the row. They may be thinned again when 8 ins. high, using the removed plants to eat as green onions. It is important to keep the weeds out especially when young. Cultivate frequently until the tops begin to die and fall over at which time they are ready for lifting. When cured, store in a dry, cool, airy place.

Varieties of the larger type such as Riverside Sweet, Prizetaker and Mammoth Silver King mature to greater size if the seed is planted under glass during February and March and transplanted to the open ground in April.

SOUTHPORT YELLOW GLOBE

115 Days—This is a standard variety known throughout the United States and preferred by many to any other variety because of its handsome color, uniformity in shape and fine keeping qualities. A large, solid globe onion with very small neck tightly covered with a deep yellow skin. Flesh is whitish, lemon-yellow, fine grained and of a rich, excellent flavor.

Produce Quality Crops

Onion Seed—Yellow Sorts

BUIST'S YELLOW PRIZETAKER

"The King of All"

100 Days—The Great Yellow Prizetaker Onion is famous throughout the country for its enormous size, beautifully formed, and attractive onions it produces. Under right conditions it often attains a size of 2 to 3 lbs. in weight. A single onion will make a dish for a small family. We recommend Prizetaker to home gardeners and truckers. Our selected strain will give results. Matures early, is highly productive and keeps well into the Winter. Bulbs large, solid, uniform and perfectly globular. Skin light straw color, thin and glossy. Flesh white and tender, delicate and mild in flavor.

RIVERSIDE SWEET SPANISH

110 Days—A large Spanish type onion grown extensively in Southern California and gaining in popularity in the East. An ideal onion for the South, as it requires a warm long season for best development. Bulbs similar but larger than Prizetaker, globular with a small neck; skin golden yellow; flesh pure white, of an exceptionally mild, sweet flavor.

Buist's Yellow Prizetaker Onion

MOUNTAIN DANVERS

100 Days—Ever increasing in popularity, this Danvers type is very superior and is noted for earliness, productiveness and excellent storing and shipping qualities. Bulbs large, globe-shaped, slightly flattened at the base, hard and heavy with thick skin of pure deep amber. Flesh creamy white, tender, crisp and rich in flavor.

OHIO YELLOW GLOBE

110 Days—An excellent strain of yellow globe-shaped onions popular among the large onion growers of Ohio and a fine variety to grow anywhere. Very productive, attractive, keeping firm and solid when stored for Winter. Bulbs are small necked, medium large, globular, clear yellow with fine flesh.

JAPANESE OR EBENEZER

100 Days—The best and most desired variety for producing yellow onion sets. The sets ripen well, are deep, flat, dark yellow, very firm and hard with thick skin; extra fine keepers. When planted out they produce a bumper crop with an exceptionally small per cent of "stiff-necks" or seed stalks. They make an early mature onion for market. Being hard and sound they will keep in excellent condition all Winter. Flesh pure white, mild and sweet in flavor.

YELLOW DUTCH OR STRASBURG

100 Days—A popular standard variety used principally for growing sets. The sets are flat, straw colored, firm and splendid keepers. They produce nice onions with white flesh well flavored.

White Sorts

SOUTHPORT WHITE GLOBE

110 Days—This standard variety is the best of the white onions. Our strain produces uniform globe-shaped bulbs, handsome in appearance, and commanding higher prices as a market onion. It is a fair keeper, perhaps the best of the white varieties for Winter storage, but, like all white onions, not so long-keeping as the yellow. Bulbs medium sized, solid, silvery white, with thin skin. Flesh waxy white, fine grained and of a delicious mild flavor.

WHITE SILVER SKIN OR PORTUGAL

100 Days—This popular and largely used onion is used for growing white onion sets, small picklers, early bunching green onions and for producing large onions the same season. A dependable cropper and fair keeper. Matured onions are medium sized, pure white, thick-flat; flesh fine grained, firm, hard and of a mild, delicate flavor.

EARLY WHITE BARLETTA

88 Days—Regarded as the earliest variety in cultivation. It is a grand onion for pickling purposes and if sown thickly in rows will produce small, nearly round, onions the size of marbles. When the crop matures the tops die down close to the bulb, leaving the most perfect miniature onions imaginable, ranging from 1 to 1½ ins. in diameter. Pure paper-white color, exceedingly mild and delicious in flavor.

*Hardy Bunching
a Money Crop
for Spring or Fall*

Hardy White Bunching Onion

Early White Barletta

HARDY WHITE BUNCHING

60 Days for bunching—The earliest and best white bunching onion. This variety does not form bulbs and is used exclusively for early green onions or scallions. Recommended as a money maker for market gardeners. Sow the seed thickly in rows in the late Spring or early Summer and earth up gradually to blanch the stalks as far up as possible. They will then produce single long white tender shoots which are brittle and mild in flavor. Seeds may be sown as late as August or September. Very hardy and will withstand Winter better than any variety of white bunch onion.

MAMMOTH SILVER KING

100 Days—An Italian variety and the mildest, largest and most attractive of this type. Bulbs deep-flat, beautiful silvery white; flesh tender, sweet and really a delicately flavored mild onion.

**EXTRA EARLY
WHITE PEARL**

90 Days—Beside being largely used for pickling and sometimes for early green onions, it is one of the best varieties for the South. Very early, almost transparent as a pearl, the bulbs are small, flat, pure white and of a mild and pleasant sweet flavor.

Onion Seed—Red Sorts

SOUTHPORT RED GLOBE

115 Days—This is the finest red onion to grow, having the same characteristics as the Southport Yellow Globe except color. The skin is a shiny deep purplish red; flesh white with a faint pink tint. It is late ripening and an excellent keeper. When red onions are preferred, try this variety.

LARGE RED WETHERSFIELD

100 Days—This is one of the best known standard varieties and is used either for producing large onions the same season or for producing sets. Productive and a fine keeper. Bulbs when mature are medium large, true flat on bottom and slightly sloping on top; purplish red skin. Flesh slightly flushed with pink, fine-grained, firm and a rather strong flavor.

Southport Red Globe Onion

Bermuda Onion Seed *Genuine Teneriffe Grown*

WE MAKE a specialty of growing and importing the Bermuda types of Onion Seed from Teneriffe, in the Canary Islands, where the best Bermuda Onion Seed in the world is produced. Our strain is absolutely pure. These varieties of onions are very extensively raised in Southern California, Texas and other Southern States where thousands of carloads are annually grown for shipment to Northern markets. If growing for onions or plants it is important to secure reliable seed; our imported Teneriffe Grown is the very finest strain.

Crystal White Wax Onion

CRYSTAL WHITE WAX

95 Days—This variety is very popular in the South, especially with the onion growers of Texas for shipping to Northern markets. An absolutely pure white onion of a beautiful waxy appearance, the sweetest and mildest of all the Bermuda Onions. It is not a keeping variety, but is early and in great demand for immediate use. Bulbs very flat, medium sized, with thin skin. It is very fine for slicing, the color being so clear and pure.

YELLOW BERMUDA

95 Days—Before the introduction of the Crystal White Wax this variety was called White Bermuda. In appearance it is really a light straw color or pale yellow. The plants are extremely thin-necked, insuring even and early ripening. A very profitable sort for market gardeners and shippers. The sweetest and mildest of all onions. Bulbs flat, medium sized; flesh nearly white and coarse.

RED BERMUDA

95 Days—This is the most popular variety for home and market use, a well-known standard for early shipping. The skin is waxy, loose and rubs off easily. Bulbs flat, medium-sized, solid, not a definite red, but a purplish red. Flesh pinkish white, mild and sweet.

Parsley . . .

PARSLEY takes up little room in the garden. It is valuable for garnishing and flavoring.

$\frac{1}{2}$ Oz. per 100 Ft.; 3 Lbs. per Acre

Buist's Garnishing Parsley

Culture—Sow the seed early in the Spring thickly in rows 1 ft. apart, $\frac{1}{2}$ ins. deep pressing the soil firmly and thin to stand 4 to 6 ins. apart in the row. Do not be disheartened if the plants do not appear within a month, because the seed is very slow to germinate. The seed will germinate more quickly if soaked a few hours in warm water before sowing. The leaves are ready to cut when 3 ins. high, every cutting improving the quality. For Winter use protect in a frame.

BUIST'S GARNISHING

70 Days—This is the most salable of all varieties noted for its strong growth, dwarf habit and beautifully curled, finely cut, emerald green leaves. It stands the Winter well, makes an attractive bunch and is a favorite.

Highly recommended for market gardeners.

DARK MOSS CURLED

70 Days—A beautiful compact plant with finely cut and tightly curled, dark green leaves that look like moss. Excellent for garnishing.

DOUBLE CURLED

70 Days—The significance of the name distinguishing Double Curled from the Single variety makes this the popular choice for home and market gardeners. It is a very desirable variety, quite dwarf with curly, finely cut, dark green leaves. Stands the Winter well and retains its color the entire season.

PLAIN OR SINGLE

60 Days—Also called Italian Parsley. A very hardy and prolific variety with dark green deeply cut, flat leaves but not curled and strong in flavor. Foliage excellent for soup or pot herb bunches.

HAMBURG ROOTED OR GERMAN

90 Days—Single leaves with long, slim, tapering roots resembling small parsnips in shape and color. Roots are used for flavoring soups and stews.

Parsnip

1 Oz. per 100 Ft.;
4 Lbs. per Acre

A FALL and Winter vegetable. They are delicious boiled, then split and browned in butter. Beside being popular for table use, they are suitable for stock feeding.

Culture—They do well in deep, loose, rich soil, taking caution not to plant in stony soil and raw manure as they are likely to produce divided roots. Sow in the Spring as soon as weather permits in rows $\frac{1}{2}$ in. deep, $1\frac{1}{2}$ ft. to 2 ft. apart and when plants are large enough thin out to 4 ins. apart in the row. The seed is slow to sprout and requires abundant moisture. Cultivate throughout the growing season and keep the ground moist if possible. The sweetness of parsnips is improved by frost. The hardy roots can remain in the ground all Winter, digging them during a thaw as needed, or they may be stored in a cool cellar.

Sugar or Hollow Crown Parsnip

SUGAR OR HOLLOW CROWN

95 Days—This is the standard, the best and most popular variety for home and market gardeners. Truckers are satisfied that our parsnip is as fine as can be bought anywhere. Roots 12 to 14 ins. long, $2\frac{1}{2}$ to 3 ins. thick at shoulder, hollow crowned, uniformly tapering to a small root. Handsome in appearance with smooth, clean, white skin and a much desired small core which helps to make them tender when cooked. For fancy marketable size roots pull when the shape is intermediate, a length of 8 to 10 ins.

**2 Lbs.
per 100 Ft.;
2 Bus. per Acre**

Culture — Prepare well-enriched soil and plant in rows 2 to 3 ft. apart, 1 to 2 ins. deep and 1 to 2 ins. apart in the row. The hardier, smooth-seeded peas, such as Buist's Extra Early Morning Star, will stand freezing weather without rotting in cold ground and may be planted as early in the Spring as the ground can be worked. Follow with the wrinkled seeded sorts which are not as hardy and have a tendency to rot if the ground is too cold and wet. Plant several varieties which will mature one after another; also make successive plantings every week to the end of Spring. Peas are a cool weather crop and require plenty of moisture. Discontinue plantings after the middle of May until the middle of August when an extra early sort can be sown. Truckers never stake peas, but it is best for the home gardener to supply brush or supports for the tall growing varieties. Cultivate until the vine interferes with the work.

BUIST'S EXTRA EARLY MORNING STAR

The Earliest Pea of All
Ready for Picking in 52 Days

Pecks and over are put up in lead-sealed Sacks.

Buist's Morning Star Peas have always maintained a very high reputation with gardeners. They are much earlier, hardier, more productive and withstand greater changes of weather than any other variety. Their fine quality excels in purity, made possible by our selecting and re-selecting the seed stock for a number of years. They are, without a doubt, the Earliest Pea on the market, and are entirely free from runners never requiring sticking. They ripen so uniformly that the entire crop can be taken off in two pickings.

The vines are light green, 24 to 30 ins. tall. Pods light green, 2½ ins. long, blunt, plump, contain 6 to 7 small peas, sweet and tender. A smooth seeded variety.

Pkt., 10c; lb., 30c; 2 lbs., 55c; 7½ lbs., \$1.65; 15 lbs., \$2.75

Buist's Garden Peas

Produce Delicious Fresh Green Peas of the Best Quality
First Early, Hardy, Smooth-Seeded Varieties

OUR own grown Peas are produced from the best stock seed raised from individual plant selection. Buist's growing stations located in the Northwest on irrigated land of high elevation make the hardiest and finest seed you can buy.

Buist's
Early Klondike Peas

ALASKA

55 Days—An extremely early variety well known with home gardeners and the standard among canners. Seed is bluish in color. Vines light green, 30 ins. tall. Pods light green, 2½ ins. long, round, blunt, straight and contain 6 to 8 small peas of tender quality.

BUIST'S EARLY KLONDIKE

60 Days—The distinctive merit of this variety is its great hardiness combined with exceptional quality and productiveness. It can be planted earlier as it will stand severe changes of weather without rotting in the cold ground. Vines medium green, 30 ins. tall, producing a tremendous crop of long, dark green pods filled with peas of fine quality.

EARLY BIRD OR LAXTON'S SUPERB

60 Days—Do not overlook the important advantages of this variety which we recommend for home use and as a money maker for the trucker. It is the earliest large-podded dwarf variety, very resistant to cold, wet weather. For a marketable pea it is attractive and uniform in size. Vines light green, 18 to 20 ins. tall, very productive. Pods dark green, 4 ins. long, curved, pointed and contain 9 to 10 large, tender peas of fine quality.

IMPROVED PILOT

62 Days—A very profitable pea for market gardeners and shippers. A vigorous grower, standing severe changes of weather and can be planted soon as the ground can be broken. Vines medium green, 30 ins. tall, loaded with well-filled pods dark green in color, 4 ins. long, broad, pointed, straight and contain 8 to 9 fine, large peas.

LARGE PODDED ALASKA

63 Days—An extra early variety resembling Alaska, but the peas and pods are almost double the size. Vines light green, 36 ins. tall, loaded with well-filled pods, 3½ ins. long, slightly curved and pointed. An excellent hardy pea for market or home use; highly productive, tender and sweet.

AMEER OR CLAUDIT

63 Days—A popular pea with gardeners for early planting. Vines medium green, 36 ins. tall, a heavy cropper. Pods green, 3½ ins. long, somewhat curved, pointed and contain 7 to 8 peas of fine flavor.

Large
Podded
Alaska
Peas

Buist's Wrinkled-Seeded Early Peas

Laxton's Progress Peas

LAXTON'S PROGRESS

60 Days—This attractive pea has every requisite to satisfy the home and market gardener. Shippers to distant markets demand peas of the Laxtonian family. The Laxton's Progress belongs to that family, but the improvement is so noticeable that the pea is in great demand by all pea growers. It is a trifle earlier, a heavier yielder and a large podded-type averaging one more pea than Laxtonian. Vines medium dark green, dwarf, 16 to 18 ins. high, foliage heavy. Pods handsome, dark green, uniform in size, $\frac{7}{8}$ in. wide, $4\frac{1}{2}$ ins. long, slightly curved and contain 7 to 9 extra large, tender peas of delicious flavor.

NOTT'S EXCELSIOR

62 Days—An early, dwarf variety very desirable for the home garden. Vines dark green, 16 ins. tall bearing light green pods 3 ins. long, round, with blunt ends and contains 6 medium sized, tender peas.

PREMIUM GEM

64 Days—An improved Little Gem recommended as a valuable home garden variety. Vines very productive, dark green, 18 ins. tall. Pods light green, $2\frac{3}{4}$ ins. long, filled with 6 to 7 peas of fine quality.

LAXTONIAN

62 Days—This pea is well known and always a leader for home gardeners, truckers and for shipping. Our strain of this early, dwarf, large podded variety is exceptionally fine. Vines dark green, large foliage, 18 ins. tall. Pods dark green, broad, 4 ins. long, somewhat curved, pointed and contain 7 to 8 large, sweet luscious dark green peas.

HUNDRED FOLD

63 Days—This handsome pea of the Laxtonian type is highly recommended for home and market gardens and for shipping. A large podded variety on dwarf vines 18 ins. tall, wonderfully prolific. Bears dark green pods 4 ins. long, broad and pointed, containing 8 large dark green peas of delicious flavor.

BLUE BANTAM

64 Days—A very fine, dwarf, dark green strain of the Laxtonian type maturing a few days later. Gardeners in many sections prefer this pea to any other. Strong growing vines 18 ins. high, bearing an abundance of dark green pods 4 ins. long, broad, straight, pointed and contain 8 very large, deep green peas of superb quality.

PETER PAN

62 Days—One of the finest large-podded, dwarf peas in the Laxtonian class. A profitable pea for home or market garden. Vines 18 ins. high, bearing attractive pods $3\frac{3}{4}$ ins. long, very broad, straight and pointed; contain large well filled peas of the finest quality.

AMERICAN WONDER

60 Days—One of the oldest and most popular extra early wrinkled peas especially adapted for home gardens. Vines dark green, dwarf, 14 ins. high and very productive. Pods light green, 3 ins. long, firm, plump, straight, blunt-ended and well filled with 6 medium sized tender peas of sweet and delicious flavor.

Buist's *Wrinkled-Seeded Early* Peas

Early Gradus Peas

EARLY GRADUS

65 Days—This is an outstanding pea in popularity always reliable and famous for its fine qualities. It is exceptionally hardy and used extensively for home gardeners, truckers and for shipping. Vines light green, stocky, 36 ins. tall, producing medium green pods 4 ins. long, broad, plump, pointed and contain 8 to 10 peas as sweet and tender as any variety could be.

WORLD'S RECORD

61 Days—A strain of Gradus but ready for picking about 4 days earlier. Exceedingly hardy and one of the best for gardeners and first early markets. Vines are vigorous and very productive, 30 ins. high. Pods dark green, 4 ins. long, broad, pointed, plump and well filled with handsome, large, tender peas of excellent quality.

BUIST'S EARLY WONDER

58 Days—Many enthusiastic customers describe Buist's Early Wonder as a remarkable pea, yielding an abundance of large pods on so dwarf a vine that a blindfolded person can pick them. It is the finest first early wrinkled pea that we offer to home and market gardeners. Vines grow only 18 ins. high with attractive, heavy, rich green foliage. Pods dark green, broad, 4½ ins. long and tightly filled with 8 to 9 large dark green peas of a delicious sweet flavor.

THOMAS LAXTON

63 Days—Sweetness and delicacy of flavor has popularized this early variety among home gardeners, truckers, shippers and canners. They all know and use this quality pea. Vines medium green, vigorous, 30 to 36 ins. tall. Pods dark green, 3½ to 4 ins. long, broad, plump, straight with square ends and contain 7 to 8 large, tender peas of good quality.

LITTLE MARVEL

62 Days—A delicacy of sweetness. Always popular, having outstanding qualities. It is early, hardy, a heavy yielder and remains in prime picking condition longer than most sorts. Vines dark green, dwarf, 18 ins. high. Pods dark green, 3 ins. long, nearly round, square-ended, filled with 7 to 8 peas which are dark green, appetizing in appearance, very tender and sugary.

Thomas Laxton Peas

Buist's Wrinkled-Seeded Late Peas

59

BUIST'S IMPROVED TELEPHONE

74 Days—This standard variety is the popular choice of the tall, late peas. Our strain is dark podded and unsurpassed in size and appearance. Always a big demand for Buist's Improved Telephones among home gardeners, truckers and shippers. Large dark green leaves on vigorous vines 4 ft. high bearing an extraordinary crop. Pods rich, dark green, 5 to 5½ ins. long, broad, plump, straight, pointed and filled with 8 to 9 mammoth peas of excellent flavor.

PRINCE EDWARD

75 Days—Market gardeners like the splendid shipping qualities, the appearance of the large dark pods and the sweetness of the pea. Vines coarse, dark green, 4 to 4½ ft. high, vigorous and strong. A heavy cropper of dark green pods 5 ins. long, straight and thick, filled with 8 to 9 immense peas.

ALDERMAN

75 Days—Telephone type. Excellent for home and market. Vines 4 ft. high. Pods rich, dark green, 5 to 5½ ins. long, broad, plump, straight, pointed and contain 8 to 9 mammoth peas of finest quality.

WYOMING WONDER

75 Days—A new late variety in demand among home gardeners, roadside markets and truckers. It is unequalled in the size of pod and has the unusual quality of remaining tender and sweet a week after reaching the picking stage. Vines vigorous, 24 to 28 ins. tall, bearing an extraordinary crop. Pods rich, dark green 5 to 6 ins. long, broad, plump, straight pointed and somewhat curved at the tip filled with 8 to 9 mammoth peas.

DWARF TELEPHONE OR DAISY

78 Days—A standard pea well liked for home and market gardeners and for shipping. A suitable variety to follow the early sorts in the home garden. Vines light green, 24 ins. tall, stocky, bearing an abundance of light green pods, 4½ ins. long, broad, straight and pointed containing 8 to 9 peas of fine quality.

POTLATCH

OR IMPROVED STRATAGEM

80 Days—In selecting your main crop peas do not overlook this famous variety. Vines dark green, 30 ins. tall, of strong, robust branching habit requiring but slight support. An enormous cropper of immense, handsome, dark green pods, 4½ ins. long, ⅞ in. wide, nearly round, straight and pointed, containing 8 to 10 delicious peas.

Smooth-Seeded Late Varieties

LARGE WHITE MARROWFAT

75 Days—A popular well-known variety in the South used for home gardens. It is a strong grower, very hardy and will outyield all other varieties on poor ground. Vines light green, 5 ft. tall. Pods light green, 3 to 3½ ins. long, very plump, straight and contain peas of a rich marrowy flavor.

Edible Pods

THE brittle, tender pods and round peas within are prepared and cooked the same as String Beans.

MAMMOTH LUSCIOUS SUGAR

74 Days—Excels all other sugar peas in size, productiveness and quality. Vines light green, coarse, 5 ft. high, blossoms purple. Pods fleshy and stringless, light green in color, 5 ins. long, broad, straight, blunt ended and indented containing 8 peas. Seeds large, mottled gray.

MAMMOTH MELTING SUGAR

74 Days—A well known large podded edible variety. Vines light green, coarse, 5 ft. high. Pods fleshy and stringless, light in color, long, often curved or twisted, broad blunt, indented and contains 7 peas. Seeds large, smooth and white.

DWARF GRAY SUGAR

68 Days—A prolific dwarf variety with slender vines, 24 ins. high, blossoming purple. Pods light green, 3 ins. long, curved, semi-pointed and indented. Seeds small, mottled gray.

DWARF WHITE SUGAR

68 Days—A small podded, productive variety with slender vines, 28 ins. high. Pods light green, 2½ ins. long, curved or straight, semi-pointed, tightly filled with peas.

Buist's Sweet Peppers

World
Beater
Pepper

1 Oz. for 1,000 Plants; 3 Oz. per Acre

Culture—They require a warm temperature to germinate and the cultural requirements are the same as for Egg Plant described on Page 35. When the ground is warm, about corn planting time, transplant the peppers in rows 2½ ft. apart in the row. They are very easy to grow, thriving in rich, well-prepared soil frequently cultivated. They will bear in abundance up to the first killing frost. Sweet and hot peppers will mix; be careful in planting.

CALIFORNIA WONDER

75 Days from Plants—A popular pepper throughout the United States possessing qualities that make it ideal for stuffing or salads. The thickness of flesh, often measuring ¾ of an in., unknown in any variety of pepper, is one of the points of excellence. In addition, it is firm, crisp, juicy, sweet and mild without a trace of pungency. Plants upright and prolific. Fruits 4-lobed, 4 x 4½ ins., very attractive, smooth, uniform, very heavy and deep green changing to bright crimson at maturity.

SWEET PEPPERS are large, thick-fleshed and pleasantly mild in flavor. They are a very popular vegetable used in salads, for stuffing and for tasty combinations mixed with other vegetables and with meats.

WORLD BEATER

75 Days from Plants—This is a leading favorite with market gardeners and shippers all over, particularly so in the South. It combines the size of the Chinese Giant and the attractive shape and color of the Ruby King. Plants sturdy, erect and very productive. Fruits 4-lobed, 3½ x 5 ins., glossy and smooth, deep green when young changing to bright scarlet when ripe. Flesh unusually thick, mild and sweet.

CHINESE GIANT

80 Days from Plants—This is the largest mild pepper ever developed, measuring 4 to 5 ins. in diameter and of equal length. It is deliciously sweet and an ideal home garden variety. Plants dwarf, stocky and thickly set with enormous, unusually shaped, but attractive fruits that are chunky, twisted, slightly crumpled and square ended; color rich, bright green changing to a scarlet red when ripe. Flesh thick and tender.

HARRIS' EARLY GIANT

63 Days from Plants—The earliest of all large peppers and a very valuable variety for market gardeners in the North. Plant dwarf, erect and a heavy yielder. Fruits block-shape, 3½ x 4 ins., slightly tapered, 3-lobed, dark green changing to red when ripe. Flesh sweet and mild.

BELL OR BULL NOSE—SWEET

60 Days from Plants—An early, prolific, standard variety with blunt fruits 2¾ x 3 ins. deep green changing to scarlet; flesh thick and mild in flavor.

EARLY NEAPOLITAN

60 Days from Plants—A first early prolific variety valuable for home and market gardeners. Fruits grow upright, 2 x 4 ins., 3-lobed, yellowish-green changing to bright red. Flesh mild and sweet.

Buist's Sweet Peppers

61

RUBY KING

70 Days from Plants—A reliable standard variety for home, market garden and shipping. Plants erect, vigorous and very productive. Fruits 3 x 5 ins., tapering, dark green turning to red. Flesh crisp, tender, and very mild and pleasant to the taste.

SPECIAL RUBY KING

68 Days from Plants—A special strain retaining all the good quality of the older type, but bred to produce larger, better shaped, more uniform fruits. It packs well and is a dandy variety to grow for early market or shipping. The fruits are 3 to 4 ins. in width and 5 to 6 ins. in length with broad lobes tapering to three points, dark green changing red. Flesh exceptionally thick, tender, sweet and mild.

SUNNYBROOK

73 Days from Plants—A small, flattened, tomato-shaped pepper. Plants compact, and loaded with clusters of beautiful peppers. Fruits borne upright, 2 x 3 ins., deep green changing to a glossy, deep red. Flesh thick, juicy and sweet.

BUIST'S SELECTED RUBY GIANT

75 Days from Plants—Our strain of this handsome pepper runs true and uniform and well merits the compliments of market gardeners and shippers to be the finest on the market. Plants strong, erect and productive. Fruits large, 3½ x 5 ins., slightly tapered, 4-lobed, dark green turning to bright red at maturity. Flesh thick, mild and sweet. Splendid for stuffing. An excellent shipper.

PIMIENTO

73 Days from Plants—The sweetest variety. Used extensively by canners, it is also desirable for home use in salads and for stuffed peppers. Plants tall and productive. Fruits heart-shaped, 2½ x 3½ ins., very smooth, tapering to a single point, dark green turning to crimson. Flesh very thick and mild.

GOLDEN QUEEN

78 Days from Plants—A very attractive yellow pepper, sweet and mild in flavor. Fruits 3-lobed, 3½ x 4 ins., tapered, dark green changing to a beautiful golden color.

Hot Peppers

HOT PEPPERS are usually small, the smaller the hotter. They are used for seasoning pickles, relishes, etc., and in vinegar as a pungent appetizer.

HOT BELL OR BULL NOSE

60 Days from Plants—This is the hot Bull Nose, identical in shape as the sweet variety, but with a pungent taste.

LONG RED CAYENNE

70 Days from Plants—The most popular hot variety used for canning, pickles and drying. Plants large with fruits borne in great abundance, ½ to 4 ins., tapering to a point, twisted and deep green changing to red.

TABASCO "HOTTEST OF ALL"

90 Days from Plants—The well known Tabasco Sauce is made from this variety. Plants producing numerous small, slender fruits ¾ x 1 in. Greenish-yellow changing to scarlet-red; extremely hot and fiery in flavor.

ANAHEIM CHILI

80 Days from Plants—A long hot pepper used for canning and drying. Fruits 1 x 6 ins., tapering gradually. Green turning to scarlet.

RED CHILI

82 Days from Plants—A hot variety used for seasoning and pepper sauce. Plants productive bearing erect small, conical fruits ½ x 2½ ins. Yellowish green changing to red.

LONG HOT OR FINGER

80 Days from Plants—A thick-meated, very hot variety. Fruits 1½ x 6 ins. tapering to a point. Green changing to scarlet.

LARGE RED CHERRY

85 Days from Plants—A very hot variety used for seasoning and pickling. Fruits 1½ ins. in diameter, solid and smooth, dark green changing to deep scarlet.

SMALL RED CHERRY

82 Days from Plants—Smaller fruits than the Large Red Cherry, averaging 1 ins. in diameter.

Buist's Selected Seed Potatoes

Irish Cobbler Potatoes

$\frac{1}{2}$ Peck (7 $\frac{1}{2}$ Lbs.) per 100 Ft.;
10 Bus. per Acre

Culture—The most important vegetable of all. Potatoes will grow in any good soil. Cut the tubers to 1 or 2 eyes. Plant in rows 3 ft. apart, 3 ins. deep and 15 ins. apart in the row. Cultivate frequently and thoroughly. The early varieties mature in 80 to 100 days, the main crop varieties up to 140 days. Dig when the foliage turns yellow.

IRISH COBBLER

An early, heavy cropper, the most profitable to grow for early market. They produce good sized potatoes, nearly round, all of marketable size and of excellent quality. A splendid keeper and we recommend it highly. Skin is yellowish white, thin and smooth.

BUIST'S EARLY SUNRISE

A variety possessing extreme earliness and great productiveness, bearing potatoes ready for the table in 52 days from time of planting. A fine keeper and a splendid variety for the home garden. Tubers are oblong, large, solid, uniform and handsome. Pinkish skin.

HOULTON EARLY ROSE

The Houlton stock of Early Rose when strictly pure is regarded as the earliest and most desirable stock for planting. They are from Houlton, Maine. Tubers are large and long, of perfect form, skin thin, light pink.

SPAULDING'S No. 4 ROSE

An especially desirable potato for growers and shippers. Similar to the Early Rose except that it is smoother, larger and somewhat flatter; a trifle later and a better shipping variety.

BLISS EARLY RED TRIUMPH

An extra early variety, medium size, round and uniform in shape with eyes slightly depressed. Skin a beautiful light red.

GREEN MOUNTAIN

This is the most popular late variety. Thrives in any soil and all localities. A great cropper and a large attractive potato; broad oval in shape with small shallow eyes. We highly recommend this splendid Winter keeper.

RUSSETS

A reliable late variety, strong grower and heavy cropper and popular for its disease-resistant qualities. Tubers are uniform in size, large, oblong and rather flattened. Skin an attractive russet and smooth. A dependable Winter keeper.

STATE OF MAINE

One of the very best varieties for Fall or to put away for Winter and Spring use. A good cropper, medium early, of fine quality and attractive appearance. Tubers large, oval, slightly flattened.

JERSEY RED SKIN

Not ready for shipment until after June 1st. A variety that is very popular with the farmers of South Jersey for late planting. They are planted late in June and early July and never fail to make a crop. A strong grower, very productive and not subject to blight. Light frosts help to hasten the development of the tubers. Never dig until very late Fall. Tubers medium size, oblong; skin red and smooth; flesh white, dry and very mellow.

Maine Grown Seed Potatoes

The Potato market is unsettled at the time this catalog goes to press and we are unable to name prices. Kindly write stating kind and quantity wanted and we will be pleased to quote by letter.

NOTE: Potatoes are ready for shipment about March 1st. If small quantities are wanted by mail, please add postage to cover cost of parcel post. Larger quantities are forwarded by express or freight f.o.b. Phila. 1 peck weighs 15 lbs., bus. 60 lbs., sack 150 lbs.

1 Oz. to 25 Hills; 4 Lbs. per Acre

Culture—Sow in May or June in warm, rich soil. A good time and location is to plant in the cornfield when you plant corn. Plant in hills 1 in. deep, 6 to 8 ft. apart each way or further, as the vines like plenty of room to ramble. When the plants appear above the ground, dust with air-slacked lime or land plaster mixed with dry soil to control the striped beetle. It is best to avoid planting near other vegetable vines or pumpkin varieties.

MAMMOTH KING OR JUMBO

120 Days—This is the largest pumpkin grown used for decorating stores around Hal- lowe'en and Thanksgiving and for exhibiting at fairs. It averages about 60 lbs. but frequently weighs 100 lbs. Fruits round, slightly ribbed. Skin a bright orange. Flesh yellow, firm, a little coarse in texture but of good quality for table use and splendid for stock feeding.

WINTER LUXURY

100 Days—A splendid pie pumpkin; early, somewhat larger than Small Sugar and the best Winter keeper. It is nearly round, 8 to 9 lbs. and ideal for making jack-o-lanterns, for which purpose it is well suited. Skin is golden russet with fine and even netting. Flesh deep yellow, thick, sweet and tender.

GOLDEN OBLONG

110 Days — A small, very fine pie pumpkin ob- long in shape, and about 6 lbs. in weight. Skin is rich yellow, smooth, slightly ridged. Flesh light yellow, thick, dry and very sweet.

LARGE SWEET CHEESE

108 Days—A standard variety espe- cially fine for pies, for stock feeding and canning. Every home gardener and trucker knows it by its large, round, flattened fruit and creamy buff skin. Weight 10 to 15 lbs.; flesh orange- yellow, fine grained, thick and sweet. An excellent keeper of good quality.

KENTUCKY FIELD

120 Days—An enormous cropper, grown in the cornfields, especially in the South, for stock feed, pies and for canning. Fruits vary in shape, 10 to 15 lbs.; creamy yellow, flesh deep yellow.

CONNECTICUT FIELD OR BIG TOM

120 Days—The well known Mammoth Yel- low Field pumpkin so often planted in corn- fields. It is the best all-purpose variety equally good for making pies, canning and for stock feed. Fruits large, 15 to 25 lbs., nearly round. Skin reddish orange, hard, smooth, slightly ribbed. Flesh orange-yellow, dry, thick, rather coarse but sweet.

SMALL SUGAR OR NEW ENGLAND PIE

115 Days—The popular well known family size pumpkin, having the right flavor for the best pies. Very productive. Fruits small, 6 to 8 lbs.; round, flattened at ends and of good keeping qualities. Skin deep orange, smooth but plainly ribbed. Flesh thick, deep yellow, fine grained, thick and of a delicious, sugary flavor.

MAMMOTH GOLDEN CUSHAW

115 Days—A prolific and excellent variety for custards, pies and stock feeding. Fruits are crook-necked, hard, smooth and weigh 10 to 12 lbs. Skin a beautiful solid, golden yellow; small seed cavity with flesh dry, very meaty, thick, rich yellow and sweet.

GREEN STRIPED CUSHAW

115 Days — A crook- necked variety popular in the South. Fruits weigh 10 to 12 lbs., skin creamy white, mot- tled with irregular green stripes. Flesh light yellow.

TENNESSEE SWEET POTATO

110 Days—Bell shaped fruits, 12 to 15 lbs. Skin creamy white with light green stripes. Flesh cream, fine grained, thick, sweet and de- licious for pies.

Radish

Grown from Selected and Transplanted Roots

Buist's Truckers "Early Money" Radish

BUIST'S TRUCKERS "EARLY MONEY"

24 Days—The strain of our "Early Money" introduced by us years ago continues to be the favorite with both home and market gardeners. A handsome radish, extremely early and well adapted to both field culture and for forcing under glass. Roots bright scarlet, globular, small with medium top and small tap root; flesh white, crisp and mild.

EARLY DEEP SCARLET TURNIP

26 Days—One of the most desirable early varieties for planting in the home garden. Roots rich crimson-red, round, slightly flattened, with small top and tap root, 1 in. in diameter; flesh pinkish-white, crisp and mild.

FRENCH BREAKFAST

25 Days—One of the old popular varieties excellent as an early home and market garden sort and suitable for forcing. The combination of red with white bottom, and its olive-shape makes it a beautiful variety for garnishing. Roots scarlet with lower part shaded white, oblong, blunt with slender tap root; 1½ ins. long, ¾ in. thick; top small; flesh white, mildly pungent, crisp and tender. Pull at first maturity to avoid pithiness.

1 Oz. per 100 Ft.; 10 Lbs. per Acre

Culture—This root vegetable is so easy to grow and the results so satisfactory that most gardens are seldom without this delicacy. Sow the seed early in the Spring, as soon as the soil can be worked. As tenderness depends on quick growth, plant in a light, rich, friable soil, well-manured. Sow thinly in rows ½ in. deep, 1 ft. apart and thin out seedlings to prevent crowding. Cultivate, weed and provide an ample supply of moisture. Plant the globe and olive-shaped varieties early, as they grow fast and are edible in 3 to 4 weeks. Follow with the longer types in late Spring. Eat while young for at maturity they become pithy. It is advisable to sow every ten days up to the middle of June to have fresh, crisp radishes.

SAXA

20 Days—The ideal radish for forcing in the hotbed and greenhouse. It is the earliest of the forcing radishes and a popular variety with both truckers and private gardeners. It is also used for garden or field planting. Roots bright scarlet, round, small and with a very short top; flesh white, crisp and sweet.

EARLY SCARLET TURNIP
WHITE TIPPED

26 Days—One of the most popular and salable early varieties. Its combination of rich crimson root with snow white tip make an attractive and desirable appearance. Roots nearly round with small top and tap root. Flesh white, crisp and sweet. Grow 1 to 1½ ins. in diameter without becoming pithy.

Radish Early Oval and Round Varieties

BUIST'S SELECTED

EARLY SCARLET GLOBE

24 Days—This is our Special strain of Early Scarlet Globe Radish which has proven to be outstanding in trial against any other strain of Scarlet Globe. Especially grown for the critical market gardener who insists on the right proportions in shape, color and size of top for bunching. By selection and breeding the seeds are grown from carefully selected roots to keep the stock uniform in shape and color. Scarlet Globe is the most popular early table radish and one of the earliest forcing radishes, well adapted to both field culture and greenhouse forcing. Roots a bright scarlet, slightly oval with medium top and thread-like tap root. Flesh white, brittle, very sweet and tender. For best eating quality and appearance in the bunch, pull when nearly an inch in size.

Buist's Selected Early Scarlet Globe Radish

GLOWING BALL

24 Days—A very attractive early variety suitable to both forcing under glass and for Spring or Fall sowing in the open ground. Roots a brilliant scarlet, round with small top and thread-like tap root. Flesh white, crisp and delicate in flavor.

CRIMSON GIANT

28 Days—The home gardener and trucker will find this turnip-shaped radish equally desirable for forcing or outdoor planting. It is twice the size of any early sort and remains in perfect condition for several days after pulling. Roots a deep crimson, globular, 1 to 1½ ins. in diameter. Flesh white, firm but tender, crisp and sweet flavored.

GIANT STUTTGART

42 Days—A popular white variety used for either early Summer or Fall planting. Although a very large radish it develops quickly and withstands the heat splendidly. Roots top-shaped, 3 ins. long, 3 to 4 ins. in diameter. Flesh white, juicy, tender and holds its crisp quality for a long period.

PHILADELPHIA WHITE BOX

28 Days—The very best white variety for early forcing or outdoor planting. Roots round, slightly turnip-shaped, 1¼ ins. in diameter. Flesh white, crisp, tender and very mild. Does not get pithy and remains solid a long time.

Early Scarlet Turnip White Tipped Radish

Radish (Continued)

Early and Mid-season Long Varieties

WHITE ICICLE

27 Days—The outstanding and most beautiful of the early, long varieties. The home garden favorite and popular with market gardeners. Fine for forcing and one of the best varieties for outdoor Summer planting. Roots very white, 5 to 6 ins. long, $\frac{1}{2}$ in. thick, tapering to a point. Flesh clear white, very crisp and tender; extraordinary eating quality and especially mild in flavor.

BUIST'S EARLY LONG SCARLET

27 Days—In trucking sections where the market uses a long red sort, our strain is regarded as the finest stock ever grown. The most profitable to grow for an early crop and desirable for early forcing or first sowing in the garden. Roots a beautiful bright scarlet, smooth, uniform, 6 ins. long when in prime condition; shape slender and tapering; skin very delicate with small tops. Flesh white, brittle, tender and mild.

CINCINNATI MARKET

30 Days—Another strain of Long Scarlet Radish popular for both home and market garden. Roots deep red, 6 to 7 ins. long, $\frac{3}{4}$ in. thick, cylindrical, with tapering ends. Tops short and small. Flesh white, mild and crisp.

LONG BRIGHTEST SCARLET

26 Days—The earliest of the long red varieties for forcing or outdoor planting and splendid for home and market garden use. Roots bright scarlet with white tip, 4 ins. long, tapering, with small top. Flesh white, crisp, tender and mild.

CHARTIER OR LONG ROSE

35 Days—A home garden variety which retains a mild and pleasant flavor for a long time. Roots scarlet at top, shaded to pink at center and white at tip, 7 to 8 ins. long, 1 in. thick. Flesh white and crisp.

WHITE STRASBURG

40 Days—This is a splendid Summer radish for home and market garden. It can be sown throughout the Summer, remaining in edible condition much longer than the early Spring radishes. Roots white, 5 ins. long, $1\frac{1}{2}$ to 2 ins. in diameter at the shoulder, tapered. Flesh firm, crisp and mildly pungent.

Long White Icicle Radish

Winter Varieties

WINTER RADISHES may be sown in July or later and allowed to mature in the cool, moist Fall weather. The texture is very firm, comparatively like a turnip and likewise may be stored like turnips for Winter use.

CELESTIAL OR WHITE CHINESE

60 Days—This is the largest and finest of the Chinese radishes and not so pungent as other Winter varieties. Roots clear white, 8 to 9 ins. long, 3 ins. in diameter, cylindrical with heavy shoulder mostly above the ground, shaded by its heavy foliage. Flesh white, solid, always crisp and appetizing.

CHINESE ROSE OR SCARLET CHINA

55 Days—A very attractive radish with distinct shape and a pretty deep rose color. Roots smooth, 4 to 5 ins. long, 2 ins. thick, cylindrical but larger at the lower end and decidedly stump-rooted. Flesh white, firm and mildly pungent.

LONG RADISHES—Early and Midseason

Radish Winter Varieties (Continued)

67

CALIFORNIA MAMMOTH WHITE

60 Days—A splendid Fall variety, well flavored and not so pungent. Roots 8 to 9 ins. long, 2 to 3 ins. thick; cylindrical but larger at the lower end. Flesh white, firm, crisp and a good Winter keeper.

SAKURAJIMA, MAMMOTH JAPAN

65 Days—A Japanese radish, the most gigantic in cultivation. Late to mature and grows to an immense size, often weighing over 50 pounds. Oval shaped, skin cream-colored; flesh pure white. Roots are cooked like turnips, but the taste is mild. Also used for feeding cattle.

Rhubarb Seed

1 Oz. per 100 Ft.; 3 Lbs. per Acre

Culture—Rhubarb Roots can be grown quickly and easily from seed. Sow either in a seed bed and transplant, or sow early in the Spring in the open ground. Plant the seed on rich ground 1 in. deep and thin out seedlings to 6 ins. apart. In the Fall transplant to a permanent location setting the plants 2 ft. apart in the rows and 3 to 4 ft. between the rows. The stalks are ready to use the second year.

VICTORIA—The popular variety; excellent in quality, vigorous in growth with large, thick, red stalks.

Rhubarb Roots

Culture—For a permanent location, plant in usually moist soil thoroughly cultivated and heavily manured. Set the roots so that the crowns are 2 ins. under the surface of the soil, planting 2 ft. apart in the rows and 3 to 4 ft. between the rows.

Sorrel BROAD-LEAVED FRENCH

1 Oz. per 100 Ft.; 5 Lbs. per Acre

THE best variety with pale, green leaves used in mixed salads, for soups or cooked like spinach. They are pungent in flavor but a palatable, healthful "green."

Culture—Sow in the Spring in rich soil ½ in. deep in rows 1 to 1½ ft. apart and thin the seedlings to 3 ins. apart in the row. Cut off the flower stems as they appear; otherwise the leaves will be acid and tough. Sorrel is hardy but should be divided every four years.

ROUND BLACK SPANISH

56 Days—A very popular variety with remarkable keeping qualities. Roots black, round, 2 to 3 ins. in diameter. Flesh white, crisp, solid with a highly pungent flavor.

LONG BLACK SPANISH

60 Days—Late, hardy and an excellent keeper. Roots black, cylindrical, 8 to 10 ins. long, 2 ins. thick, slightly tapered at tip. Flesh white, solid and pungent.

HALF LONG BLACK SPANISH

56 Days—Similar to the Long Black with roots 5 ins. long and 2 ins. in diameter and a dull, grayish-black in color. Flesh white, solid and pungent.

Salsify or Oyster Plant

2 Oz. per 100 Ft.; 8 Lbs. per Acre

A FALL and Winter vegetable which has a decided oyster-like flavor. The roots are boiled like carrots or parsnips and served with a butter or cream dressing, or they may be sliced and fried. Cooked in any form, they are delicious and nutritious.

Culture—In every respect as to soil, planting time and cultivation, the Salsify is treated the same as parsnips. For smooth, uniform roots avoid the use of coarse and fresh manure. Frost does not hurt the roots and it improves the oyster flavor. Dig a quantity for Winter use before the ground freezes and bury in pits the same as carrots or store in a cool cellar. For Spring use, the roots may be left undisturbed in the ground over Winter.

BUIST'S MAMMOTH

110 Days—This is our special stock which is a great improvement over the Sandwich Island and a more profitable variety to grow. The roots are much larger, smoother, less stringy and less likely to branch.

MAMMOTH SANDWICH ISLAND

110 Days — A standard variety with tapering roots 6 to 8 ins. long, 1 to 1½ ins. thick. Flesh dull white.

Spinach —Rich in Vitamins

2 Oz. per 100 Ft.; 10 Lbs. in Drills
20 Lbs. per Acre Broadcast

Buist's Perfection Curled Spinach

BUIST'S PERFECTION CURLED

38 Days—The best first early savoy-leaved spinach for either home or market gardener. Repeated selection has made our strain the most perfect. Plant compact, erect with prolific dark green, beautifully blistered and crumpled leaves.

BLOOMSDALE SAVOY

40 Days—A nationally popular variety for early Spring sowing prized by gardeners, shippers and canners due to its hardiness and numerous rich green, crumpled leaves.

LONG STANDING BLOOMSDALE

42 Days—Popular for home and commercial growers alike. It combines the Savoy quality with Long Standing merit of retaining a luxuriant freshness 10 to 14 days longer than other sorts before bolting to seed. A sturdy plant producing a heavy crop of dark green, well-crumpled leaves.

PRINCESS JULIANA

48 Days—Desirable second early sort. Compact plant with thick short stems bearing large round and crumpled dark green leaves.

KING OF DENMARK

46 Days—Excellent long season, Spring planting variety recommended for market growers and canners. Plant low, spreading, with extra large, slightly crumpled, dark green leaves.

OLD DOMINION

40 Days—Savoy type with leaves more pointed. Attractive and valued for resistance to "yellows" or mosaic. Sow only in the Fall or early Spring in areas where Spinach blight is prevalent.

VIRGINIA BLIGHT-RESISTANT SAVOY

38 Days—A hardy Savoy type, also resistant to "yellows" or mosaic. Grown extensively around Norfolk, but only recommended for Fall sowing.

THE leading leaf vegetable and when cooked, the most appetizing, healthful and nourishing of all the "greens."

Culture—As all spinach, except New Zealand, shoots to seed in hot weather it thrives best as an early Spring or Fall crop and should not be condemned if weather conditions necessitate re-planting. Rains directly after planting invariably destroy germination, for seed will rot, rather than penetrate a hard packed soil. Sow early in well prepared, limed and fertilized ground, 1/2 in. deep in rows 1 ft. apart and thin to 4 ins. in the row, planting every 10 days to May 15 for a succession. August sowing for Fall and September sowing for Winter crops, is best. Seed sown on snow lies dormant and germinates in the Spring.

SUMMER SAVOY

45 Days—Recently improved strain of Long Standing Bloomsdale for late Spring sowing. Excellent Summer crop, leaves dark green and crumpled; stands 3 to 4 days longer without bolting to seed.

NOBEL OR GIANT THICK LEAVED

45 Days—Produces the largest spinach, suitable for home garden, market or canning. Plant vigorous and slow to form seed stalks. Leaves smooth deep green, pointed with round tip; large, thick and tender.

NEW ZEALAND

70 Days—Hot Weather Spinach—Ideal for home garden. Seeds are large, hard and horny. Slow to germinate. If necessary, soak seed before planting. Sow 1 in. deep in rows 2 1/2 ft. apart and thin to 4 ins. apart. Although not a true spinach, the leaves resemble spinach and taste similar if not better when cooked. When true spinach bolts to seed, New Zealand is at its best, bearing continuously from July until killed by frost. Plant bushy with abundant, brittle but thick pointed leaves of delicious flavor. As top stalks are cut, side shoots develop into another crop of leaves.

Summer Squash—Early Bush Varieties

69

1 Oz. to 25 Hills; 4 Lbs. per Acre

SUMMER Squashes are not suited for Winter storing. Use when young either baked, boiled and mashed, or fried. They are ready for table use while their skin is tender and soft which can be determined by an impression of the finger nail. Avoid planting near pumpkins.

Early Yellow Summer Crookneck Squash

Culture—Sow in May or June in warm, richly fertilized soil. Plant in hills 1 in. deep, 4 ft. apart each way, thin out to 3 plants per hill and dust with air-slacked lime or tobacco dust to control insect attacks. Cultivate shallow without disturbing the roots.

EARLY WHITE BUSH OR PATTY PAN

53 Days—The most popular early variety used extensively for home, market gardens and for shipping. Fruits creamy-white, flattened, smooth with scalloped edges; 3 ins. thick and 8 ins. in diameter. Flesh milk-white and firm.

MAMMOTH WHITE BUSH

56 Days—Identical in every respect to the Early White Bush except size which measures 10 to 12 ins. in diameter.

BENNING'S WHITE BUSH (Green Tinted)

53 Days—Similar to White Bush except the fruits are greenish white when young.

GIANT SUMMER STRAIGHTNECK

55 Days—A selection from the Crookneck strain, the neck is straight and it packs to better advantage for shipping. Fruits lemon-yellow, 3½ ins. thick and 12 to 16 ins. long. Straight, tapering at the stem end and well warted. Flesh light yellow, thick and good quality.

EARLY YELLOW SUMMER CROOKNECK

50 Days—The most popular of the yellow varieties and a favorite for home gardens, truckers and shippers. Fruits curved at neck, golden yellow, 3 ins. thick and 10 ins. long, thickly covered with warts. Flesh pale cream, firm, tender and richly flavored.

GIANT SUMMER CROOKNECK

55 Days—A very large type of the Early Yellow Summer Crookneck, not as prolific but double in size; 4½ ins. in diameter and 16 to 20 ins. long. Its beautiful appearance, ready sale and profit-producing qualities have made it a favorite with market gardeners.

Early White Bush or Patty Pan Squash

Squash (Continued) Italian Marrow Varieties

THESE squash are most tender and sweetest for table use when 6 to 8 ins. long. Can be prepared in a number of appetizing ways. If kept picked they will continue to bear until frost.

COCOZELLE GREEN STRIPED

60 Days—A popular variety, deep green when young, ripening with alternate stripes of green and yellow. Fruits smooth, long and cylindrical tapering at the stem end; 5 ins. in diameter and 12 to 15 ins. long. Flesh greenish-white; thick and firm.

Winter Squash Late Vining Varieties

1 Oz. to 15 Hills; 2 Lbs. per Acre

WINTER Squash can be stored and are used only when they have been fully matured. They are especially fine for pies, stock feeding and canning.

Culture—Plant the same as Summer Squash but since they are vines and like plenty of room, place the hills 6 to 8 ft. apart each way or further.

BOSTON MARROW

95 Days—The favorite Winter Squash used for market and canners. It is grown extensively in the Eastern States for pumpkin pie more than any of the true pumpkin. Fruits shaped like a Hubbard, weighing 6 to 8 lbs. Skin light orange, somewhat rough; rind hard. Flesh deep orange, thick, fine grained and delicious. Excellent keeper.

RED OR GOLDEN HUBBARD

100 Days—Earlier and more prolific than the Green Hubbard types. Popular with home and market gardeners and for canning purposes. Fruits small, 8 to 10 lbs.; pointed at both ends. Skin orange-red with a faint green tip at the blossom end; rind hard, thickly covered with coarse warts. Flesh deep orange, dry, fine grained and richly flavored.

TABLE QUEEN, DES MOINES OR ACORN

58 Days—The only Winter squash early enough to use during Summer either for boiling, baking or pies. Fruits small 5 lbs., acorn-shaped, dark green, smooth, ribbed and thin-shelled. Flesh rich yellow, dry, mealy and of delicious, sweet flavor.

MAMMOTH CHILI

120 Days—The largest of the Squashes used for stock feeding and exhibition purposes. Fruits 80 to 100 lbs., oblong. Skin mottled bright orange and yellow. Flesh stringy and coarse.

GRAY ZUCCHINI

60 Days—Fruits smooth, mottled light and dark green giving it a grayish appearance. Straight, nearly cylindrical, 4½ ins. in diameter and 10 to 12 ins. long. Flesh greenish-white.

BLACK ZUCCHINI

60 Days—Developed from the Zucchini types. Black green color with the fruit long and slender, 3 to 4 ins. by 12 to 15 ins. showing slight ridges. Flesh greenish-white.

Improved Green Hubbard

IMPROVED GREEN HUBBARD

105 Days—The True Hubbard and one of the best for home, market gardeners and shipping. Fruits medium in size, 10 to 12 lbs.; pointed at both ends. Skin bronze-green, slightly warted; rind hard, keeps well. Flesh orange-yellow, thick, dry, fine grained and sweet.

WARTED HUBBARD

110 Days—In all respects similar to Improved Hubbard except the skin is more thickly covered with warts. Fruits larger; average 14 lbs.

BLUE HUBBARD

110 Days—The same shape as the Warted Hubbard, but the skin is blue-gray and not as thickly warted. Fruits weigh 12 to 14 lbs.

GOLDEN DELICIOUS

100 Days—Excellent small fruits, 7 lbs.; top-shaped. Skin smooth, bright golden with lighter stripes. Flesh orange, thick and sweet.

Buist's Tomatoes—Early and Main Crop

Red Varieties

1 Oz. for 3000 Plants; 2 Oz. per Acre

OUR Tomato seeds are all grown from stock seed of finest quality. The selections for purity are made from healthy, strong growing vines yielding fruit true to type. A uniform standard is set for color, thickness, size, disease resistance and heavy yielding qualities. No finer strains of Tomatoes can be found anywhere than Buist's high bred stocks.

Culture—For an early crop of tomatoes sow about the middle of February 1/2 in. deep in prepared soil in a hot bed or indoors in a seed pan placed at a sunny window. To produce strong, healthy plants, transplant when 3 ins. high to small pots or seed pans. On the approach of early Spring place them in a frame, admitting fresh air in mild weather so as to harden and make the plants stocky.

For a late crop sow the seed in a warm cold-frame by April 1st, sufficiently thin in the row to insure strong, stocky plants. Dust plants with a reliable insecticide to protect against disease and insects. Transplant in the open ground the middle of May, if the ground is warm, 3 1/2 ft. apart in rows 4 ft. apart. They thrive and produce the best fruit planted in well fertilized, loamy soil. Practice clean, shallow cultivation.

In a home garden, support the plants with stakes or trellises and pinch the suckers. The fruit will then ripen better and be more choice in size and quality.

IMPROVED EARLIANA

66 Days from Plants—Considered the earliest red tomato for the home garden and the most profitable to grow for early market. Vine open and spreading and very productive for an early sort. Fruits slightly flattened, smooth, solid, good sized and deep from stem to blossom. Considered as good, if not better than Penn State Earliana.

PENN STATE EARLIANA

66 Days from Plants—The Pennsylvania State Agricultural Station developed this strain which is earlier, larger, smoother and more uniform in shape than the old Earliana. In all respects it resembles the Improved Earliana.

Buist's
Selected
Marglobe
Tomato

BUIST'S SELECTED MARGLOBE

77 Days from Plants—Sold in sealed packages only. The most popular and widely used tomato having all the good qualities desired by the home gardener, trucker and canner. Our stock meets the approval of the tomato grower who insists on the best for uniformity of fruit and heavy yield, midseason to late. Vine vigorous with heavy foliage, resistant to blight and nail-head rust. Fruits scarlet, large, deep, globe-shape, smooth and solid, with small seed cavity and delicious, thick meat. Ripens well to the stem.

RUTGERS

72 Days from Plants—This second early variety is now a favorite for market, canning and the manufacture of juice. Vine large with thick stems and an abundance of heavy foliage to protect the fruit from sun scald. Fruits blood-red, medium to large, similar in shape to Marglobe but flatter at stem end. Free from cracks and disease. Flesh firm, ripening red from the center with a low acidity content.

72 Tomatoes—Early and Main Crop Red Varieties

Buist's
Market
Champion
Tomato

BUIST'S MARKET CHAMPION

The Main Crop King

Perfect Shape

Outyields All Others

80 Days from Plants—*The genuine stock is sold only by us in sealed packages.*

We are the originators of this main crop variety, ideal for the home garden and a trucker's money-maker. A wonderful canning tomato due to its extremely heavy weight, firmness and great meatiness. This famous tomato is popular with canners who demand our seed. Vines large, hardy and productive. Fruits bright scarlet, oval and deep in shape, uniform size, smooth, solid and exceptionally good interior color.

Ripens evenly to the stem, free from cracks and ridges.

BUIST'S "EARLI-BELLE"

70 Days from Plants—We recommend "Earli-Belle" as one of the nicest tomatoes for the home garden. Uniform in size and early to ripen and continues with all its good qualities until killed by frost. Vine medium and very productive. Fruits deep scarlet, medium large, round, very smooth, solid and meaty.

BREAK O' DAY

70 Days from Plants—Developed for earliness. Resembles the Marglobe and is resistant to wilt. Vine vigorous, of open growth and very productive. Fruits scarlet with a yellow cast at stem end, globe-shape, medium large, smooth and uniform.

PRITCHARD OR SCARLET TOPPER

73 Days from Plants—One of the finest wilt-resistant varieties and valuable for the trucker and for long distance shipping. Midseason to late and a heavy yielder. Vine short, jointed, with low growth and heavy foliage. Fruits scarlet, globular, large, smooth and solid with thick walls.

GROTHEN'S GLOBE

68 Days from Plants—An early wilt-resistant variety valuable for long distance shipping. Vine open, upright with dense foliage. Fruits bright red, globular, medium large, smooth and solid.

BONNIE BEST

73 Days from Plants—A standard early variety following the Earliana in ripening. One of the best all purpose tomatoes valuable for the early market, home gardens and for forcing under glass. Yields well all season. Vine medium growth. Fruits bright scarlet, medium size, quite round, smooth, solid and of excellent quality.

JOHN BAER

70 Days from Plants—A well known early variety maturing between Earliana and Bonnie Best. Vine open and medium height. Fruits scarlet-red, medium size, flattened, globe-shape, smooth, firm and nice flavor.

CHALK'S EARLY JEWEL

75 Days from Plants—A very heavy cropper maturing about a week later than Earliana. Vine medium with open growth. Fruits scarlet, medium size, flattened, globe-shape, smooth, solid and good quality.

Late Red Varieties — Tomatoes

BUIST'S SCARLET GIANT

90 Days from Plants—This is a scarlet “sport” of our famous Monarch which it resembles in all respects except the color—a rich scarlet without any purple tint. A single tomato weighing two pounds is not unusual. Vines are vigorous with open growth and wilt-resistant. A single stem trained on a stake or trellis will give best results. Fruit ripens evenly to the stem; flesh firm containing very few seeds; flavor sweet and delicious.

IMPROVED NEW STONE

85 Days from Plants—One of the best main crop varieties popular with the home gardener, trucker and canner. Vine dense, large and productive. Fruits bright scarlet, ripening evenly to the stem, large, flattened but deep, smooth, solid with firm flesh and of fine flavor.

NORTON WILT-RESISTANT

88 Days from Plants—A wilt-resistant strain developed from Stone, maturing a trifle later. Recommended as a main crop variety in sections where wilt is prevalent. One of the best red sorts for long distance shippers.

BUIST'S SELECTED PRIZE STONE

85 Days from Plants—The Stone is a great favorite with all tomato growers and our selected strain is the finest stock grown. Its productiveness, uniformity, solidity, richness of color, carrying and keeping qualities are remarkable. Vine large, vigorous and very productive. Fruits bright, deep scarlet, oval, exceptionally smooth, ripening evenly to the stem without a crack. The main crop tomato to use for canning or slicing. Picked red ripe, the flavor is unsurpassed.

CRIMSON CUSHION OR BEEFSTEAK

90 Days from Plants—A scarlet “sport” of the Ponderosa and resembles the original stock except the color is a brilliant crimson-scarlet. Flesh is very solid and meaty, fine for table use.

GREATER BALTIMORE

83 Days from Plants—The popular variety for canning, ripening earlier than Stone. Vine large, vigorous and heavily productive bearing with undiminished vigor until frost. Fruits deep scarlet, medium to large, flat but deep, uniform in ripening, solid and excellent quality.

Buist's
Scarlet Giant
Tomato

DWARF STONE

92 Days from Plants—The most popular dwarf or “tree type” variety and very choice for home gardening. Plant short, compact with dense, dark, potato-like foliage requiring no support. Exceptionally attractive fruits of a glossy bright red, large, oval, smooth and very solid. Delicious for slicing, juicy, fleshy and contains few seeds.

Buist's Monarch Tomato

BUIST'S MONARCH TOMATO

The Highest Grade of Perfection

95 Days from Plants—The "King Pin" of all large, main crop tomatoes, possessing every point of merit to qualify as the perfect specimen. The illustration indicates the strong and vigorous vine growth and the immense size and uniformity of the cluster. Besides being a large yielder and a continuous bearer, it is not unusual to produce perfect specimens of two pounds and over right up to the end of the season, making it invaluable as an exhibition variety. Numerous complimentary letters agree that "Monarch of all Tomatoes" is everything the name implies.

A few plants of Monarch in any garden will attract attention. The unusual growth, the mammoth size of the rich, glossy, deep pink fruit, ripening thoroughly to the stem and smoothness are qualities that feature this variety. It is a pleasure to observe the favorable remarks when sliced and served. The slice is fleshy, firm, practically free from seeds, mellow, sweet and free from any acid flavor. For best results train a single stem to each stake or trellis.

OXHEART

90 Days from Plants—The distinctive and novel appearance, large size and fine table qualities have made Oxheart a desired specialty for home gardeners and truckers for nearby markets. Vine is open, spreading and fairly productive. Fruits deep pink, heart-shaped, solid, meaty with few seed cells. An individual tomato will often weigh 1½ pounds.

BUIST'S MONARCH TOMATO

Sold only in sealed packets. Pkt. 15c; 4 Pkts. 50c.

OXHEART TOMATO

Pkts. 10c; ½ Oz. 30c; Oz. 60c; ¼ Lb. \$2.00.

Tomatoes—Pink Fruited

BUIST'S SELECTED GLOBE

*Immensely Productive, Blight Proof
Perfectly Globe-Shaped*

80 Days from Plants—Sold in sealed packages only. This is the favorite pink tomato for the growers and shippers of Florida and Texas. The demand is constantly increasing for Buist's Selected stock. The fruit is much larger than Livingston's Globe and the very firm flesh stands transportation well. Vine highly resistant to blight, very vigorous, and develops many short joints at which large clusters form, bearing 5 to 7 fine, handsome tomatoes. Fruits a rich, glossy, deep pink, ripening to the stem, free from core and having a most delicious, mellow flavor.

LIVINGSTON'S GLOBE

82 Days from Plants—A highly productive variety used extensively in the South for shipping. Vine vigorous with heavy-cut foliage. Fruits purplish-rose, true globe-shaped, medium size, smooth, firm-fleshed, very few seeds and ripens evenly.

JUNE PINK

68 Days from Plants—The earliest of the pink fruited varieties and resembles Earliana except in color. Vine open, spreading and short. Fruits purplish-pink, fair size, flattened and continues to bear until frost.

COOPER'S SPECIAL

80 Days from Plants—A second early variety used largely in the South for early shipping. Vine dwarf with heavy foliage and very productive. Fruits purplish-pink, globe-shaped, medium size, smooth and solid.

LIVINGSTON'S BEAUTY

84 Days from Plants—A main crop variety. Vine heavy, vigorous and is quite wilt-resistant. Fruits purplish-pink, medium size, rather flat, smooth and solid.

DWARF PONDEROSA

86 Days from Plants—The largest of all dwarf tomatoes. Plant "tree" type, strong and vigorous requiring no support. Fruits purplish-pink, solid and meaty. Flavor mild and sweet like the Giant Ponderosa.

THE BRIMMER

90 Days from Plants—A splendid late variety for the home garden. It bears a prolific crop of perfectly shaped tomatoes that ripen to the stem and hold their size to the end of the season. Vine open and spreading. Fruits deep pink, large, flat, coreless with very few seeds. Flesh firm, mild in flavor and excellent for slicing.

Buist's
Selected
Globe
Tomato

GIANT PONDEROSA

88 Days from Plants—One of the largest, late home garden varieties. Vine open and spreading. Fruits purplish-pink, large flat but deep, inclined to roughness, solid, very fleshy with few seeds, free from acid and mild in flavor.

Yellow Fruited Varieties

ATTRACTIVE and tasty when sliced. Mild and non-acid in flavor. Valuable for preserving and canning juice.

GOLDEN PONDEROSA. A large yellow Ponderosa.
GOLDEN QUEEN. Medium large, flat but deep.

Small Fruited Varieties

ITALIAN LARGE RED PLUM. Used by the Italians for making sauce; also for puree, preserves and for canning whole. Oval, 1½ ins. by 2½ ins. Fleshy, non-acid and delicate in flavor.

YELLOW PLUM. Oval, 2 ins. long, for preserving.
RED PEAR. Pear-shaped, 2 ins. long, for preserving.

Buist's Turnips

*Celebrated for
Purity and Quality*

Buist's
Mammoth
Purple Top
White Globe

1 Oz. per 100 Ft.;
2 Lbs. per Acre

Grown from Selected and Transplanted Roots

Culture—Turnips like cool weather and thrive best in Spring and Fall.

For early turnips plant the seed as soon as the ground can be worked so that the roots are large enough for the table before hot weather, otherwise they will become fibrous, tough and bitter. Sow in good rich soil either broadcast or in drills $\frac{1}{2}$ in. deep, $1\frac{1}{2}$ to 2 ft. apart and thin out to 3 to 4 ins. apart in the row.

For late turnips sow late in Summer or early Fall. Harvest the crop after freezing weather, top and store in an outdoor pit or a cool cellar.

EARLY RED OR PURPLE TOP FLAT

45 Days—Early and a general favorite with all. Used for the table when young and for stock feeding when matured. Tops small, strap leaved and upright. Roots flat, 3 to 5 ins. in diameter and half as thick; white with purplish-red top. Flesh white, fine grained and mild.

EARLY WHITE FLAT DUTCH

45 Days—One of the best early varieties for home and market gardeners. Tops small, erect and strap leaved. Roots flat, 3 to 5 ins. in diameter, $1\frac{1}{2}$ ins. thick and entirely white. Flesh pure white, fine grained and sweet.

White Fleshed Varieties

BUIST'S MAMMOTH PURPLE TOP WHITE GLOBE

60 to 65 Days—This very fine selection continues to be the most popular and our best seller. Beside being the largest and very best strain on the market, it is the most valuable and salable variety grown. Planted either early or late it is a sure cropper producing an enormous yield of uniform, handsome turnips excellent for bunching or topped. It is the best white fleshed variety for table use, the standard for home, market garden and shipping. For stock feeding grow to full size. Tops medium large, erect and cut-leaved. Roots globular, 4 to 6 ins. in diameter, white with purple top, very smooth. Flesh white, fine grained, sweet and tender.

POMERANIAN OR LARGE WHITE GLOBE

70 Days—Although grown extensively for stock feeding, producing a heavy yield per acre when matured, it is good for table use when pulled young. Tops large, cut-leaved. Roots 5 to 8 pounds, globular, 4 to 6 ins. in diameter, white throughout with flesh firm and somewhat coarse in texture.

White Fleshed Varieties (Continued) Buist's Turnips 77

EXTRA EARLY PURPLE TOP MILAN

40 Days—The Milans are the earliest turnips grown. Excellent for home gardeners, truckers and for forcing. Tops are very small, strap leaved and compact. Roots very flat, 3 to 4 ins. in diameter, white with purple top and smooth. Flesh pure white, fine grained, sweet and tender.

EXTRA EARLY WHITE MILAN

40 Days—Attractive in appearance, this variety is entirely white. In all other respects the same as Purple Top Milan.

PURPLE TOP WHITE GLOBE

60 Days—A well known turnip grown extensively for the table and stock feeding. Roots large, globe-shaped, white with purple top. Refer to Buist's Mammoth, which is selected from this variety.

WHITE NORFOLK

75 Days—A popular large, white globe variety used in the South. Fine for table or stock. Tops are also used for greens.

EARLY WHITE EGG

55 Days—Early and very desirable for home and market gardeners. Tops medium, compact, erect and cut-leaved. Roots egg-shaped, smooth, 3 to 3½ ins. long, 2 to 2½ ins. in diameter growing half out of the ground. White throughout with firm, fine grained, sweet flesh of fine quality.

EARLY SNOWBALL

40 Days—An early variety of fine quality recommended for home and market gardeners. Tops small and upright. Roots round, medium size 2 to 3 ins. in diameter, white throughout with fine grained, sweet and tender flesh.

COW HORN OR LONG WHITE

70 Days—A long carrot-shaped variety growing half out of the ground. Chiefly grown for stock feed but very good for table use if young. Tops large, erect, cut-leaved. Roots white with light green top, 12 to 15 ins. long, 2½ to 3 ins. in diameter, tapering to a blunt point, slightly crooked. Flesh mild, sweet and tender. A heavy cropper.

Yellow Fleshed Varieties

PURPLE TOP YELLOW ABERDEEN

75 Days—An attractive turnip with splendid keeping qualities. A valuable all-purpose variety for Winter use. Tops large, cut-leaved. Roots pale yellow with purplish-red top, globular, 4 to 5 ins. in diameter, smooth and solid. Flesh pale yellow, firm, sweet and tender.

AMBER GLOBE

75 Days—A beautifully formed variety grown chiefly for stock feed. Pull when 3 to 4 ins. for table use. Tops large, cut-leaved. Roots light yellow with green top, globular, large, 5 to 7 ins. in diameter and smooth. Flesh pale yellow, fine grained, sweet and tender. A heavy yielder and splendid keeper.

YELLOW GLOBE

75 to 80 Days—Excellent for both table and stock feeding. Tops large, upright, cut-leaved. Roots globular, 4 to 5 ins. in diameter, pale yellow throughout with firm, crisp, excellent flavored flesh.

GOLDEN BALL

60 Days—The best of the yellow-fleshed varieties for the home and market gardener to use for an early Fall crop. Tops small, erect, cut-leaved. Roots orange-yellow, round, 4 to 5 ins. in diameter and smooth. Flesh yellow, fine texture, mealy with a nice flavor.

Foliage Turnips for Greens

GROWN extensively in the South for Winter and Spring salad. Plant the seed in August, September or very early Spring. The tops are cooked and served as greens.

SEVEN TOP

A very hardy popular variety planted everywhere in the South for greens and for stock grazing. Shoots very tender when young. Roots woody and undesirable for table use.

SOUTHERN PRIZE

Similar in growth to Seven Top, hardy and produces an abundance of leaves for greens and forage.

SHOGGIN OR JAPANESE FOLIAGE

A valuable combination for both tops and edible roots. Resists insects and withstands hot, dry weather. Tops produce a heavy crop of erect leaves 18 to 20 ins. tall which are large, thick, juicy, tender and of mild flavor. Roots semi-globular, white throughout with fine-grained, tender, sweet and mild flavored flesh.

Rutabaga or Swedish Turnip

• Food for Man or Beast •

BUIST'S—
Best for
Bumper
Crops

Buist's Improved Purple Top Yellow Rutabaga

1 Oz. per 100 Ft.; 2 Lbs. per Acre

Culture—Rutabagas require a longer growing season to mature. They have firmer flesh than turnips and when stored will keep later into the Spring. Never sow the seed broadcast. It should be sown in drills on raised ridges which should be slightly leveled off with the back of a harrow and lightly rolled after seeding. To produce large roots plant the seed the latter part of June until the middle of July $\frac{1}{2}$ in. deep in rows 2 ft. apart and thin out to 6 ins. apart in the row. As the plants grow, ridge up to allow the roots to form. After a touch of frost, pull, top and store in a pit or cool cellar for Winter use.

BUCKS COUNTY

80 Days—Our stock of this locally famous rutabaga is the finest on the market. It produces the true type so much in demand in the Philadelphia section. Ten to fifteen days earlier in maturing and sold at a premium for early Fall market. Roots a rather light yellow with a purple top, uniform, globe-shaped, slightly flattened and absolutely neckless. Flesh cream yellow, fine grained, tender, excellent quality and not as strong in flavor as other rutabagas.

CANADIAN GEM

88 Days—A favorite variety with the Canadian growers dependable for uniform growth and fine quality. A quick grower, hardy and resists mildew. Roots yellow with purple top, nearly round with small tops and short neck. Sweet, tender, yellow flesh.

BUIST'S IMPROVED PURPLE TOP YELLOW

90 Days—This is the largest and most productive Rutabaga grown. The result of many years of careful selection has gained a great reputation for the quality of our strain—Buist's Improved. It is the best for table and stock feeding and recommended highly for storage and shipping. Roots bright yellow with purple top, large 5 to 7 ins. in diameter with small tops and exceedingly short neck. Flesh yellow, fine grained, firm, sweet and tender.

BREADSTONE

85 Days—Also known as Budlong or White Rock. A good keeper of fine quality with a delicate flavor for table use. Roots white tinted green at the top, oval, 4 to 5 ins. in diameter. Flesh white and firm.

SWEET GERMAN

90 Days—A white fleshed rutabaga. Very hard and firm when harvested but mellows during Winter. Grown for stock feed and very desirable for table use. Roots white, light green at the very top, neckless, nearly round, 5 to 6 ins. in diameter with sweet flesh.

Useful for Fragrance—Flavoring—Medicinal and Ornamental Purposes

HERBS take but little room in the garden. They are valuable for flavoring, for the fragrance they impart to the home and for the ornamental qualities of some varieties when used in the flower garden.

Culture—Plant in rich, mellow soil early in the Spring in very shallow drills 1 ft. apart and thin out or transplant to 6 ins. apart in the row. The varieties used in dry form should be cut on a dry day before they have come into full bloom. Tie in bunches and hang in the shade. Dry quickly, bottle or pack tightly in boxes with the air entirely excluded.

ANISE. Annual. 14 to 16 ins. Seeds used for flavoring bread, cakes, cordials and garnishing.

Oz., 15c; 1/4 lb., 50c.....Pkt. 10c

BALM. Perennial. 1 1/2 ft. Lemon scented leaves used for seasoning, fruit drinks and liqueurs.

CHIVES. Perennial. 6 ins. Leaves of onion-like flavor used for salads, soups and stews.

1/2 oz., 45c; Oz., 80c.....Pkt. 10c

CORIANDER. Annual. 2 ft. Seeds used for flavoring candy, medicine and cordials.

Oz., 15c; 1/4 lb., 25c.....Pkt. 10c

DILL, MAMMOTH. Annual. 2 to 3 ft. Seeds and leaves used for dill pickles and dill sauce.

Oz., 15c; 1/4 lb., 30c; lb., 90c.....Pkt. 10c

FENNEL, SWEET. Biennial. 3 to 4 ft. Edible stalks like celery. Leaves for flavoring sauces and soups. Seeds to flavor candy and medicine.

Oz., 15c; 1/4 lb., 40c.....Pkt. 10c

HOREHOUND. Perennial. 2 to 3 ft. Used for flavoring cough syrups and candy.

Oz., 30c; 1/4 lb., \$1.00.....Pkt. 10c

LAVENDER. Perennial. 2 ft. Extracted oil is used for perfumes and soaps. Dried leaves to scent linen closets. Also a moth repellent.

Oz., 30c; 1/4 lb., 90c.....Pkt. 10c

MARJORAM, SWEET. Perennial. 2 ft. Leaves used for seasoning salads, soups and poultry dressings.

Oz., 30c; 1/4 lb., \$1.00.....Pkt. 10c

MINT. Perennial. 2 ft. Leaves used to flavor sauces, tea and liqueurs.....Pkt. 25c

ROSEMARY. Perennial. 3 to 4 ft. Leaves used for seasoning meats and soups. Very fragrant.

Oz., 40c; 1/4 lb., \$1.25.....Pkt. 10c

RUE. Perennial. 1 ft. Bitter leaves used by Italians in salads and for seasoning.

1/2 oz., 30c; Oz., 50c.....Pkt. 10c

SAFFRON. Annual. 1 ft. Yellow flowers used for coloring and flavoring.

1/2 oz., 25c; Oz., 45c.....Pkt. 10c

SAGE. Perennial. 1 ft. Leaves used for seasoning meats and poultry dressings.

Oz., 30c; 1/4 lb., 90c.....Pkt. 10c

SAVORY, SUMMER. Annual. 10 ins. Leaves and shoots used in salads and for flavoring dressings, soups, stews, snap beans, etc.

Oz., 15c; 1/4 lb., 50c.....Pkt. 10c

THYME. Perennial. 10 ins. Leaves used in combination with other herbs for seasoning meat, gravy, fillings, etc.

Oz., 35c; 1/4 lb., \$1.15.....Pkt. 10c

WORMWOOD. Perennial. 4 to 5 ft. Bitter leaves used for medicines and liqueurs.

Oz., 30c; 1/4 lb., 90c.....Pkt. 10c

Tobacco

1 Oz. for 5000 Plants Sufficient for 1 Acre

Culture—A very clean piece of land is best for tobacco plant beds. It is customary to burn a piece of land in the woods for plant beds. This destroys grass, weeds and insects, adds fertility through the action of the wood ashes and leaves the ground in good order. Sow the seeds in the South about February and protect by plant-bedcloth to keep off tobacco flies. In the North plant from the middle of March to the middle of April. For an even distribution of seed sow at the rate of an even teaspoonful of seed mixed with two quarts of sand for 100 sq. ft. of bed. Press them into the surface with a roller or plank rather than cover with soil. When large enough and weather is settled during May or June, set the plants out in highly manured or fertilized soil in 3 1/2 ft. rows, 3 ft. between the plants. Shallow cultivation to maintain a loose, fine, mulch about the plant, with frequent hoeing to keep down weeds is essential. To develop the lower leaves more fully, break off the top of the plant about the third branch below the seed head, remove suckers frequently and be on constant guard for worming. Tobacco may be sun or flue-cured.

BONANZA. Especially adapted to sandy soils. It will make either a bright or a mahogany of good weight. Leaf medium long, rather broad tapering and easily cured. Popular in the South.

CONNECTICUT SEED LEAF. A very desirable cigar variety used extensively in all the Northern cigar leaf States. A handsome leaf, ripening uniformly and possessing a choice texture and delightful flavor.

PENNSYLVANIA SEED LEAF. The same in every respect to the Connecticut Seed Leaf except the strain is adapted to Pennsylvania.

IMPROVED GOLD LEAF. The popular flue-cured tobacco so widely used in the Southern bright tobacco belt. Likes a sandy soil. Plant upright with long, broad, tapering leaves. Ripens uniformly. The easiest of all to cure into a high grade, bright leaf of rich golden yellow.

SWEET or LITTLE ORONOKO. The best variety to grow in the South for sun curing which makes a natural chewing tobacco. Also used for wrappers and fillers. Leaf very long, narrow and pointed. Cures bright.

WARNE. One of the best bright flue-cured varieties. Adapted to a wide range of soils and produces a good crop over the entire bright tobacco belt of the South. Next to Gold Leaf in popularity. Leaf long, medium-broad, pointed and fine texture. Cures bright with fine silky quality.

IMPROVED WHITE BURLEY. A variety adapted to a wide range of uses and almost all kinds of soils in the tobacco sections of the South. Leaf medium long, broad, fine texture and easily cured. Makes an excellent chewing tobacco or a fine pipe smoke.

IMPROVED YELLOW ORONOKO. A reliable bright sort adapted to any Southern section where bright tobacco will grow. Used for wrappers and fillers. Leaf medium long, wide and tapering to a blunt point. Easy to cure.

ANY OF THE ABOVE TOBACCO SEED

Pkt. 10c; 1/2 Oz. 25c; Oz. 40c; 1/4 Lb. \$1.25; Lb. \$4.50

*A beautiful lawn like this can be made by sowing
Buist's Evergreen Lawn Grass Seed*

FORMATION OF LAWNS FROM SEED

WHEN a lawn or park is properly seeded, the next most important feature is the grass which covers it; for no matter how beautiful a lawn is situated and planted, if it lacks this one requisite, it ceases to be attractive. To accomplish this, pay great attention to the preparation of the soil. It should be ploughed, sub-soiled and cross-ploughed; the surface properly graded and finely prepared, taking care to collect every weed or root of a weed that can be found. Sow the seed in the months of March or April in the Spring, and from the latter part of August to the end of September in the Fall. What kind of seed to sow, and where to get it, is the next question, as all that is called lawn grass seed is by no means the same; for some of those who prepare it are entirely ignorant of the growth and nature of the various varieties of grasses, and are frequently led into errors that prove ruinous to the lawn. An error of this kind involves a great loss and disappointment to the owner, and is almost irreparable; therefore, procure your seed from an experienced and reliable house.

After preparing the ground as directed, sow the seed at the rate of one hundred pounds to the acre; cover in with a light seed-harrow, or thin branches tied together to serve the purpose of harrowing, and give the whole a light roll with a field or lawn roller. Our finest mixed lawn grass, which we prepare, is well known for its superior quality in producing a succession of verdure throughout the whole season. Early and frequent mowing is the secret of your after success, which gives strength and stability to the sward. During the warm Summer months do not cut close, and permit the mown grass to lie on the lawn, as it will greatly strengthen the roots and prevent the young grass from being burned out. And as a top dressing or manuring, never use stable manure, as it always contains seeds of weeds, but apply pure bone meal, or what is still better, **Buist's Lawn Enricher**, at the rate of 400 to 600 pounds per acre. A coating of bone meal and wood ashes applied in the late Fall is very beneficial, and gives the grass a good start in the Spring.

BUIST'S LAWN ENRICHER

Odorless and Quick Acting

Buist's Lawn Enricher is an ideal fertilizer for the lawn. Acts quickly, stimulating the roots to activity. The result is a beautiful dark green lawn, which will remain green and velvety all season. Broadcast at the rate of 400 to 600 pounds per acre. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.10; 50 lbs., \$2.00; 100 lbs., \$3.50; sack of 200 lbs., \$6.00; ton, \$50.00.

BUIST'S LAWN GRASS SEEDS

SOW—On new land, use 1 lb. for every 200 square feet or 5 lbs. for 1000 square feet, 100 lbs. for one acre. For renovating old lawns when turf is thin use half quantity.

BUIST'S EVERGREEN

This mixture has long been famous for producing a succession of verdure throughout the year. It is composed of the finest varieties of grasses, each of which has its season of beauty, and the result of this blending is the producing of a sod that is not only always evergreen and velvety in appearance, but of the color and beauty of an emerald. $\frac{1}{2}$ lb., 20c; lb., 40c; $2\frac{1}{2}$ lbs., 90c; 5 lbs., \$1.65; 20 lbs., \$6.00.

BUIST'S "EMERALD GREEN"

A perfect blended combination of fine bladed, compact, quick growing grasses. The ingredients of this mixture are the highest grade of cleaned seed only, carefully proportioned to maintain a rich velvet green color from early Spring to late Fall. $\frac{1}{2}$ lb., 25c; lb., 50c; $2\frac{1}{2}$ lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.

BUIST'S LAWN RESTORING

Compounded from grasses which take firm hold and grow rapidly on hard wornout lawns or on burnt spots. The best time to re-sow is very early in the Spring, or seed may also be sown with excellent results in the Fall, during the month of September. $\frac{1}{2}$ lb., 25c; lb., 50c; $2\frac{1}{2}$ lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.

PUTTING GREEN

Golf courses require a mixture of grass seed which will give a smooth, level compact turf. Our long experience in the blending of grasses enables us to select those best adapted for this purpose. Buist's Putting Green Mixture, of fine high-grade grasses, will make a close firm, green and lasting turf which will improve with use. $\frac{1}{2}$ lb., 40c; lb., 75c; $2\frac{1}{2}$ lbs., \$1.75; 5 lbs., \$3.25; bushel of 25 lbs., \$15.00.

FAIR GREEN MIXTURE

The grasses in this mixture will produce a rich green turf and will resist tramping and hard wear and will retain its color during the severest drought. $\frac{1}{2}$ lb., 20c; lb., 35c; $2\frac{1}{2}$ lbs., 85c; 5 lbs., \$1.50; 20 lbs., \$5.50.

"SHADY NOOK"

It has always been very difficult to secure a grass seed mixture that would make a lasting growth in shaded places, especially under trees, but our Shady Nook mixture has overcome this trouble, and can be depended upon to supply this long-felt want; it is comprised of a selection of the finest grasses, which do especially well in shaded or sheltered situations and will quickly produce a fine sward. $\frac{1}{2}$ lb., 25c; lb., 50c; $2\frac{1}{2}$ lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.

BUIST'S CENTRAL PARK

This variety is a combination that will produce a permanent and lasting turf, a good mixture, free from weeds, suitable for various soil conditions, always giving good results in light as well as heavy soil. Recommended for terraces and exposed places, also for re-seeding bare places. Lb., 35c; $2\frac{1}{2}$ lbs., 85c; 5 lbs., \$1.50; 20 lbs., \$5.50.

BUIST'S TERRACE

A combination of grasses best adapted for sloping ground and terraces, producing strong spreading roots, withstanding drought, thriving in shallow soils, and preventing washing out by heavy rains; producing at the same time a beautiful green turf throughout the season. $\frac{1}{2}$ lb., 25c; lb., 50c; $2\frac{1}{2}$ lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.

BUIST'S "SUNNY SOUTH"

A special preparation that will resist extremes of heat and drought; this mixture has given satisfactory results and by proper care and continual watering, a beautiful lawn can be had in the Southern States, where grasses do not usually thrive during the Summer months. $\frac{1}{2}$ lb., 20c; lb., 40c; $2\frac{1}{2}$ lbs., 85c; 5 lbs., \$1.50; 20 lbs., \$6.00.

BERMUDA GRASS

A very valuable grass in the warmer climates; as a lawn grass it is much used in the South with excellent results. Resists extreme drought during the hot seasons. Does not thrive north of North Carolina. Seed should be sown at rate of 10 lbs. per acre. Lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.00.

Special New Jersey Lawn Mixtures

We offer below the Lawn Grass Seed Mixtures we have prepared in accordance with the formula recommended and published by the New Jersey State Agricultural Experiment Station.

Formula No. 1. (With or without White Clover). For lawns on fair to good soils. Lb., 55c; $2\frac{1}{2}$ lbs., \$1.15; 5 lbs., \$2.00; 25 lbs., \$8.25; 100 lbs., \$30.00.

Formula No. 2. For finest quality turf. Lb., 75c; $2\frac{1}{2}$ lbs., \$1.65; 5 lbs., \$3.00; 25 lbs., \$12.00; 100 lbs., \$45.00.

Formula No. 3. For shaded areas. Lb., 65c; $2\frac{1}{2}$ lbs., \$1.50; 5 lbs., \$2.50; 25 lbs., \$10.50; 100 lbs., \$40.00.

Formula No. 4. For poor clayey, shaley or sandy soils. Lb., 65c; $2\frac{1}{2}$ lbs., \$1.50; 5 lbs., \$2.50; 25 lbs., \$10.50; 100 lbs., \$40.00.

82 Buist's Grass Seeds—*Fancy Recleaned*

Buist's Special Grass Seed Mixtures FOR HAY OR PERMANENT PASTURE

THE demand for our Special Mixtures of Grass Seeds for hay and permanent pasture is very rapidly increasing. The old custom of seeding down to clover and timothy alone must in a few years give way, to a very large extent, to the more improved method of mixing or blending the varieties of Grasses to be sown. When we state that the modern preparations will produce twice as much per acre as timothy and clover, it is no exaggeration. It would therefore be great folly for the agriculturist not to adopt it, or at least experiment with a trial, to a moderate extent, until he becomes convinced of the great advantage to be derived from it.

In ordering, it is necessary to state the character of soil on which it is to be seeded, that the proportions of the most desirable varieties can be selected for the purpose.

Buist's Permanent Pasture Grass Seed Mixture—Sow 3 bushels per acre. Price per bushel of 20 lbs., \$4.25; 5 bushels at \$4.00 per bushel.

Buist's Permanent Hay Field Grass Seed Mixture—Sow 3 bushels per acre. Price per bushel of 20 lbs., \$4.25; 5 bushels at \$4.00 per bushel.

VARIETIES OF GRASS SEEDS

Kentucky Blue Grass. Fancy Cleaned (*Poa pratensis*).—Also known as June Grass. It is one of the most valuable varieties for lawn purposes, and as a fine pasture grass is indispensable. It thrives in dry soils and retains its verdure during the hottest weather; it is the famous Grass of Kentucky, and is regarded as the most valuable of all varieties. It is especially valuable from the fact that it starts early in the Spring and furnishes good grazing until late in the Fall. It requires, however, two to three years to become established, and should, therefore, be sown with other grasses. Our stock is the finest, heaviest and best matured seed, thoroughly recleaned. For lawns, sow fifty pounds per acre, and for pasture, twenty-five pounds per acre. Lb., 30c; 10 lbs., \$2.50; 25 lbs., \$5.50; 100 lbs., \$20.00.

GRASS SEEDS ARE SUBJECT TO MARKET CHANGES

Free from Weeds—Buist's Grass Seeds ⁸³

BLUE GRASS CANADIAN

A celebrated Canadian variety, where it is grown very extensively for pasture and hay. Will thrive in any soil. Lb., 35c; 10 lbs., \$2.75; 100 lbs., \$25.00.

BLUE GRASS KENTUCKY (See Page 82)

BENT GRASS, SEASIDE

This is a hardy creeping variety forming an ideal turf of dark green color and uniform in texture. Does well in moist situations, making a rapid growth and adapts itself to any soil, particularly acid soil. Excellent for putting greens and fine lawns. Sow 5 lbs. to 1,000 square feet. Lb., \$1.00; 10 lbs., \$8.50; 100 lbs., \$80.00.

BENT GRASS, COLONIAL

This variety differs from Seaside in that it seldom produces stolons but spreads from underground root stalks. A very valuable feature because it gives a dense, reinforced sod of a pleasant green color. It succeeds on well-drained soils and will thrive on acid soils. Lb., \$1.00; 10 lbs., \$8.50; 100 lbs., \$80.00.

CREEPING BENT GRASS

For lawns, putting greens, tennis courts, etc. It is of rapid growth and spreading habit and forms a strong enduring turf which will withstand hard usage. Lb., \$1.00; 10 lbs., \$8.50; 100 lbs., \$80.00.

CARPET GRASS

A very valuable pasture grass for the South. It grows on poor, sandy soil, and thrives vigorously on most any soil if moisture conditions are favorable. For lawns and golf courses it makes a heavy sod. Sow 10 lbs. to the acre for pasture; 20 lbs. for lawns. Lb., 40c; 10 lbs., \$3.50; 100 lbs., \$30.00.

CRESTED DOG'S-TAIL

This is a most valuable permanent pasture grass. It is very tender and nutritious, the roots penetrate deeply into the ground, which enable it to stand severe droughts. Lb., 60c; 10 lbs., \$5.00; 100 lbs., \$45.00.

FESCUE, CHEWING'S

Recommended for fine lawns and putting-greens. It resists drought and gives good results under trees, succeeds on sandy soils, making a close sod. Sow 30 pounds to the acre. Lb., 90c; 10 lbs., \$8.50; 100 lbs., \$75.00.

FESCUE, HARD

Valuable for permanent pasture on poor lands, doing well on sandy and siliceous soils. Very hardy, thrives well in dry situations. Lb., 60c; 10 lbs., \$5.00; 100 lbs., \$45.00.

FESCUE, MEADOW, OR ENGLISH BLUE

A valuable variety for permanent pasture or hay; it is very fragrant. Lb., 30c; 10 lbs., \$2.50; 100 lbs., \$20.00.

FESCUE, RED OR CREEPING

An excellent bottom grass, forming a close and lasting turf. It resists extreme drought and thrives on very inferior soils. Valuable for putting greens, also for sowing on sandy soil and in shaded places. Lb., 90c; 10 lbs., \$8.50; 100 lbs., \$75.00.

FESCUE, SHEEP'S

Is one of the best varieties for sheep pastures, and is used in all preparations of grasses in England for that purpose. Lb., 60c; 10 lbs., \$5.00; 100 lbs., \$45.00.

'ORCHARD GRASS

One of the most desirable and earliest varieties of grasses for sowing in orchards, pastures or in shady places. It grows rapidly, and does not suffer from close feeding. Lb., 30c; 10 lbs., \$2.50; 100 lbs., \$20.00.

RED TOP, FANCY RECLEANED

This is one of the most valuable varieties for pasture or for using in lawn preparations; will thrive in any soil. Highly recommended for land that will not grow Kentucky Blue Grass. For pastures sow 15 lbs., for lawns sow 25 lbs. per acre. Lb., 30c; 10 lbs., \$2.00; 100 lbs., \$16.00.

RED TOP, UNHULLED

For lawns sow 40 lbs. per acre. Lb., 25c; 10 lbs., \$1.50; 100 lbs., \$12.00.

ROUGH STALKED MEADOW GRASS

Recommended for shady places, and is also a rich pasture grass. Lb., 60c; 10 lbs., \$5.50; 100 lbs., \$50.00.

RYE GRASS, ENGLISH PERENNIAL

A nutritious permanent grass for meadows and pastures, or for mixing with other grasses for lawns, or for permanent pasture mixtures. Lb., 30c; 10 lbs., \$2.50; 100 lbs., \$20.00.

RYE GRASS, ITALIAN

Very desirable for pasture, thriving in any soil, maturing the first season. Recommended for Southern lawns in Winter when the Bermuda is dormant. Lb., 30c; 10 lbs., \$1.50; 100 lbs., \$12.00.

RYE GRASS, DOMESTIC

A valuable grass for pastures and lawns when quick results are required. Thrives well on any soil. Sow 50 pounds per acre. Lb., 30c; 10 lbs., \$1.25; 100 lbs., \$10.00.

TIMOTHY

The most valuable of all hay grasses; produces heavy crops. Sow either in Spring or Fall at the rate of 15 lbs. per acre, but less if used with other grasses. Lb., 20c; 10 lbs., \$1.25; bu. of 45 lbs., \$3.50.

WOOD MEADOW

Grows well under trees and in moist places. Lb., \$1.00; 10 lbs., \$9.00; 100 lbs., \$80.00.

GRASS SEEDS ARE SUBJECT TO MARKET CHANGES

Red Clover

ALFALFA CLOVER OR LUCERNE

The most valuable forage crop, now grown successfully in every State of the Union. It is a legume, taking free nitrogen from the air and storing it up in the deep growing root. It will succeed on any good loamy soil, but the land must be well and thoroughly prepared for the best results. Alfalfa should always be cut when just commencing to bloom. If the seed is allowed to form, the growth of the plant ceases. March and April is the best time to sow in the Spring, and the latter part of August and during September, in the Fall. Sow at the rate of 20 to 25 lbs. to the acre. Prices quoted on request.

WHITE DUTCH CLOVER
(*Trifolium Repens*)

This is largely used in lawn and permanent pasture mixtures. It makes a small, close, compact growth. Sow 10 to 12 lbs. per acre if alone or 4 lbs. with other grasses. The seed we offer is of the highest grade. Oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50.

CLOVER SEEDS

WE CLEAN all our Clover Seeds by the most improved machinery. They are entirely free from all weeds and dirt, and are of the very finest grade.

RED CLOVER
(*Trifolium Pratense*)

Regarded as the most valuable farm crop, and is used largely for pasturage and hay. Clover adds greatly to the fertility of the land on which it is grown. It does not exhaust the soil, but enriches it, adding humus and nitrogen, thereby providing rich food for the crops which follow. It makes two crops each year and is very nutritious. Fifteen pounds of seed to the acre. Prices quoted on request.

ALSIKE, OR SWEDISH CLOVER
(*Trifolium Hybridum*)

A very valuable variety, which resembles the Red Clover in growth and habit. Valuable in preparations for hay and permanent pasture; very hardy, resisting extremes of heat and drought and also severe cold weather to a remarkable extent; thrives equally as well on wet or dry soils; of very luxuriant growth; sweet and nutritious. A good honey plant for bees. Prices quoted on request.

WHITE BOKAHARA OR SWEET CLOVER

(Melilotus Alba)

Sweet Clover is valuable in the bringing up of old waste and wornout soils, and thrives well even on extremely poor soil. If plowed under, it adds humus and nitrogen to the soil. Sweet Clover's greatest value, other than a fertilizer, is in preparing the soil for Alfalfa, as the bacteria of Sweet Clover is the same as that of Alfalfa. No other clover will build up land like Sweet Clover. Sow 15 lbs. to the acre. Prices quoted on request.

CRIMSON, OR SCARLET CLOVER
(*Trifolium Incarnatum*)

An annual of strong, erect growth, providing large crops of green forage; or, if cut while in bloom, will make excellent hay. By plowing the crop under, it will make the land rich, fill it with humus and increase the yield of corn or other crops to follow. Sow 15 pounds to the acre. Prices quoted on request.

The market on Clover Seed is constantly fluctuating and the prices quoted here are subject to changes. Write for latest prices.

DWARF ESSEX RAPE

An English Forage Plant of Great Value to the Farmer and Planter

The sheep and cattle farmers of Great Britain regard Essex Rape as an indispensable crop, and it can be seen growing on almost every farm. It is a forage plant of the greatest value, of rapid growth, yielding from twenty to twenty-five tons of green forage to the acre, which affords the finest pasture for sheep, hogs, cattle and poultry — they always thrive and fatten on it. It is perfectly hardy and in the Southern States can be sown from August to April. In the North sow from March to May and from August to October. Give stock access to salt while feeding on rape.

It makes an excellent salad or "Greens," and can be grown as a

substitute for turnip greens; it is extensively planted in the South for that purpose. Sow 8 to 10 pounds per acre broadcast and 4 pounds in drills. Lb., 25c; 10 lbs., \$1.25; 50 lbs., \$5.00.

Dwarf Essex Rape

HAIRY OR WINTER VETCH (*Vicia Villosa*)

The Vetch is another very valuable forage plant, which has been grown very extensively in England and Germany for many years, and cannot be recommended too highly to the farmers and planters of this country. Judging from the increased demand the past year, many have already been impressed with its great value. Sow broadcast from July to October, at the rate of twenty-five to thirty pounds per acre, with three pecks of wheat, rye or oats, which will support the Vetch, greatly increasing its growth and keeping it from the ground; it should be cut for a hay crop just as the grain has headed out, or when it is still in a milky state. Lb., 30c; 10 lbs., \$1.60; 25 lbs., \$3.50; 100 lbs., \$12.50.

COW PEAS

The great soil improvers. Makes poor land rich. Makes good land more productive. Also makes a splendid and nutritious green forage or hay crop, enriching the soil even when the crop is cut off

THERE is no surer or cheaper way of improving the soil than by sowing Cow Peas. The plant is a legume, and through the agency of the nitrogen producing bacteria on its roots adds this valuable plant food to the soil, much cheaper than it is possible to obtain in any other way. Cow Peas make excellent hay; if planted by the middle of May, in the latitude of Philadelphia, a crop can be cut and cured for hay same as clover, then stubble with its new growth may be turned under as a fertilizer. Sow 1½ bushels to the acre.

"Peas could be made to bring more nitrogen to the soils of this country every year than is now purchased annually by the farmers at the cost of millions of dollars."—Year book of the U. S. Department of Agriculture.

Following are the best varieties. As prices fluctuate, write for prices if wanting in quantity:

WHIPPOORWILL

An early, upright growing variety; makes a good growth of vine, more largely used and sold than any other sort. **Write for prices.**

GRAY CROWDER

A large speckled pea, early to mature, very prolific, a splendid land improver, and valuable as a forage crop; makes an enormous yield of rich, nutritious food. **Write for prices.**

SOUTHERN BLACK EYE

A very prolific early sort, vines erect. Very popular in the South, where the peas are used both in a dry and green state for the table. **Write for prices.**

CANADA FIELD PEAS

Valuable in the Northern climate for cattle feeding. Excellent for horses and pigs, when sown with oats. Sow broadcast and harrow in at the rate of two bushels per acre. **Peck, \$1.15; bu., \$4.00.**

BLACK WILSON SOJA BEANS

Very desirable as a forage crop, producing immense quantities of nutritious feed besides being an excellent soil improver and will withstand drought better than any other forage crop. Sow broadcast at rate of 1 to 1½ bus. to the acre or plant in drills 3½ feet apart, half bushel per acre. **Write for prices.**

Sundry Farm Seeds

PRICES ARE SUBJECT TO MARKET CHANGES

BUCKWHEAT—New Japanese—The kernels are larger than the common kind, the straw stouter and heavier, a very heavy cropper and less liable to blight than other sorts. It makes the finest flour. Sow 1 bushel per acre. Per lb., 25c; pk., 65c; bu., \$2.00.

BROOM CORN—Weber's Improved Evergreen—Best variety for general cultivation on account of color and quality of brush, ripens very early, grows about 8 to 10 feet high, brush of good length and shows almost no red. Sow 10 lbs. per acre. Lb., 25c; pk., \$1.50; bu., \$5.00.

BARLEY—Six Rowed—A stiff straw, heavy yielding, six rowed bearded variety. An improvement over the old Manshury in time of maturity, has plumper kernel and weighs more to the measured bushel. In stiffness of straw and rust resistance it is superior to any other variety. Two bushels will seed an acre. Per pk., 65c; bu., \$2.00.

MILLET—Golden (Tennessee Grown)—In the North, Millet is sown altogether for hay, and for that purpose the Southern grown is the best, it grows taller and finer than the Western, making better hay. In good rich soil it will make a growth of 4 to 5 feet high. A yield of 5 tons of hay is not unusual. Cut before the seed hardens as after that the hay quality decreases. Will withstand dry weather remarkably well. Sow one bushel per acre. Per bu., \$2.75.

MILLET—Hungarian—Especially valuable on account of the short season required to make a crop. It can be sown as late as August 1st and yields a heavy crop of excellent hay, only recommended, however, for sowing on low lands or rich soil. Valuable when hay is short or to follow some early harvested crops; sow one bushel per acre. Per bu., \$2.75.

MILLET—Pearl or Cat Tail (Pencillaria)—The best known and most valuable of all green forage plants in the South; it is enormously productive, and can be cut several times during the season; also be fed green or cured as dry forage, making a very nutritious food. Sow thinly in rows 3 feet apart at the rate of 10 lbs. per acre. Lb., 15c; 10 lbs., \$1.00.

MILLET—Japanese Barn-yard—Entirely distinct from all other Millets. It grows 6 to 8 feet high and yields an enormous crop, when cured it makes good hay and in quality is superior to corn fodder. Sow in May or June. Broadcast 10 to 15 lbs. per acre, or in drills 8 lbs. It does best on low, moist ground. Japanese Millet is adapted to all sections of the country. Lb., 10c; 10 lbs., 75c; 100 lbs., \$6.50.

OATS—Swedish Select—The best early oats, white color, hull thin, the kernel large and plump, straw is stiff and strong. A remarkable root development makes the Swedish Oat a good drought resister; the earliest of the heavy yielding sorts. Per bu. (32 lbs.), \$1.25; 5 bu. at \$1.10 per bu.

OATS—Canadian Cluster—An enormous yielder producing very large heads, straw stiff, grain plump. Ripens early and not liable to rust. Sow 2 bushels per acre. Per bu. (32 lbs.), \$1.25; 10 bu. at \$1.10 per bu.

OATS—Tartar King—An extremely early White Oat, and heavy cropper, the straw is tall, very strong and holds up well; one of the earliest, heaviest and most prolific sorts; will weigh in a favorable season 40 lbs. to measured bushel. Per bu. (32 lbs.), \$1.25; 10 bu. at \$1.10 per bu.

RYE—Spring—Spring Rye is an excellent catch crop where Winter grains have been killed out. Does not grow quite as large straw as Winter Rye, but yields as well and the grain is of finer quality. Sow 1½ bushels per acre. Per pk., \$1.00; bu., \$3.00.

RYE—Rosen Winter—A new heavy yielding variety, straw is strong, very long and stands up well. The heads are long and well filled. A distinct improvement over the common rye. Sow 1½ bushels per acre. Per pk., 75c; bu., \$2.25.

SUGAR CANE—Early Amber—An early productive variety, heavy yielder of most nutritious matter, can be fed green or cured; stalks tender and filled with a rich sweet sap. As a fodder plant it is of the very best quality and is greedily eaten by cattle, horses and hogs. Sow one peck per acre in drills 3½ to 4 feet apart. Per pk., \$1.00; bu., \$3.50.

SUNFLOWER—Mammoth Russian—Produces large heads and yields twice as large a crop of seed as the common sort, highly recommended for poultry. Lb., 20c; 10 lbs., \$1.20; 100 lbs., \$10.00.

SUDAN GRASS—One of the greatest drought-resisting forage and fodder crops grown. It belongs to the Sorghum family, only more thrifty, growing from four to seven feet high, with small stems and an abundance of broad leaves. Broadcast at rate of about fifteen to twenty pounds per acre. Lb., 15c; 10 lbs., \$1.00; 100 lbs., \$7.00.

VETCH—Spring—Not as hardy as Winter Vetch. It is a wonderful soil-builder and gatherer of nitrogen, makes fine hay of high feeding value. Sow with oats, using 30 lbs. of each per acre. Lb., 15c; 10 lbs., \$1.00; 100 lbs., \$7.00.

FLOWER SEEDS

ANNUALS, BIENNIALS, PERENNIALS

WHAT THEY ARE AND HOW TO TREAT THEM

Annual Flowers

Annual Flowers grow from seed, blossom, fruit and die down in one season. Many self-sow and are practically permanent. They are obtainable in every color, readily grown and can be used in the following ways—in a border made up of a number of different annuals—for massing of a single variety or color in beds—for filling in spots in the perennial border and rockery—and for growing in rows to supply cutting flowers.

When to Sow Annual Seed

Nearly all annuals will germinate and bloom the first season if sown outdoors as soon as the ground is warm, but many sorts such as Ageratum, Asters, Carnations, Petunias, Phlox, Salpiglossis, Scarlet Sage, Snapdragon, etc., require sowing in some sheltered situation such as a cold frame, greenhouse or a window box in the home about a month before outdoor culture starts. The young plants are transplanted to the open ground when the weather is warm. This is necessary, not only on account of their tenderness, but also because they need more time for development, and by sowing early, the growing season is prolonged. Others such as Bachelor's Button, Calendula, Cosmos, Gaillardia, Marigold, Nasturtium, Zinnia, etc., may be sown outdoors in the open ground when all danger of frost has passed.

Most Annuals thrive on rich soil, plenty of water and sunshine, frequent weeding and cultivation. Annuals with tap roots, such as Blue Lace Flower, Eschscholtzia, and Poppies do not transplant well, and are best sown where they are to stand. Some of the hardy annuals such as Alyssum, Bachelor's Button, Calendula, Cosmos, Larkspur, Bedding Petunias and Poppy can be sown in the Fall just previous to the late heavy frost. The seed will then be dormant until Spring.

Biennials

Biennials are plants that flower the second year from sowing of the seed.

When to Sow Biennial Seed

Sow the seed the latter part of June, during July and up to the middle of August. Transplant the seedlings 4 to 5 inches apart into a cold frame or they may be wintered over in the open ground with protection of hay or straw.

Perennials

Perennials are plants that usually come into flower the year after sowing. They go on living and increasing for a number of years, the stems dying down annually and then throwing forth new growth from the roots each Spring. Perennials are effectively planted in irregular but graceful groups along the border. They should be planted so that there is continuous bloom of some kind from early Spring to late Fall. Once established, they are a constant source of pleasure presenting a variety of size, form and color. The tall, sturdy growing plants are valuable as cut flowers and the low species can be used either in the front of the border or in the rock garden.

When to Sow Perennial Seed

They are easily raised from sowings in seed beds from late Spring until about August. They make strong plants, which may be planted in a permanent situation early enough in the Fall, to enable them to winter safely. Protect them with a light covering of litter late in the Fall. Seed sown in the Fall, winter over in a cold frame. Tender perennials such as Cannas, Dahlias, and Red Hot Poker should be dug up and stored away free from frost.

CULTURAL DIRECTIONS for FLOWER SEEDS

The following general rules apply to all:

There are two ways of sowing seeds; the one in the border where they are intended to remain; the other in prepared beds from which they are transplanted to the Flower Garden. The soil of the seed bed should be in a fine condition, smooth and level as possible, and well enriched. Do not plant when the ground is wet. Sow in rows so that the starting plants can be easily seen. Cover each lot of seed to a uniform depth. Scarcely cover small seeds and others not more than four to six times the diameter of the seed. Press the soil firmly over the seed and keep moist during the process of germination, and while the plants are young. Thin out the young plants to prevent crowding and keep entirely free from weeds. In watering apply gently in order to avoid washing the seedlings out of the ground and, as far as possible, prevent caking of the surface of soil.

When the seedlings have three or four leaves, first water and transplant on a dull day so that they do not

get spindly. The last stage is to transfer them to the garden four to twelve inches apart, according to the size the plants attain in maturity.

Quick growing annuals such as Cosmos, Marigolds and Zinnias, etc., also varieties that do not transplant so well, can be sown where they are to remain, and thinned out to afford each specimen a fair chance of attaining robust growth and of producing fine heads of bloom. Vigorous growth depends upon good drainage, a soil mellow and rich in humus, plant food consisting of manure or prepared fertilizer and lime.

During the time the plants are in flower pick freely, to prevent seed pods forming, and thereby lengthen the flowering season.

All outdoor seed planting must be done when all danger of frost has passed and the ground is warm; otherwise the expectation of a successful garden is remote.

Brief Cultural Instructions are Printed on the Back of All Packets

88 Buist's Selected Flower Seeds

OUR list has been carefully revised and a number of new and meritorious sorts added. We have also eliminated some of the older varieties that have been superseded by improved strains of newer introductions, making our list now consist of only the most desirable varieties of Flower Seeds and such as the average amateur gardener can grow with perfect success.

The varieties we offer are the very best obtainable from the most expert growers in the United States and Europe.

Customers will find it convenient to order Flower Seeds by number. This will facilitate the filling of orders and will insure prompt shipment.

Explanation of Symbols

- © CUT FLOWERS—Long-stemmed, suitable for cutting.
- ® ROCK GARDENS—Plants particularly adapted to Rock Garden work.
- § SHADE—Satisfactory for shade or partial shade.

ACHILLEA ©—*Milfoil or Yarrow*

Hardy Perennial. 2 ft. June-Sept. One of the best bedding or border plants, covered with a mass of white blooms so much in demand for color effect during the Summer. The plants may also be lifted and will bloom indoors in Winter.

- 1021 *Ptarmica*—"The Pearl." Small double white flowers in clusters.....Pkt. 15c

Hardy Perennial. 4 ft. June to frost.

- 1032 *Napellus*. Panicles of helmet-shaped blue and white flowers. Excellent for borders..Pkt. 15c

AGERATUM §—*Floss Flower*

Annual. 4 to 9 in. June to frost. One of the best bedding or border plants, covered with a mass of blue blooms so much in demand for color effect during the Summer. The plants may also be lifted and will bloom indoors in Winter.

- 1070 *Blue Ball*. Compact ball-shaped plants densely covered with dark blue flowers. 6 in. 1/4 oz., 40c.....Pkt. 10c
- 1073 *Blue Cap*. A miniature and compact variety with large rich blue flowers. Fine for edging. 4 in.Pkt. 20c
- 1076 *Blue Perfection*. Darkest flowers of all the blue *Ageratum*. 9 in. 1/4 oz., 30c.....Pkt. 10c

AGROSTEMMA ©—*Rose of Heaven*

Hardy Perennial. 2 ft. June-Sept. The flowers are produced freely on long stems; foliage silvery. Blooms the first season from seed.

- 1143 *Coronaria*—*Rose Campion*. Pink...Pkt. 10c

ALYSSUM—*Queen of Edging Whites*

Annual. 4 to 9 in. June to frost. A fragrant little plant, useful for borders, for edging a path, or for massing in small beds. The flowers come in early Spring and continue to bloom profusely all Summer.

- 1165 *Little Gem* or *Carpet of Snow*. Flowers pure white on plants about 4 in. high. 1/4 oz., 25c; oz., 75cPkt. 10c
- 1187 *Sweet Alyssum* — *Maritimum*. The old-time favorite Sweet Alyssum. Pure white. 1/2 oz., 20c; oz., 35c.....Pkt. 10c
- 1188 *Lilac Queen*. Deep lavender-lilac blooms. 1/4 oz., 25c.....Pkt. 10c

Hardy Perennial Alyssum ®

- 1198 *Saxatile Compactum*—*Basket of Gold*. 1 ft. Silvery foliage, with showy golden yellow flowers from April to May. A perennial that will bloom the first season if seed is sown early indoors. 1/4 oz., 30c.....Pkt. 10c
- 1201 *Rock Garden Mixed*. Many rare and beautiful speciesPkt. 25c

AMARANTHUS—*Summer Poinsetta*

Annual. 3 to 4 ft. July to Frost. Ornamental foliage plants, producing long racemes of curiously shaped flowers. Prefer hot, sunny locations.

- 1208 *Molten Fire*. Top leaves are fiery crimson, the lower ones maroon.....Pkt. 15c
- 1210 *Tricolor*—*Joseph's Coat*. Leaves brilliantly marked red, yellow, green } Pkt. 10c
- 1221 *Mixed*. All sortsPkt. 10c

Little Gem Alyssum

Buist's Beautiful Snapdragons

89

Antirrhinum ©

Hardy Annual. July-October. They are the aristocrats of the garden. There are few flowers that compare with Snapdragons for their many gorgeous colors, exquisite form and all-around usefulness. Their continuous blooming qualities, ease of culture and bright colors entitles them to a place in every garden, being fine for both bedding and cutting purposes.

For Summer flowering, sow the seed indoors in March and transplant to the open ground in May. Provide rich soil and set the plants 9 inches apart each way. Snapdragons prefer full sun, although they will do well in semi-shade.

To have good straight stems, each plant should be staked to support the large blooms. Seed pods should never be allowed to form, and flowering stalks, after blooming, should be promptly removed.

GIANT FLOWERED

2½ to 3 ft. A wonderful improvement over the tall, large-flowering strains in vigor of growth, size, color and profusion of blooms. They grow much taller than the Half-Dwarf varieties, and have larger flowers, set closely on the stems.

 AQUILEGIA. See Columbine.

Buist's Giant Annual Asters®

California Giant Aster

ONE of the most popular and effective of our garden favorites, producing a profusion of flowers in which richness and variety of colors are combined with the most perfect and beautiful forms. They are outstanding in every garden, or pleasure ground. As cut flowers they rival the Chrysanthemum in beauty and diversity of form and color, and remain firm and fresh for days.

By planting early, mid-season, and late flowering varieties you may have a continuous succession of flowers from early summer until frost. For early blooms sow seed indoors or in a cold frame in March, otherwise sow outdoors after danger from freezing has passed.

Good culture and a sunny open situation is essential. Avoid the numerous diseases to which Asters are susceptible by planting in new ground each year. Prepare the soil carefully, using a good heavy loam enriched with a liberal quantity of bone meal, wood ashes and a little air-slacked lime. Barnyard manure should never be used. The plants should be cultivated frequently and tobacco dust sprinkled around the stems to control aphids.

California Giant Asters

2 to 3 ft. August-October. The flowers are large and full, combining the well known Crego or feathered type with the vigorous habit of growth and long stems of the Beauty type. The flowers are large and double with long curled petals 5 inches or more in diameter borne on strong, heavy stems 1½ to 2 feet long. A true non-lateral type. Those who demand the finest for their gardens choose the California Giants and Giant Beauty Asters.

Wilt-
Resistant
Asters

You Can Grow

IN SOME localities Aster plantings have often been a failure with home gardeners. Aster wilt is caused by a parasitic fungus, a disease difficult to overcome once it has made its appearance in the soil. Wilt-Resistant strains are immune from the disease and will grow in infected soil. These strains have been developed in the classes listed below.

Varieties Without Number
Are Wilt-Resistant

- Queen of the Market—Pink, Crimson, Lavender, Purple, Rose and White.

Improved Crego—Crimson, Lavender, Purple, Rose, Pink, White.

Giant Late Branching—Crimson, Lavender, Purple, Rose, Shell Pink, White.

Giant Beauty—Crimson, Lavender, Peach Blossom, Purple, Rose, September Beauty, White.

Separate Colors—Any class of the above:
1/8 oz., 50c; 1/4 oz., 85c.....

Mixed—Any one class in mixed colors of the above:
1/8 oz., 40c; 1/4 oz., 75c.....
- Pkt. 20c
- Pkt. 15c

Heart of France Aster

2 ft. August-October.

- 2154 This beautiful variety is unquestionably the best dark red Aster. Retains its brilliancy for a long period.....
- Pkt. 15c

Buist's Giant Mixed Asters

2 to 3 ft. August-October.

- 2165 A magnificent mixture of the most beautiful of the giant sorts, especially selected from the finest varieties, producing beautiful flowers gorgeous in color, gigantic in size. 1/8 oz., 30c; 1/4 oz., 50c; oz., \$1.50.....
- Pkt. 10c

Hardy Perennial Asters

- 2172 Mixed—Michaelmas Daisies. 2 to 3 ft. September-October. In all hardy flower gardens this class holds an important place. In the Autumn when other flowers are scarce the Michaelmas Daisy with its many shades of lavender and purple will help to lighten up the border
- Pkt. 10c
- 2176 Alpinus Mixed ®—6 to 10 in. May-June. A fine dwarf aster bearing large, single, bluish-purple and white flowers.....

Calendula Orange Shaggy

BLUE LACE FLOWER ©—Didiscus

Annual. 1 1/2 ft. July to Frost. Very charming outdoors or in the greenhouse. The plant grows about 18 inches high and produces attractive, umbel-shaped flowers of lace-like appearance; the color is a clear coerulean or heavenly blue. Sow seed where they are to remain, as they do not stand transplanting. Excellent for cutting.

- 3956 Coeruleus. 1/8 oz., 30c.....Pkt. 10c

BRACHYCOME—Swan River Daisy

Annual. 9 in. July-September. Dainty blue, pink and white flowers which resemble small cinerarias, blooming in great abundance all summer. For edgings, small beds or pot culture.

- 2465 Mixed Colors

BROWALLIA—Amethyst

Annual. 1 1/2 ft. June-September. An exceedingly attractive flower for either the garden in Summer or pot culture in Winter.

- 2476 Elata Mixed. Blue and white.....Pkt. 10c
2477 Speciosa Major. A beautiful ultramarine blue. A rare color.....Pkt. 25c

BUTTERFLY FLOWER. See Schizanthus.

CANDYTUFT ©—Iberis

Annual. 1 ft. June-September. Gay, bright flowers for beds and borders supplying masses of color. Successive plantings of seed in April, May and June, where the plants are intended to stand, give flowers all summer.

Canterbury Bells (Cup and Saucer)

CANTERBURY BELLS—*Campanula*

Biennial. 2½ ft. June.

CALYCANTHEMA—Cup and Saucer. A place should be found in every garden for this old-fashioned and much prized garden plant. The large single blooms resemble a cup and saucer. Hardy biennial, flowering the second year from seed. Sow seed any time up to July 15th, or if sown very early indoors, it may bloom the first year. Thrives best in light, rich soil with good drainage.

- | | |

CANARY BIRD VINE—*Tropaeolum Canariense*

Annual Climber. 15 to 20 ft. June-Oct.

- 2787** A graceful vine with beautifully cut leaves and canary-yellow flowers. Excellent for quickly covering stumps, rockeries and similar places. Does well in shade. Very useful for the Winter window garden. ½ oz., 25c....Pkt. 10c

CANNA—*Indian Shot*

Half-Hardy Perennial. 3 to 5 ft. June to Frost.

Usually these plants are grown from roots, but there is a novelty in raising them from seed. The seed must be soaked in warm water for several hours before planting.

- 2876** Mixed. ½ oz., 25c.....Pkt. 10c

Carnations***Deliciously Fragrant***

Annual or Biennial. 1 ft. July to Frost. Great favorites and becoming more and more popular every year because of their delicious fragrance and richness of colors. Sow the seed indoors in February or early March for plants to set out after all danger of frost is past. Seed planted in August can be wintered over in cold frames, then transplanted in the open ground in April. Carnations like a sunny location and will grow in any soil that is not too rich. Good drainage is essential. Firm, shallow planting, burying the roots and not the stem of the plant under the soil, is essential.

Improved Giant Double—*Chabaud's*

Undoubtedly the best Carnation in existence for outdoor culture and the easiest to raise. The plants are robust, forming ten to twenty stalks bearing huge double flowers rich in color and strongly clove-scented.

Order Now—Don't Wait

Cosmos, the Glory of the Autumn Garden ⁹⁷

Cosmos®

Annual. 4 to 6 ft. July to Frost. Grace and brilliancy are the characteristics of Cosmos. No garden is complete without them. They are the most attractive Autumn flower and a general favorite with all. Early varieties begin flowering in July, but Cosmos reach the height of beauty in the Autumn when they become the conspicuous feature of the garden.

These artistic flowers measure 3 to 4 inches across, are borne on long stems with feathery foliage, making them very graceful and desirable for bouquets. They are effective when planted in broad masses or against evergreens or fences. Cosmos are easy to grow. Sow in the Spring in the open ground and transplant to 18 inches apart. Try some of each of the following types.

Mammoth Late Flowering

This type grows 6 ft. tall and produces hundreds of the largest and finest blooms the latter part of September.

 ¼ oz., 25c.....Pkt. 10c

CYPRESS VINE—Ipomoea Quamoclit

Annual Climber. 15 ft. July to Frost. A quick-growing climber with feathery light green foliage and bright star-shaped flowers. Soak the seed in warm water before sowing.

- 3676 Mixed.** White and scarlet.
 ¼ oz., 20c.....Pkt. 10c

CARDINAL CLIMBER—Ipomoea Quamoclit Hybrid

Annual Climber. 30 ft. July to Frost.

- 3687 A beautiful and attractive climbing vine.** It is a very rapid grower. The foliage is deeply lacinated, and there is an abundance of fiery cardinal-red flowers. ¼ oz., 40c...Pkt. 10c

DELPHINIUM ©—Hardy Larkspur

Hardy Perennial. 3 to 5 ft. June-July. The most popular perennial in cultivation and one of our most showy and useful plants, possessing almost every requisite for the adornment of the garden. The beautiful flowers, borne on tall stately spikes, are a gorgeous sight and a charm to the garden. Excellent as a cut flower.

To prolong the season of bloom, cut the old flower stems off after they have faded, and new shoots will flower later in the season.

Start seed in flats in March. Transplant seedlings 4 inches apart when ¾ inch high. In May set the plants out in the border where they will bloom in Midsummer. Set mature plants 3 feet apart.

- 3740 Wrexham or Hollyhock-flowered.** The greatest advance in Delphiniums. The flowers are of superb size, exquisitely proportioned, on spikes like tapering spires. The mixture contains all the colors in Delphiniums, ranging from pale lavender to indigo blue, many of them bicolor. Their sturdy appearance reminds one of Hollyhocks—hence the name.....Pkt. 25c
3743 Belladonna Improved. One of the most free and continuous blooming varieties. Immense spikes of lovely pale blue.
 1/8 oz., 40c.....Pkt. 20c
3744 Bellamosum. A lovely counterpart to Belladonna. Rich deep blue flowers.
 1/8 oz., 40c.....Pkt. 20c
3776 Gold Medal Hybrids. The colors range from palest lavender, through every shade of blue to pansy-violet, several shades being blended in some of the varieties. ¼ oz., 50c..Pkt. 15c

DELPHINIUM ©—Chinense

Hardy Annual. 1½ ft. June-Sept. A distinct and free-flowering variety blooming the first year if sown early, and making a charming show when planted in masses. It is fine for beds, borders or cutting.

- 3746 Blue Butterfly.** ¼ oz., 40c..... } Pkt.
3747 White Butterfly. ¼ oz., 40c..... } 10c
3749 Cambridge Blue. This new, rich, clear blue surpasses Belladonna in brilliancy of color.
 Pkt. 20c

DIMORPHOTHECA—

African Golden Daisy

Annual. 1 ft. July-September.

- 3987 Aurantiaca.** A very showy African Daisy, bearing an abundance of gorgeous orange, daisy-like flowers, 3 inches across with black centersPkt. 10c
3998 Aurantiaca Hybrids. Beautiful flowers of various shades—primrose, apricot, buff, salmon and delicately tinted.....Pkt. 10c

DOLICHOS. See Beans Ornamental.

DUSTY MILLERS—

For Decorative Bedding

Half-Hardy Perennials. 1½ ft. May to Frost.

Silvery white leaves used for bedding, vases, hanging baskets, ribbon borders and margins; also for formal designs in beds. Sow the seed early indoors and transplant in May.

- 4003 Centaurea Candidissima.** Downy leaves broadly cutPkt. 10c
4005 Centaurea Gymnocarpa. Foliage finely cut.
 Pkt. 10c
4007 Cineraria Maritima Candidissima. Beautiful downy leaves. ¼ oz., 25c.....Pkt. 10c

Unwin's Dwarf Hybrid Dahlia

DAHLIAS ©

Grow Dahlias from Seed

Tender Per. 2-4 ft. July to Frost. Growing Dahlias from seed is extremely easy and fascinating. There is a great deal of pleasure watching them develop, and always the chance of securing something new. For the large flowering types, sow seed inside during March to get plants large enough to set out when danger of frost is over. Tubers can be dug in the Fall and stored for the following season.

- 3698 Single Giant Perfection.** Immense single flowers of various colorsPkt. 10c
- 3709 Double Large-flowering.** Saved from fine double show and fancy sorts.....Pkt. 15c
- 3710 Double Cactus-flowered Mixed.** Many colors, twisted and curled petals.....Pkt. 15c

Beautiful Dwarf Dahlias for Cutting

3712 Unwin's Dwarf Semi-double Hybrids. In three months from seed the dwarf compact plants produce a wealth of semi-double Dahlias, held erect on stiff stems above the foliage. The colors are deep crimson, pink and rose, mauves, scarlet, purple, yellow and white. The plants, 2 feet high, require no stakes and can be spaced 20 inches apart.
Pkt. 20c

3715 Coltness Hybrids. An interesting class of single dwarf Dahlias. Plants form compact bushes about 2 feet high requiring no stakes. This type will bloom in July if seed is sown outdoors when danger of frost is over. By all means try this variety.
Pkt. 15c

EUPHORBIA

Annual. 3 ft. July-September.

- 4076 Variegata—Snow on the Mountain.** Attractive light green foliage, veined and margined white. 1/4 oz., 25c.....Pkt. 10c
- 4077 Heterophylla—Annual Poinsetta.** Bushy plant of branching habit with dark green leaves. The center top leaves of each branch turn orange-scarlet about mid-summer.....Pkt. 10c

EVENING PRIMROSE ©—

Oenothera

Annual. 1 ft. June-September. Bright poppy-like flowers open on approach of twilight and last well into the next day.

- 5587 Mixed**Pkt. 10c

DIANTHUS ©—Annual Garden Pinks

Hardy Annual. 1 ft. June-November. Pinks are the most lovable of all the flowers in the garden, blooming from early Summer until Fall. This branch of the Pink family bears both single and double fragrant flowers with fringed petals. They are unrivalled for brilliancy and richness of color. Seeds sown in Summer or Autumn will flower early the following Spring. If sown early indoors or under glass and transplanted in the garden after frost is gone, they will bloom in July. Plants will usually live over the winter outdoors with light protection; and will bloom early the next spring. The seedlings bear larger and better flowers the first season.

Eschscholtzia (California Poppy)

ESCHSCHOLTZIA®— California Poppy

Annual. 1 ft. July-September. California Poppies are among our most beautiful and popular annuals, being of the easiest culture. Suitable for beds, borders and rock gardens; blooming profusely over a long season. Sow the seed any time during the Spring in a sunny location where they are to remain, as they do not stand transplanting.

| 3976 | Monstrosa Mixed. Long spikes surmounted by one enormous flower. 1/4 oz., 40c.. | Pkt. 10c |

Everlasting Flowers®

Easy to Grow

Bright and cheerful. Fresh in summer. Dried for winter. Enjoy them both ways. Winter bouquets made from Everlasting flowers brighten your home or make a splendid gift.

Flowers intended for drying should be cut before fully expanded. Remove foliage, tie in bunches, and hang blooms downward in some dark, dry place until cured. Drying requires about 10 days and the original colors are retained. The popular sorts are:

- 4748** Green LeavedPkt. 10c
4750 Variegated. Leaves variegated, splashed and streaked whitePkt. 10c

KUDZU VINE—

Pueraria Thunbergiana

Hardy Perennial Climber. 10 to 40 ft. April-October. A vine of remarkably rapid growth, 8 to 10 feet the first year from seed, and 40 to 50 feet from established roots. Quickly covers porches, trellises and unsightly objects. Hardy perennial, the tops killing back to the ground each Winter.

- 4765** Japanese Kudzu Vine. $\frac{1}{4}$ oz., 25c..Pkt. 10c

Larkspur ©

Annual. $2\frac{1}{2}$ to 3 ft. June to Frost. The Larkspur is one of the brightest and showiest of garden flowers. Plant breeders have produced a wonderful improvement by careful selection in size and color of the flower and the general habit of the plant. The flower spikes are of varied shades of red, blue, white, pink, etc. Splendid for beds or borders. Their graceful habit and bright colors make them very attractive. They are of easy culture, thriving in any soil and giving a continuous succession of blooms until cut down by frost. Seed sown in the open ground in April will produce flowering plants by July.

Marigolds ©

105

Annual. July-October. In every garden, Marigolds are old favorites and rank next to Zinnia in dignity and interest. The new types are outstanding. Marigolds keep the garden bright and cheery from mid-summer until frost. The long stiff stems so necessary for ideal cut flowers are covered with an attractive foliage. They prefer a light, rich soil and a sunny situation, and adapt themselves to the mixed border or large beds.

EIGHT OUTSTANDING MARIGOLDS

Sweetly fragrant. Free from the usual Marigold odor.

CHRYSANTHEMUM FLOWERED—3 ft. In-curved Type. A distinct type introduced in 1938 representing one of the great advancements in Marigolds. The flowers of this lovely in-curved type are true and 100% double averaging 4 ins. The stems are good and strong, supporting masses of flowers of the highest artistic value for cutting.

4966 Orange } $\frac{1}{8}$ Oz., 40c.....Pkt. 20c
4968 Yellow }

4970 Mixed. Colors vary from deep orange to light orange and from deep yellow to light yellow. $\frac{1}{8}$ oz., 35c.....Pkt. 15c

4955 Chrysanthemum Flowered Hybrids. 3 ft. Shades of orange and yellow. $\frac{1}{8}$ oz., 35c.....Pkt. 10c

4957 GIGANTEA SUNSET GIANTS. 4 ft. The most popular Marigold for size and beauty. The flowers are fragrant and the largest ever known in the Marigold group, averaging 5 ins. in size. They are loosely formed and very full centered with broad, heavy petals gracefully overlapping. The plant is strong, growing with heavy foliage and good cutting stems. Sunset Giant is a mixture of orange and yellow shades. $\frac{1}{8}$ oz., 35c.....Pkt. 15c

4972 COLLARETTE CROWN OF GOLD. 2½ ft. The first Marigold in cultivation with odorless foliage. Flowers 2½ ins. across, sweet-scented, golden orange, chrysanthemum-like top surrounded by a collar of broad petals. $\frac{1}{8}$ oz., 35c.....Pkt. 15c

4960 GUINEA GOLD. 3 ft. Ever increasing in popularity. Flowers 2 to 2½ ins. across, semi-double and double, golden orange. $\frac{1}{8}$ oz., 25c; $\frac{1}{4}$ oz., 45c.....Pkt. 10c

4961 YELLOW SUPREME. 3 ft. Similar to Guinea Gold, but flowers are larger and fluffier, 3 ins. across with broad, loose, frilled petals of a rich lemon yellow. $\frac{1}{8}$ oz., 30c; $\frac{1}{4}$ oz., 50c.....Pkt. 10c

Tall Double African Marigolds—3 ft.

Splendid large flowers of the quilled type.

4962 Orange Alldouble. The Alldouble strain is 100% double. A rich golden orange. $\frac{1}{8}$ oz., 35c.....Pkt. 15c

4963 Lemon Alldouble. $\frac{1}{8}$ oz., 35c..Pkt. 15c

5029 Collection. One packet each.....40c

5043 French Double Mixed. $\frac{1}{4}$ oz., 25c..Pkt. 10c

Early Flowering French Marigolds—1 ft.

5022 Harmony. The finest Dwarf Double French Marigold ever introduced. In less than three months from seed the dwarf compact plants attract attention with a blaze of color. The flowers cover the entire bush and continue to bloom all season until killed by frost. Distinct and Scabiosa-like in formation, each bloom has a central deep orange crest which is surrounded by a narrow maroon collar of broad petals. A gorgeous sight that every garden should have in either a bed or border. $\frac{1}{4}$ oz. 35c.....Pkt. 10c

Marigold—Harmony

Buist's Giant Flowering Nasturtiums ©

Double Sweet-Scented Nasturtiums

NASTURTIUMS are one of our most popular garden annuals. They excel for brilliancy of color, duration of bloom, ease of culture and general usefulness.

All they need is a moderately good, light soil, preferably sandy, in a well drained, sunny situation, and within a few weeks from the time they are planted until frost comes, there is an endless profusion of their gorgeous blossoms. They are suitable for bedding or edging and distinctive as a cut flower, having a spicy fragrance. Plant seed 2 inches deep when ground is warm, and thin to 6 inches apart. The more the flowers are picked, the more freely they will bloom.

Dwarf Nasturtiums—1 ft.

- 5232** Bronze. Burnt bronze color, dark leaves.
- 5276** Golden King. Golden yellow, dark foliage.
- 5287** Golden Cloth. Scarlet with yellow leaves.
- 5298** King of Tom Thumbs. Scarlet, dark foliage.
- 5309** King Theodore. Dark maroon, dark foliage.
- 5343** Rose. A lovely shade of ruby rose.
- 5354** Ruby King. Rich red, dark foliage.
- 5365** Vesuvius. Salmon-rose.

Price: Any of the above,
Oz., 25c; ¼ lb., 75c; Pkt., 10c

- 5376** Collection. One packet each.....60c

- 5387** Buist's Special Mixture of Dwarf Giant Flowered. A matchless mixture composed of the most elegant large flowered sorts, with colors ranging through every tint and shade. Their fine color, long stems, great size make them valuable for cutting.

Oz., 15c; ¼ lb., 50c.....Pkt. 10c

Tall Nasturtiums—6 to 10 ft.

- 5510** Buist's Special Mixture of Tall Giant Flowered. Elegant and luxuriant climbers for verandas, trellises, etc., and particularly suitable for vases, hanging baskets, window boxes and rockeries when a drooping effect is wanted. A beautiful mixture of colors.

Oz., 15c; ¼ lb., 45c.....Pkt. 10c

Double Sweet-Scented Nasturtiums

The result of scientific breeding and selection has now created a distinct race of Double Sweet-Scented Nasturtiums that are popular throughout the world. Easy to grow; however, do not overfeed or water, or they will produce too much growth and not enough flowers. The plant forms a dwarf bushy growth which throws out small runners. When near development the entire plant, including the runners, starts to bloom and is a blaze of color. Strong long stems, lovely for cutting.

- 5551** Golden Gleam. The most popular of all the sweet-scented Nasturtiums. Bright golden yellow, delightfully perfumed.
- 5555** Mahogany Gleam. Dark mahogany red.
- 5556** Moon Gleam. Soft primrose.
- 5552** Orange Gleam. Golden orange.
- 5553** Scarlet Gleam. Fiery scarlet.
- 5557** Salmon Gleam. Salmon-cerise.
Any of the above, Oz., 25c; Pkt. 10c.
- 5558** Collection. One packet each.....50c
- 5560** Glorious Gleam Hybrids. A wide range of colors including salmon, golden-yellow, orange scarlet, cerise, cream-yellow, orange, crimson and gold flushed scarlet. Oz., 20c; ¼ lb., 60c; Pkt. 10c.

Double Dwarf Nasturtiums

The plants of this dwarf type are of compact well-rounded growth and totally without runners producing sweet-scented, double flowers. Height 1 ft.

- 5561** Golden Globe. Golden yellow.
- 5562** Mahogany Gem. Deep mahogany.
- 5563** Scarlet Globe. Fiery scarlet.
Any of the above, Oz., 30c; Pkt. 10c.
- 5564** Dwarf Double Mixed. Oz., 25c; Pkt. 10c.

MIGNONETTE ©—*Reseda*

Annual. 1 to 1½ ft. June to Frost. The sweet delicate fragrance makes this flower very useful for cutting and mixing in with more pretentious blooms lacking a delicate odor. Sow in Spring. Fine for Winter pot culture.

- 5098** Machet. Giant spikes of a reddish-tinted color. ¼ oz., **25c**.....Pkt. **10c**
5132 Mixed Sweet Scented. Oz., **25c**....Pkt. **10c**

Phlox Drummondii

Buist's Giant Pansies

Buist's Prize Pansy

Pansy ©

Annual or Biennial. 8 in. April-October.

THIS beautiful flower is too well known to need any description. The seed we offer has been saved from the most distinct and best-named varieties. The higher priced sorts produce the best flowers.

Pansies like a cold, moist situation. They thrive in a rich loamy soil containing leaf mould and cow manure, well-rotted or prepared in dry form. Sow the seed in well pulverized soil, covering the seed four times their size and firmly press the soil. When large enough transplant. Cultivate frequently.

For Summer blooming, sow seed indoors very early and transplant when 2 inches high or sow in the open ground in April. For early Spring blooming, sow seed in August or September and transplant 4 to 5 inches apart into cold frames or they may be wintered over in the open ground with protection of hay or straw. In the early Spring, transplant to their flowering beds to stand 9 inches apart. During dry weather, the bed should be watered daily.

Buist's Prize Pansy

- 5598** Our finest mixture containing strains of exhibition size of the most beautiful colors and markings. Each year we add the latest prize-winning Giants. The Buist Prize is unsurpassed for gigantic flowers, perfect form and texture, and richness of colors.
 $\frac{1}{8}$ oz., \$1.00.....Pkt. 25c

Swiss Giant Pansies

- 5605** Roggli Giants Mixed. This strain recently developed in Switzerland surpasses in largeness and splendid colors all former sorts. The flowers are enormous, containing many unusual colors such as salmon, pink, blue, yellow and many shades of wine red, all beautifully blotched with contrasting deep colors. The stems are long and stiff, making them valuable for cutting. $\frac{1}{8}$ oz., 75c....Pkt. 25c

Frilled Pansies

- 5621** Masterpiece. Beautifully ruffled flowers of large size and very fascinating colors. $\frac{1}{8}$ oz., \$1.00...Pkt. 25c

Buist's Superb Pansies

 $\frac{1}{8}$ oz., 30c.....Pkt. 10c

PINKS. See Dianthus.

Buist's Giant Fringed Petunias

Petunias

Many Improved Types

Annual. 1 to 1½ ft. June to Frost. A bed of Petunias is a glorious sight indeed. Freedom of bloom, variety of color and effectiveness have made them a leader in popularity as the ideal bedding plant. They are easy to grow and require little care after the plants are established. It is best to sow the Giant varieties indoors and transplant outside in May. The other types can be sown out-of-doors in May. The seed is very fine, so cover with soil very lightly, if at all.

They commence to flower early and will produce their handsome sweet-scented flowers in their delicate and gorgeous colors throughout the entire summer.

Buist's Giant Petunias

The Seeds of Giant Petunias are expensive and the safest method is to start them indoors in a flat box or pan filled with good sifted soil. Press them into the surface rather than cover with soil and place glass over the box to retain the moisture. Take the glass off after the seed germinates to prevent dampening off. The very weak, slow growing plants produce the finest flowers; be sure to give these weaklings extra care until they develop into strong, sturdy plants.

5865 Buist Superb Giant Fringed

A mixture of the best strain of giant flowering fringed sorts, measuring 4 to 5 inches across. Flowers are beautiful, extremely large and deep-throated embracing every conceivable color, shade and markings.....Pkt. 25c

5876 Fluffy Ruffles. The edges are deeply ruffled and fluted, of great substance, with deep, wide throats, varying in color from pure white to deep purplePkt. 25c

5887 Giant Double Mixed. A superb mixture of the best large flowering and fringed double Petunias. About 40 per cent will bear double flowers. The finest double flowers are usually the weakest seedlingsPkt. 40c

5889 Purple Prince. Large-flowering velvety purple, with smooth-edged lobes.....Pkt. 25c

5895 Giant Flowering Plain Edged Mixed. Enormous blooms with large, smooth-edged lobes forming a five-pointed star.....Pkt. 20c

BALCONY PETUNIAS

These large and beautiful Petunias were bred to produce a wealth of bloom when grown in porch or window boxes, or garden vases. The blooms measure 3 inches in diameter and are in solid colors. Also splendid in beds, borders or terraces.

5964 Ruffled Martha Washington. 9 in. Remarkable color frilled portion, blush pink, center is strongly veined with rich wine red...Pkt. 25c

Poppies

Successive Sowings Bring Blooms all Season

One of the grandest garden annuals. So easy to grow, that the mere throwing of seed on the ground will bring forth their gay, flaunting colors. Masses of beautiful hybrids have been evolved, vying with each other in glorious beauty. The annual varieties should be sown where they are to flower, as they will not stand transplanting. Sow seed thinly, cover lightly, and thin to 8 in. apart. Can be sown as late as June, but the best plants are those grown from early sowings when the soil is cool and moist. If the flowers are gathered early in the morning when the dew is on them, and the end of the stems dipped in hot water to stop bleeding, they will remain fresh for several days.

Single Annual Shirley Poppies—1½ ft.

The most exquisite single Poppies in existence. The effect created by these lovely flowers, with their silky, shining petals varying in all colors of the rainbow, is hard to describe, and must be seen to be fully appreciated.

Salvia

Scarlet Sage

Annual. 2 to 3 ft. July to Frost. One of the handsomest flower plants for garden decoration; keeps the garden bright until late in the Fall. Fine for bedding. Seed should be sown indoors or in a hotbed and the young plants transferred to the open ground when the weather becomes suitable.

- 6598** *America or Globe of Fire.* 2 ft. The earliest of all Scarlet Sage and a free and continuous bloomer. The most uniform in habit of growth, with bushy plants not growing over 2 ft., which makes it particularly valuable for beds or borders. ⅛ oz., 75c.....Pkt. 20c
- 6565** *Splendens—Scarlet Sage.* 3 ft. Excellent for large beds and borders; brilliant scarlet. ⅛ oz., 40c.....Pkt. 10c
- 6576** *Bonfire.* 2 ft. Very free bloomer, growing in a compact bush. The scarlet spikes grow erect and stand clear above the foliage. ⅛ oz., 50c.....Pkt. 10c
- 6587** *Zurich.* 1½ ft. Scarlet red. Early and dwarf. Pkt. 15c

PERENNIAL SALVIA. 2 Ft. July to Frost

- 6589** *Farinacea—Blue Sage.* Long spikes of light blue flowers. A perennial but best grown as an annual. Flowers may be dried and used as an everlasting. ⅛ oz., 50c.....Pkt. 10c
- 6609** *Patens—Blue Sage.* Deep blue, a beautiful plant for the border or greenhouse, tender perennial. ⅛ oz., 75c.....Pkt. 15c

SANTA BARBARA POPPY. See *Hunnemannia*.

Scabiosa ©

Mourning Bride, Sweet Scabious or Pincushion

Annual. 2½ ft. July to Frost. A favorite in every garden. Easy to grow, producing an enormous number of long, graceful stems crowned with 2-in. clusters of small flowers of the most delightful colors, white to rich velvety black purple. As a cut flower it is invaluable. Bees are very fond of its sweetness and it also attracts the most beautiful types of butterflies.

SWEET WIVELSFIELD ©—

New Hybrid Dianthus

Hardy Annual. 1 ft. June-October.

- 7600** This new annual is a hybrid. Its growth is similar to Sweet William, but the flowers are larger and have a wider range of colors. If sown indoors in February, will bloom in June; if sown outdoors in April, will bloom in August. ¼ oz., 50c.....Pkt. 10c

Sweet William

Buist's Prize Sweet Peas

THE wonderful range of colors, combined with the exquisite form of the flowers and the gracefulness of the stems and tendrils, make this the most popular of our annual flowers. They are grown so easily and repay so grandly.

PLANT SWEET PEAS EARLY ©

Annual Climber. 4 to 5 ft. May-July.

CULTURE

They are of the easiest culture, but the most important requisite to bear in mind is that they should be sown very early in the Spring in rich, well-pulverized soil. Dig a trench 18 inches deep and enrich with well rotted stable manure or bone meal. Plant in rows 6 inches deep. Sow the seed and cover 2 inches, pressing the soil down firmly. Plenty of sunlight and fresh air are essential to the success of Sweet Peas.

As soon as the young seedlings are 2 inches high, thin out the young plants to 4 inches apart, as this will allow the air and light to circulate freely among the growing vines, resulting in larger flowers, longer stems, better color and more blooms. Continue filling in 2 inches of soil at a time until the trench is filled; the plants will then become thoroughly established to withstand warm weather and will continue flowering a much longer period than if sown in the ordinary way near the surface. When the plants are about 5 inches high, it is desirable to furnish some support for the vines to run upon, preferably a wire netting firmly supported by stakes to prevent sagging; but strings or brush are used with satisfactory results.

Sweet Peas should not be grown in same soil year after year. Another very important feature that must not be overlooked is the clipping off of the flowers as they mature and fade, for if they are allowed to remain, they form their seed pods and then mature and the vines die.

The roots should not be allowed to become too dry. Water applied

thoroughly once or twice a week, preferably early in the morning or in the evening after sundown, is usually better than a light sprinkling.

Splendid results can be obtained in the Southern States by sowing in the Fall or early Winter. The plants become better established and the root growth stronger, prolonging the blooming period.

One ounce will plant a single row of 25 feet.

Buist's Prize
Spencer Sweet
Peas

Buist's Prize Spencer Sweet Peas 115

Summer Flowering Spencers

THIS strain includes the largest and most beautifully formed Sweet Peas, truly gigantic in size, measuring 2 to 2½ inches across. They are beautifully formed with huge standards, open and upright and immense wings gracefully poised. Both standards and wings are delicately waved. Three and often four handsome blossoms are borne on long, strong stems, rendering them available as cut flowers for vases, bouquets and other decorations.

Oz., 20c; ¼ lb., 60c; lb., \$2.00. Pkt. 10c

HARDY SWEET PEAS. See *Lathyrus*.

Early Flowering Spencers

This new class of early-flowering Spencer Sweet Peas is very popular with florists for greenhouse culture. They are particularly adapted to the Southern States, where, if sown in the Fall or early Winter months, will bloom three months from time of planting and will continue to flower until killed by the extreme heat.

The flowers are of fine size on long stems. Grown in the open ground, they begin flowering fully four weeks sooner than the Summer-flowering Sweet Peas sown at same time.

- 7378** All White. Largest and finest pure white.
 - 7376** Aviator. Dazzling crimson-scarlet.
 - 7382** Columbia. Salmon rose with white wings.
 - 7385** Cream or Meadow Lark. Primrose yellow.

- 7843** Double MixedPkt. 15c

118 Zinnias-the Outstanding Garden Annual

Buist's California Giant Zinnia

Zinnia © *Youth and Old Age*

Hardy Annual. June to Frost.

ZINNIAS, the most gorgeous of annuals, remarkable for the duration and profusion of their flowers, furnishing an abundance of extremely double flowers of varied and brilliant colors the entire Summer; each flower keeping perfect for weeks before fading. During the past few years there has been a great revival of interest in the Zinnia flower, commonly known as "Youth and Old Age." Plant breeders have tried to excel one another in improving the existing forms and are bringing new ones each year to the attention of the flower lover. All the various types are handsome in shape, sturdy, and meet every garden need for beds, borders and cut flowers. They are easy to grow, doing well almost anywhere with little care.

Sow seed early in the Spring in the open ground when all danger of frost has passed, in good rich soil, covering about one-half inch deep. When the young plants are 2 inches high, thin to 12 to 18 inches apart each way, as they are robust growers and require a large amount of space to attain maximum size. For a late planting, seed sown up to the middle of July will bloom in September, giving the garden a renewed wealth of color at a time when other flowers and plants are beginning to fade.

Buist's California Giant Double Zinnias

3 ft. A very special strain of Zinnia producing immense blooms—4 to 5 inches across not being unusual. The double flowers are semi-globular in shape and are produced abundantly all Summer until late Autumn. Although tall and erect in growth, they require no support, being sturdy and deep rooted. Fine as a cut flower or for bedding purposes.

- 8056 Pastel Mixture. Soft shades of apricot, peach, creamy yellow, shell pink, delicate salmon, light rose and orchid. 1/4 oz., 30c..Pkt. 10c

Dwarf Double Zinnias Cut and Come Again

2 ft. Considered the best Zinnia for bedding. Forms large bushy plants, bearing large perfect double flowers in good clear distinct colors.

- 7954 Yellow
- 7965 Scarlet
- 7976 Orange
- 7987 Salmon-Rose
- 7998 White
- 8009 Crimson

Any of the above, 1/4 oz., 30c

- 8010 Collection. One packet each.....50c
- 8021 Mixed. 1/4 oz., 25c; oz., 60c.....Pkt. 10c

Fantasy Zinnias

Chrysanthemum Flowered

3 ft. A fascinating Zinnia, graceful and interesting, which is quite distinct from the more formal Zinnias. The rounded medium-sized flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance.

8250 Mixed. Bright shades of red, yellow and orange as well as the pastel pinks and cream. $\frac{1}{4}$ oz., 40c; $\frac{1}{2}$ oz., 75c.....Pkt. 10c

Scabiosa-Flowered Zinnias

3 ft. A distinct flower resembling the annual Scabiosa. The outer row of petals are long and large, inner rows are short and tubular.

8240 Mixed. The mixture includes crimson, orange, pink, scarlet, white and yellow colors. $\frac{1}{4}$ oz., 50c.....Pkt. 10c

Dwarf Picotee Delight Zinnias

2 to $2\frac{1}{2}$ ft. A distinct type. Beautiful double flowers, $2\frac{1}{2}$ inches across; petals curled, tipped with picotee markings. Delight Zinnia will give an effective and unusual display in the garden or in vases.

8260 Golden Ray. Golden orange tipped with a delicate edging of brick red.....Pkt. 15c

8265 Salmon Rose. Salmon tones tipped with contrasting colorPkt. 15c

8270 Mixed. A wide range of colors and markings. $\frac{1}{4}$ oz., 35c; $\frac{1}{2}$ oz., 60c.....Pkt. 10c

Wild Garden Annuals

This is a mixture of easily grown annuals, which thrive with little care; they are not wild flowers nor weedy. There is a great opportunity to use them in your vicinity. They may be sown along fences, embankments or rough ground. The cheery flowers will change an unsightly corner into a gay, beautiful place. Think of the pleasure you will be giving passers-by if you buy a pound and sow it thickly on unsightly road embankments or similar places. It is a little thing to do, but will improve your locality, and make it a better place to live. Try it this Summer.

7854 Mixture. $\frac{1}{2}$ oz., 15c; oz., 25c; $\frac{1}{4}$ lb., 75c; lb., \$2.50Pkt. 10c

DIRECTIONS ON HOW TO MAKE A ROCK GARDEN

THE lore of making a rock garden might well be expected to fill many large books instead of a few paragraphs. It is a fascinating subject and has long been a hobby with the most skilled gardeners of the Old World and is becoming increasingly popular in this country.

When building a rock garden, the ground may be roughly staked to indicate the outline and be sure to have it irregular so that the plants may be seen from different aspects. Although most of them prefer direct sunlight, a considerable number like partial shade. The land should slope sufficiently in all parts to provide rapid surface drainage. In most cases it will be necessary to remove the top foot of soil, unless one is so fortunate as to possess a natural ledge. (While a pool is not necessary, it is effective and if you intend to include a small aquatic garden the depth of the pool should be three feet.) Fill the space dug out with stones, gravel or loose, hard material about half way to the top to make sure that your rock garden will be adequately drained. On top of this place some of the best soil originally removed and let it stand for a week to settle.

Finally place the rocks in position. The size and shape of the rocks used must be determined by the size and shape of your garden and by your own taste. There should be no crowding of rocks; each stone should lie on its broadest base. Set the rocks irregularly and bury them at least one-third of their depth, sloping the stones downward in the soil, so that the moisture will drain toward the roots. Try to use only one kind of rock of the largest size that you think will be effective and avoid those of a cobblestone nature.

Place the stones so they will keep the soil from washing away when watering or during heavy rains. In the process of construction, all crevices must be rammed full of top soil consisting of a mixture of garden loam, sharp sand and leaf mold. It is important that the plants have ample pockets of soil in the open spaces between the rocks. Allow no air pockets between the rocks and be sure when planting that the soil is firm around the roots of the plants. Autumn is the best time of the year to build a rock garden. The soil and rocks will become settled by Spring and the garden will be in good condition for planting.

It is advisable to plant some of the spaces with dwarf annuals which will keep the rockery bright until the hardy rock plants establish themselves. You will enjoy your rock garden all the more if you raise your own plants from seed. *Seeds suitable for the Rock Garden are marked with the symbol ®.*

Annual Rock Garden Collection

Until the hardy rock plants establish themselves, this collection of annuals will give a beautiful display.

Alyssum Little Gem	Marigold Golden Miniature
Eschscholtzia Mixed	Petunia Balcony Mixed
Lobelia Crystal Palace	Portulaca Double Mixed

One packet each; value 65c, for 50c

Perennial Rock Garden Collection

Ten choice, easily grown perennials for the rockery.

Cerastium	Myosotis Palustris
Cowslip Mixed	Tunica

One packet each; value \$1.25, for \$1.00

Customers will find it convenient to order Flower Seeds by number. This will facilitate the filling of orders and will insure prompt shipment.

A COMPLETE INDEX OF ANY FLOWER SEED IS LISTED ON PAGE 144

SOME of the most beautiful flowers we have are grown from Spring and early Summer planted bulbs or roots. Their culture is very easy and they flower with great certainty during Summer and Fall. We supply only the highest quality stock.

AMARYLLIS

The Amaryllis produces showy flowers that are handsome and very attractive, resembling Lilies. They are very easily grown in pots for blooming in the house during the Winter and early Spring.

CULTURE. Amaryllis should be potted as soon as received. Pot the bulbs singly in 6-inch pots in good garden soil enriched with bone meal or well-decomposed cow manure. Add sufficient sharp sand to make the soil loose and friable. Cover only to the shoulder of the bulb, leaving the neck protruding. Water sparingly and keep in a dark place at 50 to 60 degrees temperature for about a month until well rooted, then expose to full sun and water daily, taking care to provide ample drainage. It is essential for good bloom that the roots become crowded in the pot. For this reason do not shift to a larger pot when the roots appear to be cramped; as they require very little soil. After the blooms die, place the pots outdoors plunging the pots in the open border where they will be exposed to full sunshine and produce a nice growth of leaves. To rest a bulb is to allow a period for dormancy, hence in the early Fall remove the pot to a cool cellar, stop watering and allow the foliage to dry. Allow them to rest until early Winter, then prepare them to bloom again. Repotting is not necessary though it is essential to work some bone meal or liquid cow manure in the soil.

Giant-flowered Hybrids. The finest of the Amaryllis family. These bulbs produce four to six trumpet-like blooms on strong stems. The colors range from beautiful markings of rose, red and crimson on pure white grounds as well as solid colors of crimson, cherry-red, red, rich scarlets and maroon. **In mixture only. 60c each, 3 for \$1.50, postpaid.**

Johnsoni. Bright crimson flowers marked with broad white stripes running through the center of each flower petal. Each bulb produces 3 to 4 flowering spikes, each carrying four perfect blooms 5 inches in diameter. **40c each; 3 for \$1.00, postpaid.**

TUBEROUS ROOTED BEGONIAS

They Thrive in Shade or Partial Shade

These beautiful wax-like flowers are gigantic in size, measuring 4 to 6 inches across. The brilliant, vivid colors are rare in beauty and contrast well with the rich exotic foliage. They are very useful, for every garden has shaded spots where the average flower will not grow. Such places are ideal for this flower; yet it will make a dazzling show in the open.

CULTURE. In the Spring the dormant tubers show pink swellings at the center of the crown. They should then be planted outdoors late in May, 10 inches apart, or in pots indoors in March or April and later transplanted outside to give earlier blooms. Plant in rich loose soil, preferably leaf mold, being sure the drainage is good and that the tuber is so placed that the top center is above the soil. Water sparingly, increasing the moisture supply after the first leaves form. Too early or too deep planting may kill the tuber. The bulbs or tubers must be lifted in the fall after the first heavy frost has killed the foliage. Store in a cool dry, frost-proof cellar until planting time.

Single Begonias. Crimson, salmon, pink, scarlet, white and yellow. **20c each; \$2.00 per dozen, postpaid.**

Double Begonias. Crimson, salmon, pink, scarlet, white and yellow. **20c each; \$2.00 per dozen, postpaid.**

Caladium Esculentum (Elephant's Ear)

GOLDEN YELLOW CALLA LILIES

The best Yellow Calla with flowers as large as the popular white winter-flowering variety, but of a rich, golden yellow, velvety texture. The foliage is dark green with translucent creamy white spots which give the plant a very ornamental appearance.

CULTURE. Splendid as a pot plant grown indoors early, or for growing outdoors in the open border or for a shaded location. If planted when the ground is warm in good rich loam, they will flower during the Summer months. When the tops are killed by frost, dig and store in a cool frost-proof cellar. **Mammoth Bulbs. 35c each; \$3.50 per dozen, postpaid.**

CALADIUM ESCULENTUM

Elephant's Ear

A fine tropical plant that is easily grown with large rich green leaves, often measuring 3 to 4 feet long by 2½ feet wide. They are an effective center for flower beds or for irregular beds as an ornamental lawn display.

CULTURE. Caladiums are easily grown in any good garden soil. Plant outdoors when the soil is warm, about the middle of May. To obtain the best results they should be planted where they will obtain plenty of water and an abundance of rich compost. Take up before frost, cut off the old stems and store in a cool, dry frost-proof place until time for spring planting.

	Each	Postpaid	Per Doz.	Postpaid
Monster Bulbs35		\$3.50	
Mammoth "25		2.50	
First Size "15		1.50	

FANCY-LEAVED CALADIUMS

Few, if any, of the Summer foliage plants equal the Fancy-leaved Caladiums in their rich, tropical color combinations. During the Summer months they are excellent for window or porch boxes, or for outdoor beds in shady or semi-shady locations.

CULTURE. Being of a tropical nature, they require a warm temperature and it is safe to plant outdoors the latter part of May. For earlier results, start indoors using a well-drained sandy loam. Cover the bulb about one-quarter of an inch, water sparingly and keep at 70 degrees. When the first leaves begin to show color, transplant to 5 or 6 inch pots, depending upon the size of the bulbs. A mixture of leaf mold and well-decomposed cow manure gives the best results. Increase watering as the plants grow, for they require plenty of moisture to attain perfection. If indoor pot grown bulbs are raised for the garden, transplant outdoors after the weather is warm, preferably to a shady location. In the autumn, rest the bulb, remove to a dry warm cellar, stop watering and allow the foliage to dry. Replant in the Spring. **In Mixture Only. 25c each; 6 for \$1.30; per dozen, \$2.50 postpaid.**

Cannas Make Attractive Beds

CANNAS

The most popular of all bedding plants making a brilliant and effective show during the entire Summer until late Fall. They produce large, conspicuous clusters of orchid-like flowers in the widest range of gay and bright colors, with a rich tropical foliage in green or bronze shades. They are most effective when planted in masses of one variety.

CULTURE. No other class of tender bulb is so easily grown. They succeed in sunny positions in any kind of soil and respond quickly to liberal treatment. Cannas are gross feeders and for best results the beds should be spaded deeply, using a generous amount of well-decomposed manure and bone meal. Plant the dormant roots when the ground is warm, spacing them 2 feet apart and set them with the "eye" just above the ground. They may be started in pots and later transplanted outside to give earlier blooms.

Green-Leaved Cannas

Apricot. 4 ft. Buff-yellow base, overspread with salmon-pink.

Mme. Crozy. 3 ft. Brilliant vermilion-scarlet flowers edged yellow.

Pennsylvania. 5 ft. Bright crimson scarlet. Very showy in beds or as a center for more dwarf varieties.

Richard Wallace. 4 ft. An ideal bedder, color canary yellow. Free bloomer.

The President. 4 ft. This gorgeous variety produces giant flowers of a rich glowing scarlet color, often measuring 7 inches across when fully opened.

Wintzer's Colossal. 5 ft. Bright scarlet flowers of immense size. The plant is a strong vigorous grower.

Yellow King Humbert. 4 ft. A green-leaved sport of the King Humbert. It has the same habit and growth and free-flowering qualities, but the flowers are a deep rich yellow spotted and blotched with bright red.

Price: Any of the above Green-Leaved Cannas
Postpaid, 3 for 25c; 75c per dozen.
Not Prepaid, \$4.50 per 100.

Green-Leaved Cannas

City of Portland. 3½ ft. Bright rosy-pink, a free-flowering vigorous bloomer.

Eureka. 4½ ft. Considered the finest white Canna. Free bloomer; green foliage.

Mrs. Alfred Conrad. 4 ft. The "Queen of Cannas." Gigantic flowers of beautiful salmon-pink.

Hungaria. 3½ ft. Rich peach blossom pink, a continuous bearer. Flowers very large with immense petals. Ideal for bedding.

Price: Any of the above four varieties
Postpaid, 3 for 25c; 90c per dozen.
Not Prepaid, \$5.50 per 100.

Bronze-Leaved Cannas

Ambassador. 3½ ft. Bears immense trusses of brilliant cherry red flowers set off by bronzy foliage.

King Humbert. "King of All." 4 ft. Bears immense brilliant orange-scarlet flowers streaked with crimson and gold, in gigantic trusses. Foliage rich coppery-bronze.

Rosea Gigantea. 4 ft. Magnificent trusses of a stunning rich rose color of gigantic size.

Shenandoah. 4 ft. Flowers beautiful, rosy pink, borne in large clusters. A fine bedder.

Price: Any of the above Bronze-Leaved Cannas
Postpaid, 3 for 25c; 90c per dozen.
Not Prepaid, \$5.50 per 100.

Buist's Superb Canna

CINNAMON VINE

A beautiful, rapid-growing climber, taking its name from the peculiar fragrance of the delicate white flowers. The attractive bright glossy green leaves are heart-shaped and the growth of vine will run 25 to 40 feet in a season. It is perfectly hardy, the stem dying down in Winter, but growing with great rapidity in the Spring.

CULTURE. The long, tuberous roots may be planted at any time during the Spring, placing them in an upright position and deep enough so that the eye or sprout is covered with two inches of soil. They will thrive in any soil. **Large Select Roots 3 for 30c; \$1.00 per doz. postpaid.**

GLOXINIAS

These showy plants make excellent house plants and flower profusely during May and June.

CULTURE. Gloxinias are not difficult to grow and they will flourish luxuriantly in a soil of one part loam, one part leaf mold and one part sharp sand with a sprinkling of fine bone meal. Plant in 4-inch pots, being sure to give the best of drainage. Place in a warm window and keep moderately moist, but do not water to excess. Be careful to keep water off the leaves and to shade the plants from direct sunlight as the season advances. **In Mixture Only. 35c each; 3 for 90c; \$3.25 per doz. postpaid.**

MONTBRETIAS

One of the brightest of our summer-flowering bulbs that should be planted extensively. The growth and habit of the plant, as well as the flowers, somewhat resembles a small Gladiolus. The gayly colored flowers are in shades of yellow, salmon, orange and scarlet.

CULTURE. They are easily grown and should be planted early in the Spring, choosing a warm, sunny location. Plant them 3 to 6 inches apart, 4 inches deep, in clumps of a dozen or more. They are hardy if given the protection of a good covering of leaves or litter. **Mixed Hybrids. 3 for 25c; 75c per doz.; \$4.50 per 100 postpaid.**

Buist's Prize

Potash-Fed

Dahlias

THE ease with which the garden lover can successfully grow Dahlias makes them very popular. Modern Dahlias have many admirers. Each year newly developed varieties in endless shades and combinations of colors are recognized and we offer those having the most merit.

Our Dahlias are Potash-Fed, which makes the best tuber development, resulting in the strongest plant growth and bloom.

CULTURE. Dahlias will grow in any good soil, but do best in a light loam or sandy loam. Prepare the ground by deep digging and use well-rotted manure, bone meal and a top dressing of lime. After the ground is warm plant the tubers on their side with eyes pointing upward, setting them 3 inches deep and 3 feet apart. Watering is unnecessary, but frequent cultivation is desirable. Never allow the soil to crust and cultivate after rain. When plants are 6 to 8 inches high, pinch out the center shoot to induce branching.

In the Fall, after plants are blackened by the first frost, cut the tops off, lift the tubers carefully with a digging fork and let them dry out for a few hours. Then store in a cool frost-proof cellar or shed, until the Spring. To prevent shriveling, cover with dry sand or soil.

BUIST'S COLOSSAL DAHLIAS

FD., Formal Decorative; ID., Informal Decorative

Colossal Dahlias are a selection of the outstanding and more recent Dahlia introductions selected from the Decorative types. The flowers are giant in size and perfect of form carried on strong stiff stems. They are vigorous, healthy growers, free flowering and highly effective for display in the garden, cutting for house decoration, and for exhibition work.

Cavalcade. FD., Bloom 8 x 5 ins., Bush 5½ ft. Resembles Jersey Beauty; larger in diameter and three shades darker. A rich, deep rose with tones of rosy magenta. Has won many prizes.....**75c each**

City of Cleveland. ID., Bloom 10 x 5 ins., Bush 4½ ft. Flowers are of artistic form in a rich bright orange suffused scarlet.....**75c each**

Colossal Dahlia Robert Emmett

POMPON OR BABY DAHLIAS

These dainty little Dahlias are a miniature form of the Ball type. The flowers are under 2 inches in diameter and the plants are small, of branching type, 2½ to 3½ ft. in height producing an endless profusion of flowers. They are splendid cut flowers for the home particularly for table where the size and daintiness makes them most appealing.

Aimee. Orange with rich apricot shading.

Bob-White. Milk white, with a east of yellow.

Eureka. Variegated, predominant yellow with earmine shadings.

Goldilocks. Pure gold deepening at center.

Helen Anita. Lilae with white center.

Little David. Russet orange.

Little Edith. Primrose-yellow, tipped bright earmine.

Snowclad. A popular pure white.

Sunny Daybreak. Lemon yellow, tipped cardinal.

Yellow Gem. Clear canary yellow.

Any of the above: **25c each; \$2.50 per doz.**

Collection: One each Pompon, value \$2.50 for **\$2.00.**

MINIATURE DAHLIAS

These little gems are excellent for the garden and yield an abundance of cut flowers for house and for basket arrangements. Blooms 3 to 4 ins. Bushes 2½ to 4½ ft.

Baby Beauty. Violet rose, shaded bright rose pink.

Baby Royal. Salmon-pink, shaded apricot.

Jean. Apricot-buff, suffused lilae-rose.

Little Jewel. Peach blossom pink.

Paddy. Flesh-suffused with rose.

Sanhican's Sweetheart. Yellow, apricot shade.

Any of the above: **35c each; \$3.35 per doz.**

Collection: One each Miniature, value \$2.10 for **\$1.65.**

Decorative Dahlia—Josephine

CACTUS DAHLIAS

C., Straight Cactus; IC., Incurved Cactus;
SC., Semi-Cactus.

These have long pointed petals which in some varieties are straight and in others incurved. Included in this class are semi-cactus, having broad petals at their base, but recurved at the tips, giving them a pointed appearance. The varieties listed below are all well-shaped flowers held erect on long, stiff stems. They are excellent cut flowers and splendid for garden decoration.

Dorcas Ann. SC. Bloom 7 x 5 ins., Bush 4½ ft. A beautiful rose pink shading to creamy white at center. Flowering habits are ideal.....**50c each**

Ella May. C. Bloom 7 x 5 ins., Bush 5 ft. Attractive for landscape work. Color deep crimson, rich and distinctive**50c each**

Lilac Glory. IC. Bloom 6 x 2½ ins., Bush 4½ ft. One of the prettiest Cactus Dahlias, blooms early and continuously. Color soft violet rose with silver shadings**50c each**

Jersey Dainty. C. Bloom 7 x 3 ins., Bush 5 ft. Almost pure white, faintly tinged lavender. An excellent variety for exhibition purposes—good for cutting.**75c each**

Ambassador. C. Bloom 8 x 4 ins., Bush 5 ft. Produces fine exhibition blooms. Color soft yellow buff, shaded salmon-pink**50c each**

Miss Elsie Jane. SC. Bloom 6 x 4 ins., Bush 5 ft. An artistically formed dahlia—a beauty. Shrimp pink with cream shadings at center and tipped violet rose.**75c each**

Alice Whittier. SC. Bloom 10 x 5 ins., Bush 6 ft. One of the most popular of the old varieties, color prim-rose-yellow.**35c each**

Carla. SC. Bloom 4½ x 2 ins., Bush 4 ft. A profuse, continuous bloomer. Color buff, heavily shaded old rose and suffused violet rose.....**25c each**

Collection: One each of Cactus, value \$4.10 for **\$3.25.**

All Dahlia Prices Are Postpaid

Dwarf Bedding Dahlia Seed—See Page 99

Growing Dahlias from seed is very interesting. The dwarf type embraces a most charming and wide range of colors, easy to grow, graceful for cutting, and blooms from July until killed by frost.

*We can supply many Dahlia roots not listed.
Let us quote your list of specials.*

Buist's Superb Gladiolus

The Long Lasting Cut Flower

GLADIOLUS are the most popular of all the Summer-blooming bulbs. Their charm and wealth of color are enjoyed in any garden. Plant them in borders, solid beds and among shrubbery. For cut flowers they are unexcelled. In cutting it is best to cut the spike when the first flower opens. The balance of buds will develop when placed in water and thus prolong the blooming period.

CULTURE. They can be grown with very little effort, as they thrive well in all ordinary garden soils in any sunny, airy location. Plant the bulbs, top up, 4 inches deep and at least 6 inches apart as early in the Spring as the ground is fit to work. A continuous succession of flowers may be enjoyed until frost by successive plantings every two weeks until late June. Gladiolus appreciate plenty of moisture and thorough cultivation during the growing season. Lift the bulbs in the fall after the foliage begins to turn color and dies down; allow them to dry in the sun, then separate the useless old bulb and dead foliage from the new bulb. Store the new bulb in a cool dry frost-proof place until time for Spring planting. To control Gladiolus thrips, spray regularly with Nicotine Pyrox.

Albania. A lovely pure white. Large flowers and a very free bloomer.

America. Very light pink, exquisitely tinted with lavender. A magnificent popular variety.

Carmine Sylva. Large snow-white flowers on perfectly straight, tall stems. A beauty.

Crimson Glow. Well named, the color being a glowing crimson scarlet.

Giant Nymph. A giant flowered light rose-pink with creamy yellow throat. Tall stately spikes.

Golden Dream. Deep golden yellow flowers on long stems. A splendid variety.

Halley. Large salmon-pink flowers with cream throat. A very early and dependable variety.

Mrs. Francis King. Immense flowers of a most beautiful flame scarlet with salmon shadings. One of the finest for cutting.

Mrs. Frank Pendleton. Lovely salmon-pink with rich maroon blotch on lower petals.

Wilbrink. Flesh pink with creamy white blotch on lower petals. A favorite variety for cutting.

Price: Any of the above Superb Gladiolus
Postpaid: 3 for 20c; 60c per dozen.
Not Prepaid, \$3.50 per 100.

Golden Dream Gladiolus

Five Outstanding Gladiolus

Betty Nuthall. The best late pink. Magnificent, large, coral-pink flowers with light orange throat.

Dr. F. E. Bennett. A large, brilliant fiery red. Admired by everyone.

Flaming Sword. The best red. Very early; deep, blood-red.

Picardy. The finest and the most outstanding pink known. Enormous blooms, seven to eight open at one time. Color a clear, soft, shrimp-pink without flecking.

Pride of Wanakah. A beautiful large, purplish-blue.

Price: Any of the above Outstanding Gladiolus
Postpaid, 3 for 25c; 75c per dozen.
Not Prepaid, \$4.00 per 100.

MADEIRA OR MEXICAN VINE

A beautiful and popular vine covering a large space in a short time. Very useful for porches and arbors because of its rapid growth and freedom from insects. The leaves are heart-shaped, thick, glossy and light green in color. Racemes of feathery white fragrant flowers are produced in profusion.

CULTURE. Plant any time during the Spring, placing them in an upright position and covering with two inches of soil. Protect with a covering of leaves or litter in the Winter. Large Strong Roots, 3 for 30c; \$1.00 per dozen, postpaid.

Plant Buist's Reliable Bulbs

TUBEROSES

Excelsior Double Pearl. Tuberose are one of our finest Summer-flowering bulbs. The flowers are waxy-white, double and highly fragrant. A single flower will perfume a room.

CULTURE. Plant in good rich loam when the ground is warm, selecting a sunny location. For early flowers start in pots indoors and for a succession of bloom, plant at intervals until the last of June.

Mammoth Bulbs

Postpaid, 3 for **25c**; **75c** per doz.

Not Prepaid, **65c** per doz.; **\$4.50** per 100.

Large Size Bulbs

Postpaid, 3 for **20c**; **60c** per doz.

Not Prepaid, **50c** per doz.; **\$3.50** per 100.

Summer-flowering Bulbs and Roots are mailed free at single and dozen prices. Larger quantities will be forwarded by Parcel Post, Express or Freight as directed, but at the purchaser's expense.

Lilium Auratum, "The Queen of Lilies"

HARDY OUTDOOR LILIES

For Spring Planting

Every garden should have a fair display of Lilies. Their graceful habits, wonderful beauty, fragrance and hardiness make them very valuable.

CULTURE. All Lilies should be planted from 6 to 8 inches deep, the Japanese varieties even 12 inches deep. The bulbs themselves should be surrounded by sand to facilitate drainage. No decomposed manure should come in contact with the bulb, but may be placed 4 to 6 inches underneath. All loose-petaled bulbs should be planted on their side instead of upright. Heavy fertilizing or cultivation is not necessary. However, they insist upon good drainage and heavy mulching. They like partial shade and appear best when planted in groups against a background of low shrubs or scattered through the perennial borders.

Regale Lily—Royal Lily of China

One of the most beautiful of all garden Lilies. Growing to a height of from 3 to 5 feet, it bears in July an abundance of immense, trumpet-shaped flowers deliciously scented. They are ivory white, shading to yellow in the center with a pink tinge in the outer edge. **35c** each; **\$3.50** per doz. Postpaid.

Japanese Lilies

Auratum. *The popular Golden Banded Lily from Japan.* Immense, fragrant flowers of pure white, spotted with crimson and striped through the center with golden yellow. It grows 3 to 5 feet high and bears five to twenty blooms during July and August.

Postpaid, Large Bulbs, **30c** each; **\$3.00** per doz.

Mammoth Bulbs, **35c** each; **\$3.50** per doz.

Speciosum Album. The best late flowering pure white hardy garden lily.

Grows 3 to 4 feet and blooms in August and September.

Postpaid, Large Bulbs, **35c** each; **\$3.50** per doz.

Mammoth Bulbs, **45c** each; **\$4.50** per doz.

Speciosum Rubrum or Roseum. An old garden favorite with rosy white blooms heavily spotted with rich crimson. Height 3 to 4 feet. Blooms in August and September.

Postpaid, Large Bulbs, **30c** each; **\$3.00** per doz.

Mammoth Bulbs, **40c** each; **\$4.00** per doz.

Tigrinum Splendens—Tiger Lily. Another popular lily with bright orange-red flowers spotted with black. As many as 25 flowers are borne on plants 4 to 5 feet high, blooming during July and August.

Postpaid, Choice Bulbs, **25c** each; **\$2.50** per doz.

Tuberose

Choice Roses for the Garden

Hybrid Tea Roses

127

THIS class embraces the most beautiful varieties of all Roses. They bloom from June to October. All have long-pointed buds on strong stems which make them valuable as cut flowers. The glossy foliage, gorgeous colors and lovely fragrance of the flowers make them a constant source of pleasure.

Plants we offer are specially selected stock of the best quality. They are strong two-year, field-grown plants and vigorous growers, blooming the first season they are planted. In the late Fall before the ground freezes, hill the soil about the plants as high as possible. Later, protect with a layer of light litter which will insure their safety during Winter.

FREE DELIVERY—All nursery stock shipped prepaid direct from our Nursery. No extras to irritate you when plants arrive. If your express office is different from your post office, please mention it.

AMI QUINARD. Tall plants with highly fragrant, black-crimson roses.

BETTY UPRICHARD. This lovely rose is one of the most popular garden varieties. Perfectly shaped, long pointed buds borne on long strong stems. A free bloomer with long lasting qualities when open. The buds are copper-red and open to a brilliant orange-carmine on outer petals with salmon reflexes. The fragrance is rich and spicy.

E. G. HILL. Beautiful long buds of perfect form. Vigorous, free flowering, producing flowers of a dazzling scarlet.

GRUSS AN TEPLITZ. The most profuse blooming crimson Rose in existence. Blooms in open clusters with the utmost freedom throughout the entire season. The color is a rich scarlet shading to a velvety crimson.

IVY MAY. A continuous bloomer having shapely buds which turn to delightful rose-pink flowers edged and based with amber-gold. Perfect for a corsage or bouquet.

JOANNA HILL. A splendid clear yellow rose with golden heart. Long pointed buds open to large, full, semi-double, attractive flowers.

JONKHEER J. L. MOCK. A gorgeous, very double, brilliant pink, shaded carmine-pink on the outside of the petals.

KAISERIN AUGUSTA VICTORIA. A very popular Rose of soft pearly white, tinted with lemon in the center.

MRS. CHARLES BELL. A splendid fragrant rose of light shell pink shaded salmon. Robust, healthy grower with excellent foliage.

Red Radiance

Souv. de Claudius Pernet

PRESIDENT HOOVER. A splendid combination of cerise-pink, flame, scarlet and yellow. Lovely buds and shapely blooms borne on long, strong stems. A vigorous grower with clean handsome foliage and blooming liberally throughout the entire season.

RADIANCE. One of the most gorgeous American sorts introduced. Grows sturdily and blooms profusely; in color a brilliant pink with salmon-pink and yellow shadings at the base of the petals.

RED RADIANCE. An even better Rose than its parent, Radiance, in habit, bearing big, globular flowers of deep rose-red on strong canes which are freely produced all Summer until frost. Foliage excellent.

SOUV. de CLAUDIUS PERNET. The most satisfactory yellow Rose ever produced. A vigorous grower, erect branching habit, long pointed buds carried on stiff stems. A sunflower-yellow color, deeper in the center, without any colors blending.

SUNBURST. Rich yellow double flowers of large size, borne singly on long stiff stems.

TALISMAN. Brilliant orange-red buds open to a large, high-pointed double bloom of glowing golden-yellow, stained with copper-red and orange-rose on the inside of the petal. A magnificent combination of colorings.

Hardy Climbing Roses

CLIMBING ROSES are popular everywhere and much in demand to beautify every garden. They are used for arbors, fences, pergolas, Summer houses, terraces, screening unsightly views; in fact, they are a source of comfort to the home owner. Fragrant, hardy, quick-growing, permanent and easily pruned, they will find a place in every garden. In the Spring, cut out old or dead wood and shorten the laterals and long shoots to make the growth conform to the space to be covered. A severe pruning in July, after they have finished blooming, is beneficial. This will encourage a vigorous growth which will give an abundance of flowers the next season.

CLIMBING AMERICAN BEAUTY. Of the same color and fragrance as the popular variety whose name it bears. Free flowering and an early bloomer, flowers being borne either singly or in clusters of three.

Silver Moon

DR. W. VAN FLEET. A Rose which on account of its dainty color and exquisitely shaped buds and flowers has become a great favorite. The long pointed buds are rich flesh pink, carried on stems 12 to 18 inches long. Splendid for cutting. A strong, vigorous grower.

DOROTHY PERKINS. The ideal pink rambler, flowering profusely in large clusters; very fragrant and lasting.

EXCELSA (Red Dorothy Perkins). Radiant blood-red clusters fairly covering the vigorous vines. An improvement on the old Crimson Rambler.

GARDENIA. A very strong grower with beautiful glossy foliage. The buds are bright yellow, turning to waxy white when expanded.

PAUL'S SCARLET CLIMBER. The most popular red-flowered climber of the day. No other Rose in any class can compare with it for brilliancy of color. The semi-double flowers are large, well shaped and a vivid scarlet-red, retaining its color without fading longer than any other Rose.

SILVER MOON. Semi-double flowers beautifully cupped and pure white in color, with petals of great substance. The center has a large bunch of yellow stamens, making a wonderful contrast.

Fruits for the Home

GRAPES

Extra Strong Two-year-old Plants

CONCORD. The most popular variety in America. The vines are covered with bunches of large, black grapes juicy and sweet.

CATAWBA. One of the best standard varieties, responding quickly to good culture. Vines productive bearing large, long, broad clusters of dull purplish-red grapes.

Moore's Early. A good early sort with large black fruit.

Niagara. The best white grape ripening in mid-season. Flavor similar to the Concord.

Worden. Large black grapes similar, but ten days earlier than Concord.

Price: 30c each; 3 for 80c; 12 for \$2.75; 25 for \$5.00; 50 for \$9.50; 100 for \$18.00—delivered.

CACO. A cross between the Catawba and Concord. In quality it surpasses the luscious flavor of the Catawba, while it is as early and prolific as the Concord. The color is a rich wine-red. 60c each; 3 for \$1.70; 6 for \$3.00; 12 for \$5.00; 25 for \$10.00; 50 for \$19.00; 100 for \$36.00—delivered.

BLACKBERRIES

El Dorado. A fine, large berry, jet black, mild and sweet, melting in the mouth. 6 for 50c; 12 for \$1.00; 25 for \$1.75; 50 for \$3.00; 100 for \$5.75—delivered.

RASPBERRIES

Cumberland. Berries black, ripening in mid-season.

Latham. A standard red variety producing large berries during June and July.

St. Regis Everbearing. Here is a red-fruited variety that will continue to bear until freezing weather.

Price: 6 for 50c; 12 for 75c; 25 for \$1.25; 50 for \$2.25; 100 for \$4.25—delivered.

STRAWBERRIES

Premier. Very early, of good size and flavor.

Big Joe. A mid-season variety, large sweet fruit.

Dorsett. An early variety with large, firm berries.

Price: 25 for 65c; 50 for \$1.00; 100 for \$1.50; 250 for \$3.00; 500 for \$5.00; 1000 for \$9.00—delivered.

EVERBEARING STRAWBERRIES

MASTODON. The largest, tastiest and heaviest yielding of all the Everbearing varieties. It yields beautiful red, firm fruit from June to frost. 25 for 75c; 50 for \$1.25; 100 for \$2.00; 250 for \$3.75; 500 for \$6.50; 1000 for \$12.00—delivered.

Insect and Blight Destroyers

129

Directions for using will be found on each package.

Prices Subject to Change Without Notice

ANT KILLER (Powder). Very effective for the destruction of ants on lawns, golf courses, etc. 4½-oz. cans, 50c.

ARSENATE OF LEAD (Powder). Produced under a new process containing a greater percentage of Arsenic Oxide than required by the U. S. laws. It mixes easier and sticks better than any other brand. Dilute 1 to 50. ½ lb., 20c; 1 lb., 35c; 4 lbs., \$1.00; 24-lb. bag, \$5.00.

Spray

"Black Leaf 40"

40% Nicotine

"Black Leaf 40" is a concentration of Nicotine Sulphate and is guaranteed to contain not less than 40% of nicotine by weight. It destroys aphids (plant lice), thrip, leaf hoppers and similar insect pests. May be combined with other sprays. Recommended for delousing poultry. 1 oz. bottle, 35c, makes 5 to 10 gallons; 5 oz., \$1.00; 1 lb., \$2.25; 2 lbs., \$3.25; 5 lbs., \$5.85; 10 lbs., \$10.60.

BORDO-LEAD (Pestroy) (Powdered). A combination of arsenate of lead and Bordeaux mixture. It sticks to the foliage. ½ lb., 15c; 1 lb., 30c.

BORDEAUX MIXTURE (Powder). Can be used dry or as a spray; when used as a spray, dilute 1 to 8. 1 lb., 35c; 4 lbs., \$1.00.

CALCIUM ARSENATE (Powder). For spraying and dusting potatoes. 1 lb., 25c.

CALCIUM CASENATE (Powder). Used as a spreader to mix with other insecticides which do not mix readily. 1 lb., 25c; 2 lbs., 45c; 5 lbs., \$1.00.

FISH OIL SOAP. An effectual remedy for destroying and preventing insects on plants, trees, vines, etc., and for washing down the bark of fruit trees, grape vines, etc. 1 lb., 35c; 5 lbs., \$1.25.

GRAPE-AND ROSE DUST. A very effective remedy for mildew and other fungus diseases. 1 lb., 35c; 5 lbs., \$1.25.

HELLEBORE (Powder). For destroying rose slugs, currant and cabbage worms. ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.

JAPTOX (Powder). An improved material that kills and repels Japanese Beetles. A real protection to the foliage against the ravenous feeding of those pests. 1 lb., 50c; 2 lbs., 85c; 8 lbs., \$3.00.

LEMON OIL. For destroying scale, caterpillar, mealy bug, etc. Dilute with 10 parts water. ½ pt., 30c; pt., 50c.

LIME AND SULPHUR SOLUTION. A perfect remedy for San Jose scale and all other fungus diseases. One gallon makes ten. When used in Summer, dilute 1 to 30. 1 qt., 45c; 1 gal., \$1.00; 5 gals., \$3.75.

LIME SULPHUR (Dry). A very effective remedy for San Jose scale and other fungus diseases. Has all the effectiveness of liquid lime sulphur and is much easier to handle. 1 pound to 5 gallons of water. 1 lb., 35c; 5 lbs., \$1.40; 25 lbs., \$4.00.

MEXICAN BEAN BEETLE DESTROYER. Formula based on recommendations of U. S. Dept. of Agriculture, contains Magnesium Arsenate. A wonderful smooth powder that can be dusted on plants or quickly made into a wet spray by the addition of water. No danger of burning. 1 lb., 35c; 4 lbs., \$1.00.

Nicotine Pyrox

The best and safest all-around combined insecticide and fungicide spray. Kills both chewing and sucking insects. Controls blight and other plant diseases. 17.6 ozs., 50c; 5 lbs., \$1.75.

PARIS GREEN (Powder). For destroying potato bugs. Effective against all chewing insects. ¼ lb., 20c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.

P. T. B. (Para Dichlorobenzene). For peach tree borers. Use only in August and September. 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.50.

PYROTE

Double acting, concentrated Pyrethrum Rotenone spray for flowers, fruits, vegetables and plants. The ideal insecticide for the home gardener. Can be used effectively to control all types of insects. Dilute with water. 1 oz., 35c; 6 ozs., \$1.00; 1 pint, \$2.00; 1 quart, \$3.50.

RED ARROW. A highly concentrated extract of Pyrethrum combined with a special soap. Kills sucking and chewing insects, such as Mexican Bean Beetle, Aphids, Thrip, Rose Bug, Red Spider, etc. Use 1 oz. to 3 gallons of water. Per oz., 35c; 4 ozs., \$1.00; 1 pt., \$2.70; 1 qt., \$4.80.

ROTENONE. An effective dust containing 75% Rotenone. Controls Mexican Bean Beetle, beetles on asparagus and cucumber; also leaf hoppers, caterpillars, chinch bugs, red spiders, cabbage worms and thrips. 1 lb., 30c; 5 lbs., \$1.25; 25 lbs., \$6.00.

SLUG SHOT (Powder). Requires no mixing or preparation, easily applied and not injurious to animals, the person applying it, or fruits and vegetables treated. Very effectual in destroying potato bugs and the Mexican bean beetle, green flies, slugs, worms, etc. 1 lb., canister, 25c; 5 lbs., canister, \$1.00.

STANLEY'S CROW REPELLENT. Acts as a repellent to seed pulling birds and rodents.
½ pint, enough for 1 bu. seed.....\$0.60
1 pint, enough for 2 bus. seed..... 1.00
1 quart, enough for 4 bus. seed..... 1.75

SULPHUR POWDER. For mildew. Lb., 10c; 5 lbs., 40c; 10 lbs., 80c; 50 lbs., \$3.75; 100 lbs., \$7.00.

SULROTE (Powder). Rotenone and Sulphur combined, contains 80% rotenone, especially recommended for control of Mexican Bean Beetles. Also effective against leaf hoppers, caterpillars, chinch bugs and gladiolus thrips. 1 lb., 40c; 5 lbs., \$1.25.

SUNOCO SPRAY OIL. For the control of scale insects, red spider, aphids, thrip, etc. 1 gal., \$1.25; 5 gals., \$5.00.

TREE TANGLEFOOT. A sticky compound for painting around the trunks of trees to protect them from all creeping insects. 6 oz. can, 35c; lb., 70c; 5 lbs., \$3.25; 10 lbs., \$6.25.

TOBACCO DUST. For dusting only. Excellent for Lettuce and other plants to destroy soft, creeping insects. Lb., 10c; 5 lbs., 30c; 10 lbs., 50c; 25 lbs., \$1.00; 100 lbs., \$3.25.

WEED KILLER. Kills all plant growth. A labor-saver used on paths, drives, gutters and places where growth is not wanted. Dilute 1 part with 40 quarts of water. One gallon sufficient to cover 150 sq. yds. 1 qt., 45c; 1 gal., \$1.50; 5 gals., \$6.00; 30 gals., \$28.00.

130

Fertilizer and Garden Requisites

Prices Subject to Change Without Notice

BUIST'S LAWN ENRICHER. As a fertilizer or dressing for inducing a rapid and luxuriant growth of grass it cannot be excelled. It is dependable as it contains all the essential elements grass requires. Lawns should be top-dressed twice a year, once before the new Spring growth commences and again in the Fall before active growth stops. This will induce a deep, thick root growth which will enable the lawn to withstand the hot, dry months. Broadcast at the rate of 600 lbs. per acre. 5 lbs. per 250 square feet. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.10; 50 lbs., \$2.00; 100 lbs., \$3.50; sack of 200 lbs., \$6.00; ton, \$50.00.

BOVUNG. A natural cow manure, containing 75% organic matter, dehydrated and well pulverized. Entirely free of dirt and weed seeds. It is ideal for use on the lawn, flower garden and house plants. Apply 10 lbs. per 100 square feet. 4 lbs., 25c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.50; 100 lbs., \$2.75.

BUIST'S PURE BONE MEAL. Excellent for top-dressing lawns, the beneficial results can be noted for a long time. A very desirable fertilizer for roses, flowering shrubs, fruit bushes and trees. Apply 800 to 1000 lbs. per acre, 5 lbs. for every 200 square feet. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.00; 50 lbs., \$1.75; 100 lbs., \$3.25; 200-lb. sack, \$6.00; ton, \$52.00.

GRAFTING WAX. ¼ lb., 20c; ½ lb., 30c; lb., 50c.

HARDWOOD ASHES. For use on lawns, orchards or plants requiring an alkaline soil. Apply late in Fall or early Spring so that rains and snow leach the ashes and carry the nourishment to the roots. Apply 2000 pounds per acre. 5 lbs. per 100 square feet. 5 lbs., 25c; 10 lbs., 40c; 25 lbs., 75c; 100 lbs., \$2.50; 200 lbs., \$4.00; ton, \$35.00.

HUMUS HYPER (Pulverized). A natural organic substance of deposits of decomposed vegetable matter that has been accumulating for years. Hyper Humus loosens heavy clayey soils and promotes aeration. It increases the moisture absorbing power of light sandy soils. Garden crops, flowers, vegetables and lawns all respond to liberal applications. It is absolutely odorless. 5 lbs., 30c; 10 lbs., 50c; 25 lbs., 75c; 50 lbs., \$1.25; 100 lbs., \$2.00; 500 lbs., \$9.00; 1000 lbs., \$14.00; 2000 lbs. (1 ton), \$25.00.

NITRATE OF SODA. A valuable fertilizer. Apply 150 to 200 lbs. per acre, 1 lb. per 200 square feet, but not until the plants are above ground. If used in liquid form, dilute two ounces to one gallon of water and apply twice a week. Do not let nitrate touch green growth or it will burn. 2 lbs., 20c; 5 lbs., 35c; 10 lbs., 65c; 25 lbs., \$1.10; 50 lbs., \$1.85; 100 lbs., \$3.25; 200 lbs., \$6.00; ton, \$55.00.

LIME (Hydrated or Powdered). An indirect fertilizer that liberates plant food already in the soil. Makes sour soil sweet and heavy soil light. Promotes growth and gives the lawn a rich color. 10 lbs. to 200 square feet, or 1 ton to acre. 10 lbs., 25c; 50 lbs., 85c; 100 lbs., \$1.40; 500 lbs., \$6.50; ton, \$22.00.

MURIATE OF POTASH. Should be used on all root crops. Potatoes, beets, turnips require a liberal proportion of potash in order to develop properly. 1 lb. per 200 square feet, 150 to 200 lbs. per acre. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.25; 50 lbs., \$2.25; 100 lbs., \$3.50; 200 lbs., \$6.50; ton, \$60.00.

PEAT MOSS. A moisture retaining humus, an important aid in saving soil fertility. Prevents the formation of hard crusts and fungus growth. Excellent for mulching Perennial and Rose beds as well as around Evergreens. ¼ size bales, \$1.50; ½ size, \$2.25; large bales, about 150 lbs., \$3.50; 5 bales, \$3.25 per bale.

PHOSPHATE (16% Acid Phosphate). For all vegetable crops, grains, etc. Apply 800 lbs. per acre. 5 lbs. per 200 square feet, 5 lbs., 25c; 10 lbs., 40c; 25 lbs., 90c; 50 lbs., \$1.35; 100 lbs., \$2.00; 200 lbs., \$3.25.

POTATO AND TRUCK SPECIAL (Garden Fertilizer). Contains all the food elements needed by vegetables for their quick growth, early maturity and perfect development. Vegetables fed with a complete, high grade fertilizer mature quicker and are finer flavored. Apply before harrowing or raking, at the rate of 10 lbs. per 200 square feet, 1 ton per acre. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.00; 100 lbs., \$3.00; 200 lbs., \$5.00; ton, \$45.00.

SALT, AGRICULTURAL. Used upon Asparagus beds, walks and roads for killing weeds. 25 lbs., 60c; 50 lbs., \$1.00; 100 lbs., \$1.75; 500 lbs., \$7.50.

SULPHATE OF ALUMINUM. Gives the soil the acidity necessary for the successful culture of Azaleas, Laurel, Rhododendrons and similar plants. Apply 1 lb. per 10 square feet. 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00.

SULPHATE OF AMMONIA. A nitrogenous plant-stimulant, very quick in action. Used on lawns as a stimulant and to discourage weed growth. 1 lb. to 150 sq. ft., or 300 lbs. per acre. 5 lbs., 40c; 10 lbs., 70c; 25 lbs., \$1.25; 100 lbs., \$3.25.

STIM-©-PLANT

A highly concentrated plant food in tablet form used to stimulate and produce far more beautiful flowers, fruit, vegetables, evergreens and all potted plants. Per pkg. of 30 tablets, 25c; 100 tablets, 75c; 500 tablets, \$2.50; 1000 tablets, \$3.50.

Wizard Brand—Sheep and Cow Manure 131

STERILIZED

CONCENTRATED

WEEDLESS

*Whether you purchase
Sheep or Cow Manure
be sure you get Wizard*

Wizard is pure, free from straw and rubbish, highly concentrated and sterilized to kill all weed seeds. All growing plants take essential foods and humus from your soil each year. Replace and enrich in nature's way—with the safest and most effective applications of Wizard. Easy to use and does not burn.

Will make your Lawn and Garden Thrive

How to Use Wizard Sheep Manure

Apply same method for Cow Manure

FOR LAWNS. Wizard produces thick, velvety, green lawns supplying humus and natural plant food so necessary to feed the millions of grass plants. Apply 10 lbs. to 100 sq. ft. and rake into the surface. Scatter Wizard just as you would sow seed.

FLOWER GARDEN—SHRUBBERY. Promotes luxuriant green foliage and a wealth of vivid colored flowers. Mix a handful with the soil under each new plant. Larger amounts for shrubs and trees. On established plants 10 lbs. to 100 sq. ft. raked into the surface soil.

VEGETABLES AND FRUITS. There is nothing better than manure to build up the soil and produce profitable crops. Wizard is a practical fertilizer in a highly concentrated form. Use 10 lbs. to 100 sq. ft., 1000 to 1500 lbs. per acre.

FLORISTS—HOUSE PLANTS. Florists have used Wizard for nearly thirty years. For potting soil use one pound of manure with twelve parts of soil. For liquid manure mix one pound of manure in five gallons of water. Use twice weekly.

VIGORO

Complete plant food

For Lawns, Gardens,
Flowers, Shrubbery,
Trees

For Gardening Success

Scientifically balanced and complete, VIGORO is a specially prepared plantfood. It contains all the elements necessary to grow richly colored flowers, velvety lawns, succulent vegetables, luxuriant shrubbery, and healthy trees.

VIGORO is odorless and clean. It can be applied by hand just like grass seed. Can be used on everything you grow.

Complete directions for applying VIGORO for all plants are contained in every bag. VIGORO should be used at the rate of four pounds per 100 square feet (10 ft. x 10 ft.) in the spring and fall. Use one-half this amount for summer feeding.

By R. L. Watts and G. S. Watts. A thorough, understandable, complete guide for the commercial grower. Profusely illustrated. 600 pages.....\$3.50

Monthly Calendar of Operations

SOUTHERN EDITION
of
Buist's Garden Guide
PLANTING DIRECTIONS

The active gardening months in the South are January to April and August to October. Monthly operations cannot be accurately given for the entire territory, but the following give suggestions of cropping about the period they should be attended to in latitudes South of North Carolina. Adaptation to various States can be observed by noting the conditions of the climate and season.

A chart of all the principal vegetable seeds will be found on page 143, giving proper planting depths and distances apart, seed required and weeks to maturity. Further detailed instructions are contained throughout our GARDEN GUIDE, alphabetically arranged, under the various varieties of both vegetable and flower seeds.

JANUARY

Frosts in the Southern States frequently destroy early gardens; but this is no reason why you should not try and have one, for if your early plantings are destroyed, you will then have ample time to re-seed. Remember, an early garden of one acre, if not damaged by frost, will produce more than a two-acre garden planted late; therefore, January should be an active month in Texas, Louisiana, Mississippi, Georgia, Alabama and Florida. If your hot-bed has not been already prepared, attend to it at once for the sowing of Early Tomatoes, Peppers, Egg Plants, Cauliflower and other early seeds.

Beets—As soon as the season will permit, sow the seed in drills, about 18 inches apart, very thinly and evenly, about 1 inch deep, and when thinned out should stand 3 or 4 inches apart. Sow BUIST's Extra Early, Perfect Model, Crosby's Egyptian, and Detroit Blood Turnip. During moist weather, the young plants of Beet can be as successfully transplanted as cabbage.

Carrots—Sow Scarlet Horn. BUIST's Improved Rubicon and Danvers Half-Long Scarlet.

Cabbage Seed—Set out plants that have wintered over in cold frames. Sow BUIST's Extra Early Jersey Wakefield, Charleston Wakefield, Copenhagen Market, BUIST's Prize Succession and BUIST's Improved Flat Dutch and Drumhead.

Cauliflower planted in the Autumn will commence heading, and should the weather be cold, give them a slight protection of straw or other covering. Sow Cauliflower in frames, to be transplanted next March.

Lettuce—Sow, also transplant from Winter beds. In order to produce crisp heads, Lettuce must be grown quickly. Therefore the soil must be of the richest nature. Select Big Boston, BUIST's Veribest Cabbage Head, Iceberg and New York or Wonderful.

Peas are a very important and a standard crop in every garden and must not be overlooked. Form the drills 3 feet apart and 2 inches deep, dropping the peas to stand about 2 inches apart. Cover up, and the moisture will at once vegetate the seed. As soon as up, hoe well, and keep clear of weeds; when they are about 1 foot high stake them. Plant BUIST's Early Morning Star. This variety is the earliest known, producing large crops of sweet and luscious Peas in 42 days. The Thomas Laxton,

Gradus, Laxtonian, Potlatch and Telephone are the cream of all wrinkled varieties. They produce large, well-filled pods of a luscious flavor.

Onion Sets—Plant as soon as the ground can be worked; one quart will plant a 50-foot row; use 8 to 10 bushels to the acre.

Onion Seed—Sow thickly for producing Onion Sets, and thinly for growing large-sized Onions. The soil for the latter cannot be too rich. The varieties for producing sets are Yellow Strasburg and White Silver Skin. For producing full-sized Onions the first year, sow the Red Wethersfield, Yellow Danvers, Yellow Prize-Taker, Mammoth White Silver King, and any of the Southport Globe varieties.

Parsley—Sow the BUIST'S Garnishing and Moss Curled—they are the best. The Single or plain-leaved, although not as desirable for garnishing, is more hardy and has a much stronger flavor.

Sow out of doors—Mustard, Leeks, Spinach, early varieties of Radish, Early Flat Dutch and BUIST'S Mammoth Purple Top Globe Turnip and Ruta Bagas.

Sow Egg Plant and Peppers in hot-bed.

Tomato—Sow in hot-beds BUIST'S Earli-Belle, New Monarch, Prize Belle, BUIST'S Market Champion, and Prize Stone (nothing equal to them).

FEBRUARY

This is really the gardening month of the South. Time lost now cannot be recovered. If the important hints suggested in the January operations have been taken advantage of, you are now ready for active duty, and have perfected your plans for the season. Those who started their hot-beds in December or January should have fine plants ready for planting from the cold frame; if well hardened off and weather settled they will start growing without a check. Transplanting to the open ground varies with locality. Cabbage, for instance, is not affected by cool nights, while Tomatoes and other tender plants would perish. We can lay down no definite rule for exact time of planting and sowing, owing to the changeable seasons. If the season is late, or your soil is cold and heavy, planting should be deferred. In all cases, when it is possible, use a spading fork around the roots in preference to a spade, "and remember it is useless to expect good crops from barren soil." Plenty of manure and muscle are the important levers required in raising profitable crops after sowing BUIST'S SEEDS. The following varieties are suitable for present planting:

Beet—Crosby's Egyptian, Early Eclipse, BUIST'S Extra Early, Detroit Blood Turnip, and do not overlook the BUIST'S Perfect Model. We advise those who have never raised the Swiss Chard to try it this season. This variety may truly be called "Cut and Come Again." The leaf stalks are prepared similar to Asparagus, and it is greatly preferred by many. It is a delightful dish.

Beans—Bush, or Snap-Shorts, in sheltered situations. Sow about the middle of the month the Early Red Valentine, Stringless Green Pod, BUIST'S Prolific Stringless, Bountiful, Best of All Wax and Dwarf Golden Wax. The Black Valentine is hardier than other green pods and withstands greater changes of weather. It is not liable to rust, but lacks quality when compared to others recommended.

Cauliflower—Transplant from frames. Although they are more successfully grown in forcing beds or frames, yet in many localities where the atmosphere is moist, they can be cultivated successfully as a garden crop. The most desirable varieties are the Early Erfurt, Early Snowball, Paris, and Danish Dry Weather.

Cabbage—Sow BUIST'S Improved Drumhead and Flat Dutch. These are the finest stocks of late Cabbage grown, and are always sure to produce fine large heads. They have been awarded as many as twenty-two premiums in one season. There is nothing equal to them. They are put up and sold only under our seal. Always select the strongest looking plants for your planting. If the Spring sowings of early varieties have not yet been set out from the hot-bed, attend to it at once.

Carrot—Sow Early Scarlet Horn, Half Long Scarlet, Scarlet Chantenay and BUIST'S Long Orange; the latter for main crop, either for garden or field culture. It produces very large, smooth roots.

Celery—Sow Easy Blanching, Winter King, Golden Self-Blanching, White Plume, and BUIST'S Golden Yellow.

Cress and Mustard—Sow for salad. They should be used together. Select the Mammoth Southern Curled Mustard. It is the best.

Cucumber—Plant in a sheltered situation. It is also desirable to plant a few seeds of the large English varieties in your hot-beds after the plants are removed, as they will come into bearing much earlier than those grown outdoors, and be of much finer quality. For out-door culture plant the Perfection White Spine and London Long Green. Transplant your Egg Plants and Tomatoes from frames; if not already attended to, and another sowing of the latter can be made for a later crop. Select the BUIST'S Earli-Belle, Majestic, Beauty, and Belle for this purpose, as no other varieties will please you as much.

Lettuce—Sow, and also transplant from Spring or Winter beds. The soil must be rich and grown quickly in order to produce crisp heads. Select Big Boston, Simpson, Hanson, BUIST'S "Veribest" and BUIST'S Unrivalled, and for sowing to come in late, select the Salamander and New York.

Onion Sets should be set out now or they will not form a bulb.

Parsnip—Sow. Should you have a surplus, feed them to your cattle, as they enjoy them.

Peppers—Transplant from frames.

Potatoes—Select and plant those grown in Eastern localities; they will always produce much finer Potatoes. We annually grow our stocks in Maine. Plant Houlton Early Rose, Extra Early Sunrise, Irish Cobblers, and Early Ohio; and for late or general crop, State of Maine and Green Mountain.

Radish—Continue sowing the red varieties up to the 20th; if sown later they are liable to grow spongy and shoot to seed without forming any root. White Strasburg, White Icicle and Chartier are the best for sowing the last of the month; they will be crisp and tender.

Salsify or Oyster Plant—Do not overlook sowing this important vegetable; it is annually becoming more popular. The BUIST'S Mammoth is the most desirable variety.

Spinach—Sow Perfection Curled and New Long Season.

Spring Turnips—Always sow as early as the weather permits. They require quick growth, otherwise they will be tough, spongy and useless.

Mangel Wurzel and Sugar Beets should be planted this month for stock food.

Sweet Potatoes—Plant in beds for sprouting.

If weather is mild a planting of Early Corn may be made. Plant Adams Early and BUIST'S Snowflake.

Sow another succession of Peas as advised last month.

MARCH

By carefully examining the directions given for February, you may find something that you have overlooked. If so, attend to it at once. The majority of vegetables having now been sown, and others transplanted in favorable situations, their proper cultivation and thinning out when too thick must have your attention. Examine your seed beds closely, and if any sowing has failed, re-seed at once. All plants in frames will require plenty of air and water, and gradually harden off before transplanting to the garden. All the more delicate seeds can be sown as both soil and atmosphere are mild and pleasant, and they will germinate freely.

Plant now all varieties of Bush and Pole Beans. The best variety of Snap Pole Beans for the South is the Kentucky Wonder, Crease Back and the Nancy Davis.

Lima or Butter Beans—Plant now, but bear in mind, unless the ground is warm they will not germinate, and it will be best to wait until end of month. Do not overlook planting the BUIST'S Ideal Pole Lima and Fordhook Bush Lima.

Beets—Sow; select the dark-blood varieties, such as Detroit Blood Turnip.

Cabbage—The late varieties can still be sown, if not attended to last month. The early sowings will be sufficiently large to plant out the last of this month. Select the largest and strongest plants. The small ones can be transplanted later for a succession.

Stock Beets—Such as Mangel Wurzel and Sugar, should now be sown for Winter feeding. It is impossible to overestimate the importance of this crop. Its yield is enormous (from 600 to 800 bushels to the acre) and its value to the farmer great. Select BUIST's Golden Globe if your soil is shallow; BUIST's Mammoth Long Red, Golden Tankard, Chirk Castle Mangel, and Danish Sludstrup, if your soil is deep and rich.

Carrot—Continue sowing the Half-Long Scarlet for table use, and BUIST's Long Orange for stock feeding.

Corn—Plant for first crop the Adams Early and Perkins Early Market; follow with Golden Bantam, Stowell's Evergreen and Country Gentleman. For green roasting ears. BUIST's Snowflake and Golden Dent are the favorites in the South.

Cucumber—Make a general planting. Select Perfection Early White Spine and BUIST's Long Green. If you wish only one sort, select the former, and make a small planting each month until August.

Kohl Rabi—Sow. This vegetable is a great favorite with the Germans, and if properly prepared for the table is fine.

Lettuce—Sow in rows, and thin out—Hubbard Market, New York and Salamander. The latter will give you heads 2 pounds in weight; is delicate and tender.

Melon—Plant BUIST's Perfection Rocky Ford, Emerald Gem and Fordhook. The latter is the finest of the yellow flesh varieties. For Watermelon, select the Tom Watson. Kleckley's Sweet, Halbert's Honey and Florida Favorite.

Parsnip—Sow early for general crop, and thin out last month's sowing.

Peas—Sown now should be planted deeper than usual to prevent dry weather from injuring their roots. A crop thus planted will produce more abundantly and continue in bearing longer. Select the wrinkled varieties.

Set out Egg Plants and Tomato Plants. Sow Tomato Seed for a late crop.

Give all the growing crops your attention. Just remember that good cultivation is almost as powerful a stimulant as manure. Beets, Carrots and other root crops sown last month will need your attention; they should be thinned out, cultivated and kept from weeds.

APRIL

The vegetable garden is now in its exuberance of growth; cultivate well, and look out for weeds. If you have sown BUIST's SEEDS, we know that you have met with success and have a luxuriant garden, and as the season advances you will have an opportunity to compare the product with the vegetables produced from inferior brands of seeds, which are scattered almost broadcast throughout the Southern States. Thin out all young crops to prevent crowding. Water when dry. Cauliflower requires copious watering at the roots when forming heads. Celery-seed beds and plants are also in need of water; if, however, labor and care are deficient, those vegetables will not make a return for planting, as soil can never be too rich for them. Where Beets are too thick, they can be transplanted; cut off the large thick leaves, lift carefully, and plant them in rows, or amongst other crops that are too thin; do this in moist weather.

Bush, or Snap-Short Beans—Plant every two weeks for a succession. The Best of All Wax, Green-Pod Stringless, Bountiful and Giant Stringless Green Pod, are the most desirable for Summer planting. If your Lima or Pole Beans have not come up satisfactorily you are still in time for replanting. It is always a good plan to start the Lima in cold frames or place them between sods, and transplant them, when sprouted, to prevent any such disappointment, as they will not withstand cold, moist weather.

The potato bug is now very industrious. He is a good feeder, but a far better propagator; therefore look out for him, and dust the foliage with a mixture of one-eighth

• **Paris green** to seven-eighths plaster, or a preparation called **Slug-shot**; these are really the only applications that will settle him.

Beets—Thin out those already sown and sow **Detroit Blood Turnip** for a succession. Young plants that are thinned out can, during moist weather, be successfully transplanted. If you are growing **Mangel Wurzel** for your stock this season, give them every attention. Thin out, and keep thoroughly cultivated; with a little care and good treatment, their growth will astonish you.

Cabbage—Transplant last month's sowings, which will head in September and October.

Cucumber—Sow again for succession the **Perfection White Spine** and **BUIST'S Long Green**. Those for early picklings can be planted the last of the month. Select the **Jersey Pickle** for this purpose.

Sugar Corn—Plant every two weeks for a succession. Select the **Country Gentleman**, **Mammoth** and **Stowell's Evergreen Sugar**.

Endive—Sow for transplanting for Fall use.

Leek—Transplant or thin out; transplanting will always produce the finest and largest.

Melon—Plant **BUIST'S Selected Rocky Ford**, **Fordhook**, **Eden Gem** and **Hackensack**.

Watermelons—Select **Tom Watson**, **Kleckley Sweet**, **Irish Gray**, **Stone Mountain**, and **Georgia Rattlesnake**.

Okra—Sow **Perkins' Mammoth Podded**, **BUIST'S Dwarf** and **White Velvet**.

Squash can still be planted. Tomato vines should always be trained to trellises, as they will produce much finer fruit and crop more abundantly; if they grow too strong pinch off the points of shoots.

About the last of the month sow **BUIST'S Improved Late Flat Dutch** and **LATE Drumhead**, **BUIST'S Florida Header** and **Drumhead Savoy Cabbage**, for June planting, to head in Fall; these varieties will always produce fine heads in the South. At this season of the year the small cabbage-fly is very destructive to the young plants, and frequently destroys them as fast as they make their appearance above ground; always keep them well dusted with plaster, or apply strong tobacco-water until they are sufficiently large to withstand such attacks.

Spring-sown Cabbage is now ready for transplanting, the soil for their culture must be rich to insure fine heads. Sow **Celery** for main crop, hill up **Potatoes** and keep them well cultivated. Train the **Lima Bean** vines to poles, and stake all **Peas** planted last month. Do not neglect your **Asparagus** bed; keep it well cultivated and loosened with a hoe until the shoots commence appearing.

MAY

We now fully repeat the observations of last month; the warm season is approaching, when many of the crops cease growing. Fresh and young crops from the second or third sowing will continue to grow whenever moisture is supplied. Irrigation and good cultivation is the whole secret in successful culture in warm, dry climates. Sweet Potato sprouts for a late crop should be planted; these tubers, prepared in every variety of cooking, are a grateful dish on our table three times a day.

Plant **Snap-short** and **Pole Beans** for a succession; sow **Late Cabbage** for Winter heading; also **Cauliflower**; sow **Salamander Lettuce**—it is the only variety that will now stand the heat without shooting to seed. Sow **White Strasburg Radish**. **Melons**, **Cucumbers** and **Squashes** may still be planted for a succession.

Corn—For late roasting ears, can be planted in the early part and also last of the month.

Okra can still be sown.

Plant "**Nancy Davis**" **Cornfield Bean** among your **Corn**; they will bear until frost and do not become tough or shucky.

JUNE

The gardener of the South and the garden amateur have much to reflect upon in this glorious month of bearable sunshine. Renew all crops as advised in preceding month; plant Snap-short Beans; look over Melons, Cucumbers and Squashes; destroy bugs and every other enemy; weeds abhor with the vengeance of destruction. Stir up the soil to keep in moisture, and allow the air and dew to penetrate; all will assist to keep the growing life in crops. Transplant Cauliflower, BUIST's Drumhead, Flat Dutch, Florida Header and Drumhead Savoy Cabbage, which must be liberally supplied with water.

Pole Beans can still be planted. Select the Kentucky Wonder and Crease Back, as they stand the heat better than other sorts.

Ruta Baga Turnip—Sow from the 20th of this month to the last of July; there is nothing superior in the vegetable line for Winter feeding. With fair culture they will produce immense crops, and we cannot prevail too urgently upon the farmer the great importance of extending their culture. They are not only profitable but invaluable to all agriculturists, being relished by all kinds of stock. Sow BUIST's Improved Purple Top Yellow; it is the largest growing variety, producing the finest formed roots, and will be found superior to any other stock in this country. The Turnip Fly is very destructive to this crop, and frequently eats off the young plants as fast as they make their appearance. Watch the crop and dust with plaster.

JULY

If there is any month in the twelve where there may be some cessation of labor by the gardener of the South, it is July—ground is dry, atmosphere hot. Seeds may be sown, but they do not vegetate; weeds, however, grow, and they must be kept under. Snap Beans will grow, and plant them for succession; water Celery or mulch it. One of the most valuable crops for the South should be sown—the Ruta Baga Turnip. If you have not been successful in securing a stand of young plants you will have ample time for re-seeding; therefore, take advantage of moist weather, if possible, and sow Ruta Bagas, as they require a longer season to mature than Turnips. Plant Cucumber for September use, or for pickling purposes; transplant Cabbage after a shower; prepare ground for crops to be planted in August; sow Squash, Spinach, Sugar Corn and also a full supply of Turnips, as there is no variety of vegetable you can raise that is more valuable or more profitable.

The turnip fly is a very destructive insect. Examine closely, and if they are discovered, dust with plaster.

Beet—Keep well thinned and thoroughly clear of weeds. The foliage of young Beets is an excellent substitute for Spinach.

Cabbage—Sow BUIST's Late Flat Dutch, BUIST's Late Drumhead, BUIST's Florida Header, Louisville Drumhead, Surehead, Danish Ball Head, and Drumhead Savoy Cabbage. Plants raised this month and set out in September make the best Cabbage, as they are generally headed by the time heavy frosts come on. We highly recommend BUIST's Florida Header and the BUIST's Flat Dutch and Drumhead, as they are always sure to produce fine, large, solid heads in any section of the South.

Corn—Plant Country Gentleman, Mammoth Sugar and Evergreen Sugar for a succession.

Cucumbers—Plant the Jersey Pickle for pickling purposes.

Egg Plant—An occasional watering of liquid manure or soap-suds greatly facilitates their growth, and if the weather is dry, mulching the plants with cut grass will be of great advantage.

Turnips—A portion of your sowings should be made the last of the month, just before or after rain. The Red or White Flat Strap-leaved are the best flat varieties; but BUIST's Mammoth Red Top White Globe is the best of all; sow it, it will please you. They are of the earliest culture, and are generally sown broadcast. To those who desire

to cultivate a choice Yellow Turnip, we strongly recommend the Yellow Globe for field culture, or the Golden Ball for the garden. The former should be grown in drills, and the latter broadcast.

AUGUST

This is the most active of the late months in the South, and many vegetable seeds can now be sown that will crop before frost. Turnip and Ruta Baga are valuable crops that require little attention after preparing the ground and sowing the seed, and they supply nutritious food for both man and beast during the Fall and Winter months. If the destructive turnip fly appears dust with land plaster and if this does not save the young plants reseed immediately. They are safe after the first rough leaf appears. Buy your seed from **BUIST**, as we specialize in American Seed grown from transplanted and selected roots.

Beets—Sow Perfect Model, Detroit Blood Turnip, Half-Long Blood, and **BUIST's** Long Blood, all very desirable for Fall and Winter.

Plant—Bush Beans, Carrots, Celery, Chevril, Endive, Kale, Kohl Rabi, Mustard, and Parsley.

Cauliflower—Sow Large Algiers and Autumn Giant, they are surer to head than other sorts sown in the Fall.

Cabbage—Sow **BUIST's** Flat Dutch and Florida Header, **BUIST's** Prize Succession, All Head Early and Surehead.

Celery—Set out for your main crop. Cut off the tops to within 2 or 3 inches of the crown of the plant before planting.

Turnip—Sowings should be completed on all globe varieties, such as Mammoth Purple Top Globe, Pomeranian White Globe, Yellow and Amber Globe and Purple Top Yellow Aberdeen. The best of all the globe varieties is the **BUIST's** Mammoth Purple Top Globe, which is a sure cropper of very rapid growth.

Sow—Seven Top and Southern Prize Turnips for "Greens." They are known as Winter Turnips, being the hardiest of all varieties and may be left standing in the open ground all winter as far north as Philadelphia.

SEPTEMBER

Activity must prevail in the garden this month; it is really the beginning of the vegetable year in the "Sunny South."

Remember, good, clean, deep, rich ground and **Buist's Seeds** are the foundation for a successful garden. Seeds, like individuals, have their peculiarities and different natures, and to know the nature of the various varieties is one of the principles of successful gardening. It has been **our** aim to supply only Seeds of the Highest Grade. This system has made **Buist's Seeds** the most reliable and satisfactory.

Beans—Dwarf or Bush varieties may be planted in Georgia, Alabama, Louisiana, Mississippi and Texas, as the chances are they will bear before frost. Late Refugee Bountiful, Giant Stringless and Black Valentine are the best varieties for Fall planting.

Cabbage—The late varieties can still be sown, if not attended to last month. The early sowings will be sufficiently large to plant out the last of this month. Select the largest and strongest plants. The small ones can be transplanted later for a succession. Make a strong puddle of soil and dip the roots into it. Even in the driest weather not more than five per cent. will fail to grow.

Kale—Sow Siberian Curled, Green Curled Scotch for winter use.

Lettuce—Can still be sown for transplanting and heading in the open ground south of North Carolina. Sow **BUIST's** Selected Big Boston, Iceberg and New York or Wonderful.

Mustard—Sow Mammoth Southern Curled, Florida Broad Leaved.

Bermuda Onions—Plant this month. Sow the seed in beds, cover with moss, keep moist; when the young plants show, remove moss and water thoroughly. The Crystal White Wax is pure white, mild and sweet, the White Bermuda is of a straw color. Our stock is genuine. Set out Shallots, Potato Onions and Onion Sets.

All kinds of Beets, Carrots, Endive, Leek, and Kohl Rabi can be sown during this month.

Peas—Plant from the middle to last of the month, BUIST's Early Morning Star, Thomas Laxton, BUIST's Early Klondike.

Radish—Sow White Chinese and Round Scarlet China.

Spinach—Sow BUIST's Perfection Curled, as it surpasses all other varieties.

Turnips—Sow Red or Purple Top, White Flat Dutch, White Egg, Seven Top, and Southern Prize.

Hyacinths, Narcissus and all Dutch Bulbs can be planted the last of this month. We have our Bulbs grown especially for us by expert growers in Holland, France, Japan and Bermuda, and are true to name and of good size.

There are no flowers that will repay you as much as Hyacinths, Tulips and Narcissus, and which are so universally valued and admired. If you want Beautiful Flowers in your house this Winter or in your garden next Spring, send for our illustrated bulb catalogue and order at once.

Sow Lawn Grass the latter part of this month.

OCTOBER

See that all crops are clean and in good growing order. Whatever was omitted last month, do not overlook now. Take advantage of the weather to transplant Cabbage, Collard and Lettuce, and moist weather to earth up Celery. Water the Cauliflower plants; keep a basin of earth around them, and fill it frequently with water.

This is one of the best months in the South for planting *Onion Sets* for *Winter* and *Spring* use. Select small, sound Sets, as large ones are liable to shoot to seed before forming large Onions.

Cabbage—To produce plants for Spring planting, sowings of Jersey Wakefield, Charleston Wakefield, Copenhagen Market, BUIST's Prize Succession, All Head Early and Early Summer should be made now. On the approach of cold weather the plants should be lifted and stored in cold frames and transplanted out in the Spring.

Cauliflower—Sow Snowball, Danish Dry Weather and Early Paris, which can be transplanted into forcing or cold frames for heading during Winter and Spring, or stored similar to Cabbage for planting out.

Sow Corn Salad, Spinach and Kale to remain out all Winter.

Bermuda Onion can still be sown.

This is the best month for seeding Lawns, as the young grass becomes thoroughly established before cold weather and gives it an advantage of an early Spring growth. It is then not so liable to burn out during the hot summer months. If you have a Bermuda Lawn sow BUIST's Winter Lawn Grass and you will have a beautiful green lawn all through the Winter while the Bermuda is dormant.

Plant Hyacinths, Narcissus, Tulips, Lilies and other Bulbs in open ground or in pots for forcing.

NOVEMBER

Early in the month sow Parsnip for early Summer use; earth up Celery; tie up Endive. If a new planting of Asparagus is required it may be done now or next month.

Cover the old bed with a few inches of manure, to lay till January, and then fork it in with the top soil.

Transplant Cabbage, if not already done, for Spring heading; also Lettuce on sheltered borders, or on the south side of ridges, or into cold frames; they will continue growing and form fine heads; and a few sowings of Radish will also prove successful.

Transplant Rhubarb in rich ground, and early in Spring mulch the ground to retain moisture; also to prevent injury from dry weather. Sow Onion seed to transplant in February to form bulbs; you will thereby have good roots the first season. Onion Sets can still be planted.

In Louisiana, Texas, Southern Mississippi and Florida, almost every variety of seed can now be planted, such as Beet, Cabbage, Lettuce, Carrot, Parsnip, Salsify, Spinach, Endive, Radish, Mustard, Peas, etc.; it is also a very favorable month for the sowing of BUIST'S Improved Early and Late Flat Dutch and Drumhead Cabbage; also BUIST'S Florida Header, which will form large and beautiful heads in Spring. Manure for the hot-beds should now be looked after in these States for the starting of early vegetable plants.

DECEMBER

Now is the time to form new and good resolutions for another year's guidance. If your garden affairs have not proved satisfactory, note the difficulty, to insure better success another season, as experience is always the best teacher; we can read and listen to that of others, but are better satisfied and impressed with our own. Draw out your plans, study and reflect over them and improve if possible; when perfected, live and work up to them and you will be astonished to see what can be accomplished. "*Going It Blind*" is a poor and disastrous policy in any business, and especially so in gardening and planting operations. Outdoor work this month is necessarily quite limited, but still there are some important things that should be attended to in order to be in readiness for Spring operations. The manufacturer, before starting up his mill, invariably overhauls the machinery, to see that all is in working order; so it should be with the gardener and agriculturist. Before Spring opens see that everything required is in perfect order. Overhaul all tools and implements; see that your fences are secure for another year; arrange and clean up your barn and out-buildings; haul manure to the fields where it will be required; prepare compost for top-dressing; prune your orchards and fruit trees; trim up your hedges; top-dress your Asparagus beds with well-decomposed manure, if not already done, to be forked in (do not use a spade) as soon as the frost is gone and the ground in good working order. A top-dressing of salt is also of great importance.

Lawns may be improved by a good top-dressing as soon as the leaves are gathered up. Wood ashes, button bone, or any prepared manure is preferable to barnyard or stable manure, as the latter generally contains many seeds of weeds. By early covering the ground with manure, to prevent its freezing too deep, you will also be able to have your trenching and subsoiling done this month. Poles and rods for Beans and Peas should be made ready for use. Forcing beds, with growing crops of Lettuce, Radish, etc., will require daily attention. Improve your mind by subscribing to some good agricultural paper, and supply yourself with a few good works on Agriculture and Horticulture for your Winter reading. Make up your seed list for Spring and Summer sowing and order them at once from BUIST, who will always supply you with the choicest quality and growth. **Buist's Garden Seeds** are famous for their purity and for the fine quality of the vegetables they produce.

Sow White Marrowfat Peas, as they stand frost and are very productive. BUIST'S Extra Early Morning Star Peas can be planted end of the month.

Transplant Bermuda Onions.

Plant Egg Plant and Peppers in hot-beds.

Tomato—Sow in hot-bed, or the seed may be sown in shallow boxes and placed in a window. Plant BUIST'S Earli-Belle and you will have tomatoes ahead of your neighbors. Sow BUIST'S Belle, Market Champion, Prize Stone, and BUIST'S Monarch for general crop.

Making a Hotbed

In order to secure a supply of early vegetables, a hotbed frame is indispensable. It can be constructed by any one, at a very small cost; it consists of a wooden frame, generally six feet wide, and from six to sixteen feet long, according to the supply of early vegetables required; one side to be at least six inches higher than the other; the frame to be sub-divided by cross-bars; and each division covered by a glazed sash; the sides and ends should be joined by hooks and staples, to admit of its being taken apart and stored away when not required. After completion, place it on the manure-bed, prepared in the following manner: The frame should face the south or southeast; fill in about ten inches of rich pulverized soil, and allow it to stand a few days, giving it air by slightly raising the sash so that the fiery vapor or steam may escape. The seeds of Cabbage, Cauliflower, Egg Plant, Pepper, Tomato, and many other varieties may be sown, and the plants planted out as soon as the frosty weather is over.

Preparing Manure for Hotbeds.—Fresh stable manure only; not exceeding six weeks old, is suitable for this purpose. Turn it over into a compact heap, protected from heavy rains or snow; allow it to remain so for about eight days, when it should be made up into the requisite form to suit the frame. To insure more uniform heating a layer of straw is used to cover the manure. Egg plant requires strong heat to vegetate it; for such the hot material will require to be two feet thick. Where the ground is quite dry, a very good method is to dig a space about eighteen inches deep, and put the manure therein; tramp it firmly and evenly, place thereon the frame and sash; put in the rich earth, and in about four days sow the seed, having previously stirred the earth freely to destroy any seeds or weeds therein.

The Cold Frame is a simple construction of boards for wintering Cabbage, Lettuce, Cauliflower, or Broccoli, for planting out early in Spring. Select a dry Southern exposure; form a frame from four to six feet wide, and as long as is required. The back should be fourteen inches, and the front six inches high, with a cross-tie every six feet. Seeds of Cabbage, Lettuce, Cauliflower, and Broccoli, sown in the open border early in September, will be ready to plant into the cold frame about the end of October. The soil should be well prepared and smoothly raked before planting.

The Cold Pit—This is a structure in very general use for growing Cauliflowers during Winter. The situation must be dry and well sheltered, having a south or south-east exposure. Dig out a space two feet deep, and eight feet wide, if for brick, and nine feet wide if for stone. Build the back wall four and a half feet high; that will be two and a half feet above ground, and three feet high in the front. If the ground is not dry, and is subject to underwater, and draining cannot be effected, do not dig so deep, and surround the walls with two feet thick of earth, which will keep the frost from penetrating them. If Cauliflower is to be planted, put into the pit three feet of leaves from the woods; tramp them firmly, over which put one foot of rich earth; after it remains for two weeks it will be ready for the plants. Six plants for each sash of four feet will be enough. The space between may be filled up with Lettuce plants or a sowing of Radish.

The Hot Pit—Constructed in the same manner as the Cold Pit, but having the appliances of artificial warmth, either by hot manure and leaves, about half and half, firmly trampled into the bottom, two and a half to three feet thick; or one-half fresh tanner's bark, half dried, mixed with hot manure, is very efficient, over which place about one foot of earth. In about two weeks the heat will have subsided sufficiently to admit of Cucumbers being planted, or any other seeds or roots requiring artificial warmth to forward their growth.

Vegetable Planting Chart

For Philadelphia and Equivalent Climate

VARIETY	Seed Required	Seed Required per Acre	Planting Distance			Maturity from Planting to Picking
			Apart in Row	Between Rows	Depth	
Artichoke.....	1 oz. to 500 plants...	½ lb.....	1½ to 2 ft..	4 ft.....	1 in.....	1 year

Buist's Lawn Grass Seeds

"Ready for Mowing Five Weeks from Sowing"

OUR lawn preparations are blended from the finest varieties of grasses. They are the result of many years of experience in the production of an everlasting sod of beauty and endurance, which cannot be obtained from improper blending or cheap preparations that thrive temporarily, and then are winter-killed, thus requiring yearly sowing. The cheaper grasses contain chaff and annuals that give no permanency to the lawn. Like all other merchandise you can only expect what you pay for. *Buy the Best.*

SOW—On new land, use 1 lb. for every 200 square feet or 5 lbs. for 1000 square feet, 100 lbs. for one acre. For renovating old lawns when turf is thin use half quantity.

Buist's Evergreen

A MIXTURE composed of the finest varieties of grasses, each of which has its season of beauty, and the result of this blending is the producing of a sod that is always evergreen and velvety in appearance, and the color and beauty of an emerald. 1/2 lb., 20c; 1 lb., 40c; 2 1/2 lbs., 90c; 5 lbs., \$1.65; 20 lbs., \$6.00.

Buist's Emerald Green

A PERFECTLY blended combination of fine-bladed, quick-growing grasses, forming a compact velvety surface which, with proper care, improves from year to year. The ingredients of this mixture are of the highest grade of cleaned seed that will thrive under various climatic conditions. They will form a smooth, deep green, velvety sward from Spring to Winter without turning brown in the Summer. This is a preparation that justifies our slogan of "Ready for Mowing Five Weeks from Sowing." 1/2 lb., 25c; 1 lb., 50c; 2 1/2 lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.

Shady Nook

A COMBINATION of fine, dwarf growing evergreen varieties of grasses which do well in sheltered or shaded spots when difficulty is experienced in getting grass to grow. Our Mixture will bring greenness to the bare spots and restore the beauty of your lawn. 1/2 lb., 25c; 1 lb., 50c; 2 1/2 lbs., \$1.10; 5 lbs., \$2.00; 20 lbs., \$7.00.
